

MigaOne[®]

Features

- Silent operation
- Affordable miniature motion
- Integrated digital controller
- Integrated power drivers
- Low outgassing
- Non-magnetic
- Built-in limit-stop detection
- Suitable for portable devices using high-energy batteries

Benefits

- Eliminates mechanical and electrical noise
- Affordable for high volume consumer devices
- Compatible with complex as well as simple mechanical systems
- Reduces overall system cost and time to market
- Allows seamless integration with digital systems
- Ideal for use with portable consumer devices

The MigaOne is available now either from the factory, or from our online retailers.

Linear Shape Memory Alloy Actuator

Miga Motor Company SMA Actuators are the World's thinnest motors: providing high force, long stroke alternatives to old-fashioned motors and solenoids for numerous applications.

Simply connect the MigaOne & MADv5 Analog Switching Circuit to your device and to a standard power supply (such as high energy batteries), and you are ready to turn on Modern Motion from Miga Motor Company.

The MigaOne is ideally suited for use as a latch release mechanism, but can also be used for many other motion applications.

MigaOne™ Specifications at a Glance

Stroke:	0.35 inches (9mm)
Output Force:	Constant 2.5 lb-f (11 N)
Actuation Time:	50 ms to Position-Hold (Controlled by input voltage or PWM)
Weight:	0.45 ounces (12.8 grams)
Thickness:	0.11" (2.8mm)
Resistance:	3.8 ohms *
10V actuation:	~2.7 amps, 0.5s *
Mounting:	Holes for 4x 2-56 screws
Electrical:	3-Pin header on 0.1" pitch
Operating Temperature:	-20 °F to 140 °F (-29 °C to 60 °C)

*Note: All values are approximate

The MigaOne-series of actuators can easily be customized to meet nearly any stroke, force, or power requirement.

Call us today about a custom On-Board SMA Actuator to suit your specific needs.

Actuation speed can be varied either by changing the actuator input voltage, or by using PWM Logic-Gate input signals.

Position control can be done either through an external timing circuit, or use of an external position sensor.

A high level of speed/position control can be achieved!

Miga Analog Driver v5

Note: The MADv5 can be built directly onto the MigaOne PCB or any custom actuator application
