4K DisplayPort to DisplayPort Splitter 1x DP in, 2x DP out, 4K*2K30Hz

With the help of the DIGITUS DS-45404, you can distribute a display port signal to two output devices, such as external monitors, televisions, projectors, etc. Thanks to the MST (Multi-Stream-Transport) support, you have the possibility of duplicating your desktop, or alternatively, displaying completely separate content on each monitor. This increases productivity, since multi-tasking applications are noticeably simplified. The splitter thus offers an ideal solution, both for commercial applications, such as video wall presentations, graphics applications or product presentations (office / business premises, exhibition stands etc.), as well as in the private domain. Regardless of whether it is photos, presentations, films/videos or games, with the Digitus DisplayPort splitter, you will experience ultra sharp 4K UHD resolution, and this can be achieved on up to two DisplayPort monitors.
