EMBEDDED MODEM

DIGI XBEE® CELLULAR 3G GLOBAL

Digi XBee Cellular 3G Global embedded modems provide OEMs with a simple way to integrate HSPA/GSM cellular connectivity into their devices.

Digi XBee Cellular 3G Global embedded modems provide a simple path to 3G (HSPA/GSM) with 2G fallback connectivity for OEMs with worldwide deployments. This modem is FCC/IC, PTCRB and AT&T certified which completely eliminates the cost, complexity, and risk involved in the certification process.

The modem is programmable, with support for custom MicroPython applications running directly onboard, allowing developers to add their own unique features to their devices

and eliminating the need for an external microcontroller in certain use-cases. It includes the full suite of standard Digi XBee API frames and AT commands, so existing customers can simply drop this modem into their existing designs to instantly achieve 3G cellular integration, without the pain and hassle of doing a complete re-design.

BENEFITS

- FCC/IC, PTCRB, and AT&T certified – eliminates certification costs and risks
- Transparent and API modes simplify software integration
- Low-power modes for battery powered applications
- Integrated MicroPython programmability enables custom scripting directly on the modem
- Enhanced with Digi TrustFence™ security framework
- Manage and configure with XCTU and Digi Remote Manager®
- Available with Digi provided SIM cards and data plans
