# Solid State Relays <br> 1-Phase, Soft Start Switching <br> Types RGS 1 P..K.. 

## Product Description

The RGS1P..K provides a solution for starting of loads having a high cold to hot resistance ratio and hence it is very common for such loads to exhibit a high inrush current when switched on from a cold state. Such behaviour is very common for short wave infrared heaters.

When a control signal is applied to the RGS1P..K, a soft start is performed. The soft start time is settable through
an accessible potentiometer. Once the soft start is complete, the RGS1P..K output switches ON and OFF according to the control signal. Soft starting is perfomed again if the control signal has been missing for more than 5 seconds.

The output of the RGS1P is protected against overvoltages by means of an integrated varistor across the output. Two front LEDs indicate the status of the load and control

Specifications are at a surrounding temperature of $25^{\circ} \mathrm{C}$ unless otherwise specified.

- 1-pole AC solid state relays
- Soft start switching for short wave infrared heaters
- Rated operational voltage: up to 660 VAC
- Rated operational current: up to 90 AAC
- Control input: 24 VDC
- Integrated varistor protection on output
- Load ON LED indication
- 100kA short circuit current rating according to UL508

## Note:

- Control input lines must be installed together to maintain products susceptibility to Radio Frequency Interference.
- Use of AC solid state relays may according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C requirements. The filtering tables should be taken only as indications, the filter attenuation will depend on the final application.
- This product has been designed for Class A equipment. (External filtering may be required, refer to filtering section). Use of this product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.
- Surge tests on RGC..A models were carried out with the signal line impedence network. In case the line impedance is less than $40 \Omega$, it is suggested that AC supply is provided through a secondary circuit where the short circuit limit between conductors and ground is 1500 VA or less.
- A deviation of one step in the distributed full cycle models and up to $1.5 \%$ Full Scale Deviation in phase angle models is considered to be within PC1 criteria.
- Performance Criteria 1 (Performance Criteria A): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (Performance Criteria B): During the test, degredation of performance or partial loss of function is allowed. However, when the test
is complete the product should return operating as intended by itself.
- Performance Criteria 3 (Performance Criteria C): Temporary loss of function is allowed, provided the function can be restored by manual operation of the control.

## CARLO GAVAZZI

## Mode of Operation

Soft starting is utilised to reduce the start-up current of loads having a high cold to hot resistance ratio such as short wave infrared heaters. The thyristor firing angle is gradually increased over a time period of maximum 5 seconds (settable through an accessible potentiometer) in order to apply the voltage (and current) to the load smoothly.

Soft starting is perfomed only on the first power up and when the control voltage has been missing in the preceeding 5 seconds. If soft start is stopped before soft start completion, it is assumed that a start was peformed and the period count for missing control voltage starts as soon as the soft start is stopped.

## Dimensions

RGS1P.. 50

Note: The indicated depth dimension of the RGx1P has to be increased by 3 mm when the tamper proof cover accessory is mounted on the device.

RGS1P.. 92

[^1]Housing width tolerance +0.5 mm , -Omm...as per DIN43880 All other tolerances $\pm 0.5 \mathrm{~mm}$ All dimensions in mm

## Connection Diagram

## Short Circuit Protection

## Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state. In type 2 co-ordination the device under test will still be functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 100,000A Symmetrical Amperes, 600Volts maximum when protected by fuses. Tests at 100,000Arms were performed with Class J fuses, fast acting; please refer to the tables below for maximum ratings. Tests with Class $J$ fuses are representative of Class CC fuses.

## Co-ordination type 1 (UL508)

| Part No. | Short circuit current <br> [kArms] | Max. fuse <br> size [A] | Class | Voltage [VAC] |

7. Between MCB and Load (including return path which goes back to the mains).

Note: A prospective current of 6 kA and a 230/400V power supply system is assumed for the above suggested specifications. For cables with different cross section than those mentioned above please consult Carlo Gavazzi's Technical Support Group.

## Environmental Information

The declaration in this section is prepared in compliance with People＇s Republic of China Electronic Industry Standard SJ／ T11364－2014：Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products．

| Part Name | Toxic or Harardous Substances and Elements |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Lead <br> $(\mathrm{Pb})$ | Mercury <br> $(\mathrm{Hg})$ | Cadmium <br> $(\mathrm{Cd})$ | Hexavalent <br> Chromium <br> $(\mathrm{Cr}(\mathrm{VI}))$ | Polybrominated <br> biphenyls（PBB） | Polybrominated <br> diphenyl ethers <br> （PBDE） |
|  | x | O | O | O | O | O |
| O：Indicates that said hazardous substance contained in homogeneous materials fot this part are below the limit require－ <br> ment of GB／T 26572． <br> X：Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the <br> limit requirement of GB／T 26572． |  |  |  |  |  |  |

## 环境特性

这份申明根据中华人民共和国电子工业标准
SJ／T11364－2014：标注在电子电气产品中限定使用的有害物质

| 零件名称 | 有毒或有害物质与元素 |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 铅 <br> $(\mathrm{Pb})$ | 永 <br> $(\mathrm{Hg})$ | 镉 <br> $(\mathrm{Cd})$ | 六价铬 <br> $(\mathrm{Cr}(\mathrm{V}))$ | 多溴化联苯 <br> $(\mathrm{PBB})$ | 多溴联苯醚 <br> $(\mathrm{PBDDE})$ |
|  | $\times$ | O | O | O | O | O |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

## CARLO GAVAZZI

Accessories
Tamper Proof Accessory Kit

## Ordering Key

 RGTMPTamper proof accessory kit for RGS1P, RGC1P series containing: - x5 transparent covers

- x5 secureness ties

## Installation

1: Clip hook of the transparent cover to the bottom loop of the RGx1P control module

2: Close the cover by clipping to the top loop of the RGx1P control module

3: Secure with provided tie

## Heatsink Selection

## Ordering Key

RHS..

- Heatsinks and fans
- $5.40^{\circ} \mathrm{C} / \mathrm{W}$ to $0.12^{\circ} \mathrm{C} / \mathrm{W}$ thermal resistance
- DIN, panel or thru wall mounting
- Single or multiple SSR mounting

## Heatsink Range Overview:

http://www.productselection.net/PDF/UK/ssr_accessories.pdf

## Heatsink Selector Tool:

http://www.productselection.net/heatsink/heatsinkselector.php?LANG=UK

## CARLO GAVAZZI

## Thermal Pads

## Ordering Key

RGHT

- Graphite thermal pad for RG series with adhesive on one side
- Width $\times$ Height $\times$ Thickness $=14 \times 35 \times 0.13 \mathrm{~mm}$
- Packing qty. 10 pcs.

## Thermal Paste

## Ordering Key

HTSO2S

- Silicone based thermal paste syringe
- Volume $=2 \mathrm{ml}$
- Packing qty. 1 pc.

## Screw Kits

## Ordering Key SRWKIT M5 X 30MM

- RGS Screw kit for mounting to heatsink
- Torx T20, size M5 x 30mm
- Packing qty: 20pcs.

[^0]:    1: Max. ratings with suitable heatsink. Refer to Heatsink Selection tables for further details.

[^1]:    Note: The indicated depth dimension
    of the RGx1P has to be increased by
    3 mm when the tamper proof cover
    accessory is mounted on the device.
