

# Solid State Relays

## Low Electromagnetic Noise Emission

### Types RA 24.. -D 06 L, RA 40.. -D 08 L

CARLO GAVAZZI

- AC Solid State Relay
- Zero switching
- For ohmic load applications
- Rated operational current: 10 and 25 AACrms
- Rated operational voltage: Up to 400 VACrms
- 10 A type meets CISPR 22 B requirements

## Product Description

This relay is designed for use in applications where low electromagnetic emission is essential.

Today, household and electrical appliances, information technology and medical equipment must conform with the latest EN standards. These new EN standards define general and product related requirements for noise immunity and noise emission. The RA24..-D06L and RA40..-D08L are relays for applications where the noise emission must be low and where the customer does not want

to relinquish all Solid State Relay features. The relay is available with zero crossing function. It is designed for resistive loads, i.e. power factor = 1.

Predestined applications for this relay are office machines, ovens and cookers for domestic and industrial use, theatre or stage lighting systems, film processing and copying machines or medical equipment.

## Ordering Key

**RA 24 25 -D 06 L**

Solid State Relay \_\_\_\_\_  
 Switching mode \_\_\_\_\_  
 Rated operational voltage \_\_\_\_\_  
 Rated operational current \_\_\_\_\_  
 Control voltage \_\_\_\_\_  
 Blocking voltage \_\_\_\_\_  
 Low RFI \_\_\_\_\_

## Type Selection

| Switching mode    | Rated operational voltage        | Rated operational current      | Control voltage | Blocking voltage                                 | Electromagnetic noise emission |
|-------------------|----------------------------------|--------------------------------|-----------------|--|--------------------------------|
| A: Zero switching | 24: 230 VACrms<br>40: 400 VACrms | 10: 10 AACrms<br>25: 25 AACrms | -D: 3 to 32 VDC | 06: 650 V <sub>p</sub><br>08: 850 V <sub>p</sub> | L: Low RFI                     |

## Selection Guide

| Rated operational voltage | Blocking voltage   | Electromagnetic noise emission | Control voltage | Rated operational current<br>10 AACrms | 25 AACrms       |
|---------------------------|--------------------|--------------------------------|-----------------|--|-----------------|
| 230 VACrms                | 650 V <sub>p</sub> | Low RFI                        | 3 to 32 VDC     | RA 2410 -D 06 L                        | RA 2425 -D 06 L |
| 400 VACrms                | 850 V <sub>p</sub> | Low RFI                        | 3 to 32 VDC     | RA 4010 -D 08 L                        | RA 4025 -D 08 L |

## General Specifications

|                             | RA 24.. -D 06 L           | RA 40.. -D 08 L           |
|-----------------------------|---------------------------|---------------------------|
| Operational voltage range   | 180 to 265 VACrms         | 340 to 530 VACrms         |
| Blocking voltage            | $\geq 650$ V <sub>p</sub> | $\geq 850$ V <sub>p</sub> |
| Operational frequency range | 45 to 65 Hz               | 45 to 65 Hz               |
| Power factor                | 1                         | 1                         |
| Approvals                   | UR, cUR, CSA              | UR, cUR, CSA              |
| CE-marking                  | Yes                       | Yes                       |

## Input Specifications

|                       |                  |
|-----------------------|------------------|
| Control voltage range | 3 to 32 VDC      |
| Pick-up voltage       | $\leq 3$ V       |
| Drop-out voltage      | $\geq 1$ V       |
| Reverse voltage       | $\leq 32$ VDC    |
| Input impedance       | 1 k $\Omega$     |
| Response time         | $\leq 1/2$ cycle |

## Insulation

|  |                    |
|--|--------------------|
| Rated isolation voltage<br>Input to output | $\geq 4000$ VACrms |
| Rated isolation voltage<br>Output to case  | $\geq 4000$ VACrms |
| Reference voltage                          | 500 VACrms         |
| Insulation meets VDE 0700<br>requirements  |                    |

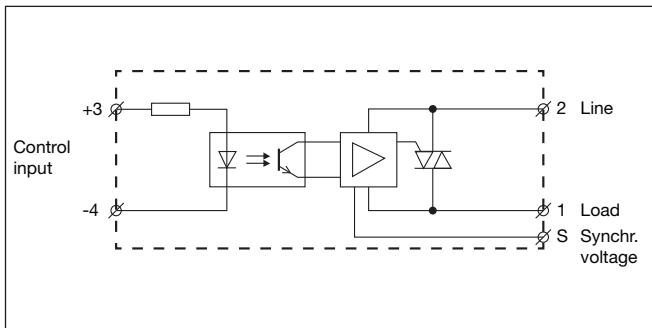

## Output Specifications

Ambient temp. [°C]

## Heatsink Selection

| Carlo Gavazzi Heatsink<br>(see Accessories) | Thermal resistance                |
|---|-----------------------------------|
| No heatsink required                        | $R_{th\ s-a} > 12,5 \text{ °C/W}$ |
| RHS 100 Assy                                | 3,0 °C/W                          |
| RHS 301 Assy                                | 0,8 °C/W                          |
| RHS 301 F Assy                              | 0,25 °C/W                         |
| Consult your distributor                    | < 0,25 °C/W                       |

Compare the value found in the current versus temperature chart with the standard heatsink values and select the heatsink with the next lower value.

## Applications

The very low, wire-conducted RFI feature of this relay is obtained by synchronized firing of the output triac in the zero crossing of the mains voltage. Therefore the relay must have the synchronization input connected to the mains, either to neutral or to the phase depending on how the load is connected.

The relay can only switch resistive loads with a power factor of 1.

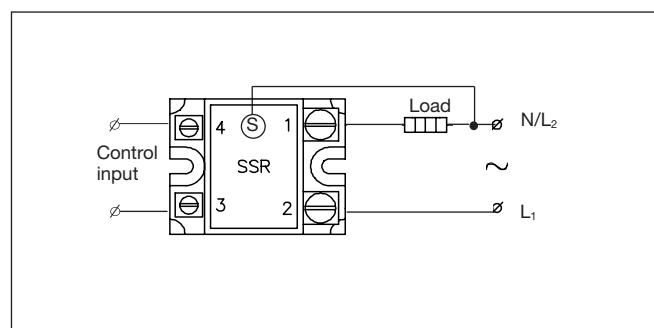

A minimal load current of 1A for the RA ..10 -D 0. L and 2 A for the RA ..25 -D 0. L is required as long as the control input is activated.

## Accessories

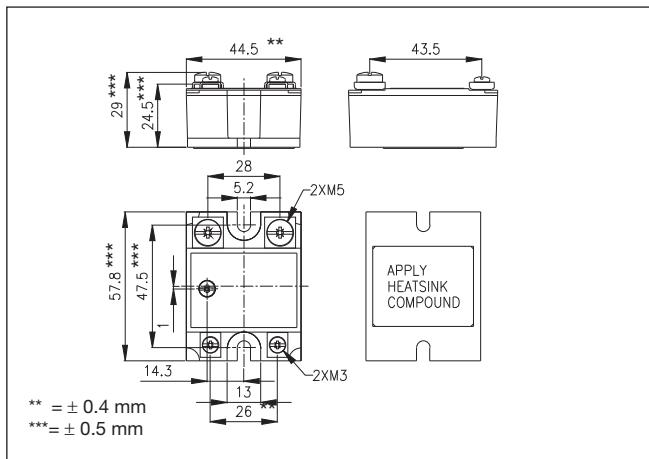

Heatsinks  
DIN rail adapter  
Varistors  
Fuses

For further information refer to "General Accessories".
