

PD140FNT60QMU-02C

Through Beam

Description

The PD140 sensor consists of an emitter, which sends out invisible, infrared light, and a receiver, capable of detecting the light from the emitter.

The sensor is encapsulated in a robust, vandal-proof aluminium/polycarbonate housing.

The lenses are adjustable in both $\pm 100^\circ$ horizontal and $\pm 15^\circ$ vertical directions, which allows flexible mounting, even when emitter and receiver are mounted at different heights.

The aspherical lens design gives a superior homogeneous light beam over the total beam angle.

- Sensor test function: the emitter has a built-in test input designed to mute the emitter and thus evaluate the sensor function. The test function is to be controlled and monitored by the door controller.

Main features

- Designed for Industrial doors and gates
- ESPE type 2, Performance level d
- For door or gate widths up to 60 m
- Modulated, infrared light
- Supply voltage: 12 to 24 VAC/DC
- 1 A, SPDT relay output
- Analogue voltage output or flashing LED indication for optical alignment help
- Built-in holder for green laser alignment accessory tool
- Yellow LED for output indication
- Green LED indication for power ON
- Connection: self-lifting terminal block, 1,5 mm² (AWG 16)
- Emitter test input
- Robust vandal-proof aluminium/polycarbonate housing
- IP65, NEMA 1. 2. 3. 3R. 3RX. 3SX. 3X. 5. 12. 12K rating
- CE, EN12453, EN12978, UL325 and UL508 approved

Main functions

- Designed for domestic and industrial doors and gates
- Detects presence or absence of persons or vehicles by interruption of the light beam from the emitter to receiver
