TDS # SWNoClean

Soder-Wick® No Clean Desoldering Braid

PRODUCT DESCRIPTION

Soder-Wick[®] No Clean is designed to provide fast and safe desoldering without leaving behind harmful flux residues. Soder-Wick[®] No Clean uses pure, oxygen free copper braid and a patented flux technology to make an efficient and effective desoldering braid. Soder-Wick[®] No Clean SD is available on ESD safe bobbins for protection against damage due to static electricity.

- Requires little or no post solder cleaning
- No corrosive residues
- Halide free
- ESD Safe bobbins meet specs: MIL-STD-1686C MIL-HDBK-263B Static decay provision of MIL-B-81705C
- Minimal risk of heat and static component damage

TYPICAL APPLICATIONS

Soder-Wick[®] No Clean safely removes solder from:

- Lugs and Posts
- Micro Circuits
- Surface Mount Device Pads
- Ball Grid Array Pads

USAGE INSTRUCTIONS

For industrial use only.

Read MSDS carefully prior to use.

- 1) Choose a Soder-Wick® No Clean width equal to or slightly larger than the pad or connection.
- 2) Choose a solder iron tip equal to or slightly larger than the pad or connection.
- 3) Set temperature of iron between 600-750°F.
- 4) Place wick on solder joint and place tip of hot iron on top of wick.
- 5) As solder becomes molten, the color of the wick will change from copper to silver.
- 6) Remove wick and iron from joint simultaneously once color change has stopped.
- 7) The component lead / pad is now clean and free from solder.
- 8) Clip and discard used portion of the wick.
