

RS

The rocker switch modules RS1 and RS2 are designed to be installed into front panels, multi-function grips or other switching units.

RS1

This module is standard rocker switch with a single switch function in both directions.

RS2

With the RS2 a double switch function is available in both directions.

QS

The quadrant switch modules QS1 and QS2 are designed to be installed into front panels, multi-function grips or other switching units.

QS1

This module is a quad switch similar to a “mirror switch” made of four K12 switches, designed for 4 switching functions (e.g. for movements in four directions: up, down, left and right).

QS2

This module is similar to the QS1 but has a double switch function and is made up with eight K12 switches allowing additional functions in each direction.
