

DIGI EX15

Branch connectivity in a compact, affordable, all-in-one solution

Digi EX15 LTE cellular extenders offer gigabit Ethernet and Wi-Fi connectivity for retailers and other organizations that cannot tolerate network downtime and the negative impact on revenue streams and brand reputation.

A suite of upgradeable Digi CORE® plug-in LTE modems lets users select the cellular speeds that best fit their business requirements, including LTE Cat 4, LTE-Advanced Cat 6 and LTE-Advanced Cat 11 for data-intensive applications.

Combine a Digi EX15 with a dedicated wireline connection to ensure dual ISP connectivity, maximum uptime and complete business continuity for devices that must be "always on," such as mobile kiosks, digital signs and POS systems.

You can use Digi EX15 for primary LTE connectivity, in addition to dual-connectivity/failover. Additionally, the serial port can provide out-of-band (OOB) management for remote, off-premise equipment.

Digi device management applications provide easy setup, configuration and support for Digi devices. Digi Remote Manager® offers secure, web-based device management for network visibility and control over your Digi enterprise routers and gateways after deployment. For fast and easy installations, a site survey battery, PoE injector and mounting accessories are included for proper placement based on optimal signal strength.

FEATURES AND BENEFITS

- LTE-certified Digi CORE plug-in modem
- Scalable cellular technology allows you to match speeds to applications and future proof your network
- Optimized connectivity to any Ethernet device
- Battery pack for site survey to identify optimal signal strength placement
- Multiple mounting options and accessories
- Serial port for remote, out-of-band management
- Securely deploy, monitor and control devices with Digi Remote Manager
- Zero-touch provisioning and cloud management

DIGI REMOTE MANAGER®

INFRASTRUCTURE

- Hosted in a commercial-grade SAS 70-certified environment
- Superior availability, operating to 99.9% or greater
- Open APIs available to support application development

CAPABILITIES

- Centralized management of remote devices over 3G/4G/LTE
- Define standard configurations and automatically monitor individual devices for PCI security compliance
- Get alerts and create reports on performance statistics, including connection history, signal quality, latency, data usage and packet loss
- No servers or applications to operate and maintain
- Perform tasks across your entire device network in minutes
- Edit configurations and update firmware for individual devices or groups
- Monitor the status and location of remote devices via a web browser
- Activate or deactivate cellular lines and monitor data to ensure you never incur overage charges

SECURITY

- Certified SSAE-16 facilities
- Over 175 security controls in place to protect your data
- Enables compliance with security frameworks like PCI, HIPAA, NIST
- Earned SkyHigh's Cloud Trust Program highest rating of Enterprise-Ready
