CUI DEVICES

SERIES: CFM-60 | DESCRIPTION: DC AXIAL FAN

FEATURES

- 60 x 60 mm frame
- high fan speed for greater air flow
- dual ball bearing construction
- auto restart protection standard on all models

APPLICATION NOTES

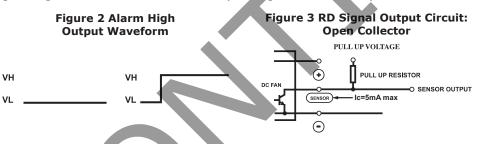

Auto Restart Protection/Current Limit Protection

When the fan motor is locked, the device will cut off the drive current within two to six seconds and restart automatically after a few seconds. If the lock situation is continued, the device will work on a repeated cycle of cut-off and restart until the lock is released. (See Figure 1 below).

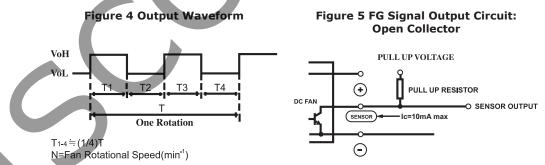

Lock Sensor/Rotation Detector

Lock Sensor is used to detect if the fan motor is operating or stopped. Alarm High: the output will be logical low when fan is operating and be logical high when fan motor is locked. (See Figures 2~3 below).

Pulse Sensor/Tachometer Signal/FG

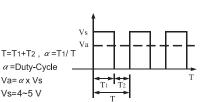

Pulse Sensor is for detecting the rotational speed of the fan motor. At locked rotor condition, the signal stops cycling and the output is fixed at VoH or VoL (See Figures 4~5 below).

PMW Control Signal

A speed control lead can be provided that will accept a PWM signal from the customer circuit to vary the speed of the fan. The change in speed is linear by changing the Duty-Cycle of the PWM. Open collector type and pull-up voltage is changed by maximum operating voltage and sink current by consuming current. (See Figure 6 below).

Figure 6 Duty Cycle

REVISION HISTORY

rev.	description	date
1.0	initial release	08/15/2016
1.01	updated datasheet	07/27/2017
1.02	discontinued CFM-6025-13-10, CFM-6025-13-11, CFM-6025-13-20, and CFM-6025-13-22 models	01/29/2018
1.03	updated to be certified to EN 62368-1 safety standard	07/09/2019
1.04	brand update	02/10/2020
1.05	discontinued CFM-6015-13-20 and CFM-6015-13-22 models	04/28/2021
1.06	discontinued CFM-6010-13-22	06/18/2021

CUI Devices offers a one (1) year limited warranty. Complete warranty information is listed on our website.

CUI Devices reserves the right to make changes to the product at any time without notice. Information provided by CUI Devices is believed to be accurate and reliable. However, no responsibility is assumed by CUI Devices for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI Devices products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
