

CO\$EL

SFLS-series

Feature

Low profile SMD mounting type
High efficiency (synchronous rectifier circuit)
Parallel operation is possible
Built-in overcurrent, overvoltage and lowvoltage circuits
Built-in remote ON/OFF, alarm
Built-in Power ready / Sequence control

CE marking

Low Voltage Directive RoHS Directive

Safety agency approvals

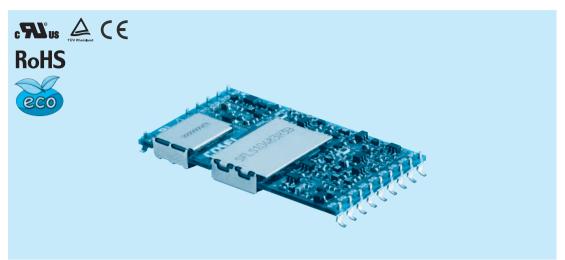

UL60950-1, C-UL, EN60950-1

■ 5-year warranty

9,10	NC	Not connected / Adhesive dispensing
11)	ALM	Alarm
12	RAMP	Ramp-rate control
13	RC	Remote ON/OFF
14)	PR	Power ready / Sequence control
15)	PO	Start in/out
16, 17, 18	-Vin	-DC input
19,20	+Vin	+DC input
21)	NC	Not connected / Adhesive dispensing

Assembling and Installation Method

Automatic mounting

- ■SFLS series is designed to have a large flat area in the center of the top surface to serve as a pick up point for automated vacuum pick and place equipment.
- ■An excessively low bottom dead point of the suction nozzle imposes great force on the core during mounting, causing cracked core. So during mounting, take enough care.

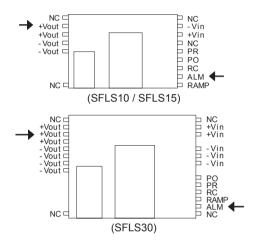

SFLS-8 June 26, 2020

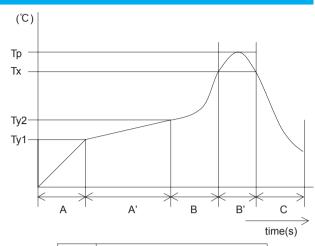

Implementation · Mounting Method

Soldering temperature

- (1) Reflow soldering
- ■Below and right figure show the conditions of reflow soldering. Please verify the temperature of the ALM pin and +Vout pin satisfy to reflow condition.
- ■Improper reflow condition may degrade the reliability of the internal components.
- ■While soldering, having vibration or impact on the unit should be avoided, because of solder melting.

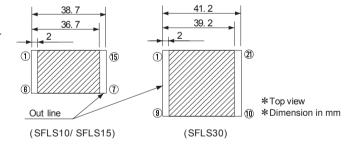

Α	1.0 - 5.0℃/ s
A'	Ty1 : 160 <i>±</i> 10℃
	Ty2 : 180 ±10℃
	Ty1 - Ty2 : 120s max
В	1.0 - 5.0℃/s
B'	Tp : Max245℃ 10s max
	Tx : 220℃ or more : 70s max
С	10-50℃/s

(2) Soldering iron

■340°C to 360°C. less than 5 seconds.

Mounting method

■Avoid placing pattern layout in hatched area in right figure to insulate between pattern and power supply.

Stress to the product

■SFLS series transformer core and choke coil core are attached by glue, and there is a cover over the core, which is attached by a clasp. There is a possibility that the core will be removed and power supply will be damaged when it took stress by the fall or some kind of stress.

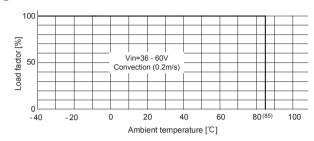

Derating

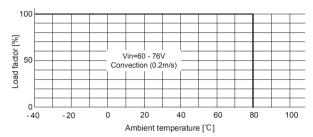

Ambient temperature derating curve

■It is necessary to note thermal fatigue life by power cycle. Please reduce the temperature fluctuation range as much as possible when the up and down of temperature are frequently generated.

① Vin=DC36V - 60V

2 Vin=DC60V - 76V
