

# Static Shielding Bag 1300 Series

This transparent metal-in static shielding bag is designed to provide a static safe environment for ESD sensitive electronic devices. A stronger polyester layer helps prevent punctures. Bags are printed with an ESD protective symbol and a lot code for traceability. The bags are heat sealable. ZipTop and other custom features are available.

SCS Static Shielding Bags 1300 are manufactured from a polyester, metal, polyethylene laminate. The polyester dielectric, in concert with the metal layer, provides shielding for the bag contents from Electrostatic Discharge (ESD) and helps minimize the penetration of an electrical field

Made in the United States of America

| Physical                      | Typical Value                                      | Testing Method            |
|-------------------------------|--|---------------------------|
| Tensile Strength              | 8100 PSI, 55 MPa                                   | ASTM D882                 |
| Puncture Resistance           | 22 lbs, 98 N                                       | MIL-STD-3010C Method 2065 |
| Seal Strength                 | 15 lbs, 66 N                                       | ASTM D882                 |
| Thickness                     | 3.2 mils, 0.0813 mm +/-10%                         | MIL-STD-3010C Method 1003 |
| Marking Adhesion              | Pass   | IPC-TM-650 2.4.1          |
| Transparency                  | 40%  | Tobias                    |
| Electrical                    | Typical Value                                      | Testing Method            |
| Discharge Shielding           | <10 nJ   | ANSI/ESD STM11.31         |
| Surface Resistance - Interior | 1 x 10 <sup>4</sup> to < 1 x 10 <sup>11</sup> ohms | ANSI/ESD STM11.11         |
| Surface Resistance - Exterior | 1 x 10 <sup>4</sup> to < 1 x 10 <sup>11</sup> ohms | ANSI/ESD STM11.11         |
| Cleanliness                   | Typical Value                                      | Testing Method            |
| Silicone                      | Not Detected                                       | FTIR                      |
| Heat Sealing Conditions       | Typical Value                                      |                           |
| Temperature                   | 375°F, 190°C                                       |                           |
| Time                          | 0.5 – 3.5 seconds                                  |                           |
| Pressure                      | 30 – 70 PSI, 206 - 482 KPa                         |                           |

**Chemical Properties:**  
 Bag is free of amines, silicones and heavy metals.

Meets ANSI/ESD S20.20, Packaging Standard ANSI/ESD S541, and Static Control Bag ANSI/ESD S11.4 Level 3

This product is intended for commercial use only. This product is not on the Qualified Product Listing under the Defense Standardization Program.

Specifications and procedures subject to change without notice.
