Energy Management Energy Meter Type EM330

CARLO GAVAZZI

- Digital input (for tariff management)
- Easy connection or wrong current direction detection
- Certified according to MID Directive (option PF only): see "how to order" below
- Other versions available (not certified, option X): see "how to order" on the next page

- Three phase energy meter
- · Class 1 (kWh) according to EN62053-21
- Class B (kWh) according to EN50470-3
- Accuracy ±0.5% RDG (current/voltage)
- Current measurement via CT
- Backlit LCD display (3x 8-digit) with integrated touch key-pad
- · Energy readout on display: 8 digit
- · Variable readout on display: 4 digit
- Energy measurement: kWh and kvarh (imported/ exported); kWh+ by 2 tariffs; kWh per phase
- System variables: kW, kvar, kVA, VLL, VLN, PF, Hz, kWdmd, kWdmd peak
- Phase variables: kW, kvar, kVA, VLL, VLN, A, PF
- Auxiliary power supply
- Dimensions: 3-DIN module
- Protection degree (front): IP51
- Pulse output (optional, by open collector PNP)
- RS485 Modbus port (optional)
- M-bus port (optional)
- Run hour meter
- Neutral current calculation

Product description

Three-phase energy meter with backlit LCD display with integrated touch keypad. Particularly indicated for active energy metering and for cost

allocation (CT connection), with dual tariff management availability. It can measure imported and exported energy or be programmed to consider

only the imported one. Housing for DIN-rail mounting, with IP51 front degree protection. The meter is optionally provided with pulse output proportional to the active energy being measured, RS485 Modbus port or M-bus port. Available for legal metrology (PF option, only for imported energy).

Certified according to MID Directive, Module B and Module D of Annex II, for legal metrology relevant to active electrical energy meters

(see Annex V, MI003, of MID). Can be used for fiscal (legal) metrology.

S1: RS485 Modbus port
M1: M-bus port

Option

PF: Certified according to MID Directive. Can be used for fiscal (legal) metrology.

Measurement

- **A:** The power is always integrated (both in case of positive imported and negative exported power) and the total energy meter is certified according to MID.
- **B:** Only the total positive energy meter is certified according to MID.

STANDARD

Not certified according to MID Directive. Cannot be used for fiscal (legal) metrology.

Input specifications (cont.)

Load conditions

The wrong connection detection works in case of loads with:
- PF>0.766 (<40°) if inductive or PF>0.996 (<5°) if capacitive

- a current at least equal to 10% rated current
