

Conductive Sensors Level Probes Type VS2

- Food and beverage usage
- 2 Teflon isolated electrodes
- For welding in container
- Screw connection

Product Description

Level sensor for measuring the level of conductive liquids, i.e. max./min. control of charging for discharging. The function is determined by the amplifier relay used. The

sensors are delivered with standard length electrodes - these are cut off to suit the application. For use in the food and beverage industry.

Mode of Operation

The length of the electrodes determines the levels which will be detected and the amplifier chosen determines the function (see SV...

S195/196, S1961, ELA, ELC or ELD). If the container is made of a conductive material this can be used as common electrode.
