#### **DESCRIPTION:** DC-DC CONVERTER **SERIES:** VAQE6W-D

#### **FEATURES**

- industry standard footprint
- high efficiency up to 88%
- single and dual output models available
- board mount
- 3000 Vdc isolation
- industrial operating temp -40~+85 °C
- 4:1 wide input range
- input under voltage protection & over voltage protection
- over current protection
- EN 62368-1

Notes:

- 1. From 5~100% load, nominal input, 20 MHz bandwidth oscilloscope, with 10 μF tantalum and 1 μF ceramic capacitors on the output. From 0~5% load, ripple and noise is
- 2. Measured at nominal input voltage, full load.
  3. All specifications are measured at Ta=25°C, humidity < 75%, nominal input voltage, and rated output load unless otherwise specified.

| transient response deviation         | 25% load step change, nominal input voltage   |  |     | ±3           | ±5                                  | %                          |
| temperature coefficient              | at full load  |  |     |              | ±0.03                               | %/°C                       |

Note:

- 1. Tested at input voltage range and full load.
  2. At 0~100% load, the max load regulation is ±5%.
  3. Unbalanced loads should not exceed ±5%. If ±5% is exceeded, the product performance cannot be guaranteed.
  4. Value is based on full load. At loads <50%, the switching frequency decreases with decreasing load.

# **PROTECTIONS**

| parameter                | conditions/description    | min | typ | max | units |

#### **APPLICATION CIRCUIT**

This series has been tested according to the following recommended circuits (Figures 1 & 2) before leaving the factory. If you want to further reduce the input and output ripple, you can increase the input and output capacitors or select capacitors of low equivalent impedance provided that the capacitance is less than the maximum capacitive load of the model.

Figure 1
Single Output Models

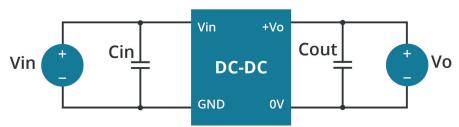

Figure 2
Dual Output Models

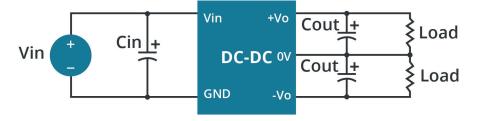

Table 1

| Vin<br>(Vdc) | Cin<br>(µF) | Cout<br>(µF) |
|--------------|-------------|--------------|
| 24           | 100         | 10           |
| 48           | 10~47       | 10           |

#### **EMC RECOMMENDED CIRCUIT**

CUI offers a two (2) year limited warranty. Complete warranty information is listed on our website.

CUI reserves the right to make changes to the product at any time without notice. Information provided by CUI is believed to be accurate and reliable. However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
