Miniature Circuit Breaker

The M-Series hydraulic-magnetic circuit breakers offer high performance in a compact, front panel mount design. Multiple agency approvals and options for terminals, panel hardware and actuator styles allow for extensive design flexibility. Wiping contacts assure longevity. These miniature circuit breakers are available as a one to two or parallel pole configuration, rated from 0.02 to 50 amps, up to 250VAC/80VDC with a max IC of 1,000 amps; 600 amps TUV and 500 amps VDE.

0.2-50 125/250 Poles Amps

VDC Max

Typical Applications

· Telecom

- Marine
- Power Supplies
- · Commercial Food

- Transportation
- Generators
- Medical Equipment

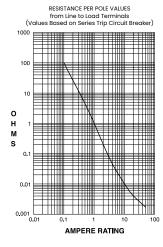

Tech Specs

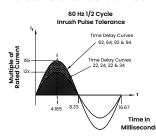

Electrical

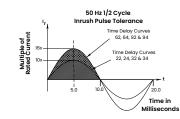

Current Ratings Standard current coils: 0.100, 0.250, 0.500, 0.750, 1.00 thru 15.0 in 1 amp increments, 18.0, 20.0, 25.0, 30.0. Other ratings available - see Ordering Scheme. Standard Voltage Coils DC - 6V, 12V; AC - 120V, other ratings available, see ordering scheme. Auxiliary Switch Rating SPDT; 7A 250VAC, 7A (Res) 28VDC, 0.25A 80VDC (Res) (silver contacts), 0.1A 125VAC (gold contacts). Insulation Resistance Minimum of 100 Megohms at 500 VDC. Dielectric Strength UL, CSA 1500V, 50/60 Hz for one minute between all electrically isolated terminals. M-Series Circuit Breakers comply with the 8mm spacing and 3750 V 50/60Hz dielectric requirements from hazardous voltage to operator accessible surfaces, per Publications IEC 380, 435, 950, EN 60950 and VDE 0805. Resistance, Impedance Values from Line to Load Terminal - based on Series Trip Circuit Breaker.	Maximum Voltage	125/250 VAC 50/60 Hz, 80 VDC (See Rating Tables.)
ratings available, see ordering scheme. Auxiliary Switch Rating SPDT; 7A 250VAC, 7A (Res) 28VDC, 4A (Ind.) 28VDC, 0.25A 80VDC (Res) (silver contacts), 0.1A 125VAC (gold contacts). Insulation Resistance Minimum of 100 Megohms at 500 VDC. Dielectric Strength UL, CSA 1500V, 50/60 Hz for one minute between all electrically isolated terminals. M-Series Circuit Breakers comply with the 8mm spacing and 3750 V 50/60Hz dielectric requirements from hazardous voltage to operator accessible surfaces, per Publications IEC 380, 435, 950, EN 60950 and VDE 0805. Resistance, Impedance Values from Line to Load Terminal - based on Series Trip Circuit	Current Ratings	0.250, 0.500, 0.750, 1.00 thru 15.0 in 1 amp increments, 18.0, 20.0, 25.0, 30.0. 0.10 - 20.0	± 25
20.1 - 50.0	± 35

Pulse Tolerance Curves

Mechanical

Endurance	10,000 ON-OFF operations @ 6 per minute with rated Current and Voltage.
Trip Free	All M-Series Circuit Breakers will trip on overload, even when actuator is forcibly held in the ON position.
Trip Indication	The actuator moves positively to the OFF position when an overload causes the circuit breaker to trip.

Physical

111/010011	
Number of Poles	1 or 2
Internal Circuit Config.	Series with or without Auxiliary Switch. Switch Only with or without Auxiliary Switch.
Weight	Approximately 30 grams/pole (Approximately 1.07 ounces/pole)
Standard Colors	See Ordering Scheme

Environmental

Designed in accordance with requirements of specification MIL PRF-55629 & MIL-STD-202G as follows:

Shock	Withstands 100 Gs, 6ms, sawtooth while carrying rated current per Method 213, Cond. I.Instantaneous curves tested at 80% of rated current.
Vibration	Withstands 0.060" excursion from 10-55 Hz, and 10 Gs 55-500 Hz, at rated current per Method 204C, Test Condition A. Instantaneous curves tested at 80% of rated current.
Moisture Resistance	Method 106D, i.e., ten 24-hour cycles @ + 25°C to +65°C, 80- 98% RH.
Salt Spray	Method 101, Condition A (90-95% RH @ 5% NaCl Solution, 96 hrs).
Thermal Shock	Method 107D, Condition A (Five cycles @ -55°C to +25°C to +85°C to +25°C).
Operating Temperature	-40° C to +85° C

Operating Temperature	-40° C to +85° C
Chemical Resistance	Only the outside surfaces of the case and the handles may be cleaned with detergents or alcohol. Organic (hydrocarbon based) solvents are not recommended because they attack plastics. Caution should be taken when solvents are used to clean and remove flux from terminals. Lubricants should not be introduced into the handle/

bushing openings

tes:

One actuator is located in the center of each multi-pole breaker.
For Switch Only circuits, select Current Coil Rating from the above chart:
One Auxiliary Switch is supplied per breaker. On two-pole breakers, standard
Auxiliary Switch mounting is in pole one. Auxiliary Switch option limited to
Series Trip & Switch Only Circuits, & is not available in single pole illuminated
breakers, or Back Connected Screw or Push-in Stud terminals.
For neon bulb applications at 120VAC@ 47K, 1/4 WATT and for 250VAC
applications @ 150K, 1/4 WATT, external resistors must be supplied by customer.
On Visi-Rockers, Visi portion of rocker cannot be the same color as bezel.
For LED (DC or rectified AC) applications, LED is mounted in the center of the
rocker actuator with electrical characteristics: 100 millicandela at 20m2; Maxi
mum power dissipation = 75mW at 25°C; Maximum forward current = 25mA;
Typical forward voltage = 2.1V at 20m4; Typical reverse current = 100uA at 3V.
Customer supplies the proper external resistor limiting current to these values.
Rocker color for LED's and green neon lamp must be clear, smoke gray, white
translucent or match color of LED or neon lamp.
Other colors available. Consult factory.
TUV 20A, VDE 15A. UR Recognized and CSA Accepted to 30 amps.
Screw Terminals or Push-in Stud recommended above 20 amps.
TUV/VDE must have 1-0 or Dual Legends. Legend required on Visi-Rockers.
30 amp rating not available with delay's 30, 32, 34, 92 or 94.
Screw Terminals are VDE certified and inj with use of fing terminal attached to wire.
Terminal code A available with circuit codes A & B only.
Printed circuit board available with UL recognized approval only.
Auxiliary switch (flat QC.) available with UL recognized approval only.

Notes:

- res:

 One actuator is located in the center of each multi-pole breaker.
 For Switch Only circuits, select Current Coil Rating from the above chart:
 One Auxiliary Switch is supplied per breaker. On two-pole breakers, standard
 Auxiliary Switch mounting is in pole one. Auxiliary Switch option limited to
 Series Trip & Switch Only circuits, & is not available in single pole illuminated
 breakers, or Back Connected Screw or Push-in Stud terminals.
 For neon bulb applications at 120VAC @ 47k, 1/4 WATT and for 250VAC
 applications@ 150k, 1/4 WATT, external resistors must be supplied by customer.
 For LED (DC or rectified AC) applications, LED is mounted in the center of the
 rocker actuator with electrical characteristics as follows: 100 millicandela at
 20mA; Maximum power dissipation = 75mW at 25°C; Maximum forward current
 = 25mA; Typical forward voltage = 2.1V at 20mA; Typical reverse current = 100uA
 at 3V. Customer supplies the proper external resistor limiting current to these
 values. values
- 6 On Visi-Rocker breakers, Visi portion of rocker cannot be the same color as the 7

- bezel.

 Rocker color for LED's and green neon lamp must be clear, smoke gray, white translucent or match color of LED or neon lamp.

 Other colors available. Consult factory.

 UL Recognized, CSA Accepted, UL489A Listed, and TUV Certified to 30 amps.

 Screw Terminals recommended above 20 amps.

 Polarity Sensitive Construction

 UL489A Listed must have ON-OFF or Dual legends.
- 11
- UL4894 Listed Thiast have on-Orr of Dourneyarias.
 TUV Certified approvals must have I O or Dual legends.
 Terminal code A available with circuit codes A & B only.
 Printed circuit board available with UL recognized approval only.
 Auxiliary switch (flat Q.C.) available with UL recognized approvals only.

Time Delay

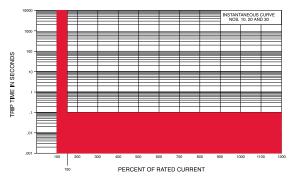

M, MS-SERIES TIME DELAY VALUES										
	PERCENT OF RATED CURRENT									
	Delay	100%	135%	150%	200%	400%	600%	800%	1000%	1200%
TRIP	10, 20, 30	No Trip	May Trip	.100 Max	.100 Max	.100 Max	.100 Max	.100 Max	.100 Max	.100 Max
TIME	12, 22, 32, 62, 72, 92	No Trip	.300 - 7.00	.200 - 5.00	.100 - 2.00	.030500	.008300	.006150	.005100	.005100
SECONDS	14, 24, 34, 64, 74, 94	No Trip	3.00 - 70.0	2.00 - 40.0	1.00 - 15.0	.100 - 4.00	.008 - 2.00	.006800	.005350	.005160

- Delay Curves 12,14, 22, 24, 32, 34, 62, 64, 72, 74, 92, 94: Breakers to hold 100% and must trip at 135% of rated current and greater within the time limit shown in
- Delay Curves 10, 20, 30: Breakers to hold 100% and must trip at 150% of rated current and greater within the time limit shown in this curve.

 All Curves: Curve data shown represents breaker response at ambient temperature of 77°F (25°C) with no preloading. Breakers are mounted in standard wall-mount position.
- The minimum inrush pulse tolerance handling capability is 12 times the rated current on standard delays and 18 times the rated current on high inrush delays. These values are based on a 60 Hz 1/2 cycle, 8.33 ms pulse. High inrush delays should be specified for applications with high initial surge currents of short duration, such as switching power supplies, highly capacitive loads and transformer loads.

About Carling

Founded in 1920, Carling Technologies is a leading manufacturer of electrical and electronic switches and assemblies, circuit breakers, electronic controls, power distribution units, and multiplexed power distribution systems. With six ISO9001 and IATF16949 registered manufacturing facilities and technical sales offices worldwide, Carling Technologies Sales, Service and Engineering teams do much more than manufacture electrical components, they engineer powerful solutions! To learn more about Carling please visit www.carlingtech.com/company-profile.

To view all of Carling's environmental, quality, health & safety certifications please visit www.carlingtech.com/environmental-certifications.
