

Analog Rocker – AR5 (Fingertip)

AR5

Example AR5 solution (showing custom lever)

DTCs AR5 Analog Rocker has been developed to provide the reliability required in demanding environments such as dashboards or armrest controls - for heavy duty industrial and off-road applications.

The unique design makes the rocker module an ideal proportional function solution for off-road machinery for cost-effective custom designs.

DTCs AR5 has been designed to simplify the customisation of fingertip rockers in an off-road vehicle application.

Main Features

- Design allows for usage of longer levers
- Contactless sensing Hall effect
- Rocker life > 2 million cycles
- Optional detent / over travel, life > 200K cycles; optional latching, life > 100K cycles
- Single sensor optional second sensor for redundancy
- Integrated temperature compensation
- Short circuit protection
- Ideal solution for fingertip rocker designs
