## Description

The 74LVC1G3157 is a single-pole, double-throw analog switch. The device is designed for operation with a power supply range of 1.65 V to 5.5 V . The bidirectional switch can handle signal amplitudes between Vcc and Ground. The OFF state impedance of the switch is typically $50 \mathrm{M} \Omega$ while the ON state is typically $6 \Omega$.

## Pin Assignments

X2-DFN1410-6

Packages not to scale

## Features

- Wide Supply Voltage Range from 1.65 to 5.5 V
- Control Pin Includes Hysteresis Allowing for Slower Input Rise and Fall Times
- CMOS Low Power Consumption
- Very Low ON-State Resistance
- $7.5 \Omega$ (typical) at $\mathrm{V}_{\mathrm{Cc}}=2.7 \mathrm{~V}$
- $6.5 \Omega$ (typical) at $\mathrm{V}_{\mathrm{cc}}=3.3 \mathrm{~V}$
- $6 \Omega$ (typical) at $\mathrm{V}_{\mathrm{CC}}=4.5 \mathrm{~V}$
- Break Before Make Switching
- Control Input accepts up to 5.5 V Regardless of Vcc .
- Direct Interface with TTL Levels when $\mathrm{V}_{\mathrm{CC}}=3.3 \mathrm{~V}$
- ESD Protection Tested per JESD 22
- Exceeds 2,000-V Human Body Model (A114)
- Exceeds 1,000-V Charged Device Model (C101)
- Latch-Up Exceeds 100 mA per JESD 78, Class I
- Range of Package Options
- Totally Lead-Free \& Fully RoHS Compliant (Notes 1 \& 2)
- Halogen and Antimony Free. "Green" Device (Note 3)
- For automotive applications requiring specific change control (i.e. parts qualified to AEC-Q100/101/200, PPAP capable, and manufactured in IATF 16949 certified facilities), please contact us or your local Diodes representative. https://www.diodes.com/quality/product-definitions/

## Applications

- Multiplexing of Analog Signals
- Multiplexing of Digital Signals
- Wide array of products such as:
- Tablets, E-readers, Wearables
- Cell Phones, Personal Navigation / GPS
- MP3 Players, Cameras, Video Recorders
- Computer Peripherals, Hard Drives, CD/DVD ROMs
- TV, DVD, DVR, Set Top Boxes
- PCs, Networking, Notebooks, Netbooks, PDAs

|  |  | $\mathrm{I}_{\mathrm{A}}=-32 \mathrm{~mA}, 0 \leq \mathrm{V}_{\mathrm{BN}} \leq \mathrm{V}_{\mathrm{CC}}$ | 5.0 | - | 1.5 | 4 | - | 8 |  |

Note: $\quad$ 9. Switch resistance test is measured per Figure 3.
10. $\Delta \mathrm{R}_{\mathrm{ON}}$ is measured at identical $\mathrm{V}_{\mathrm{CC}}$, temperature and voltage levels.
11. Flatness is defined as the difference between the maximum and minimum of ON resistance measured at identical $\mathrm{V}_{\mathrm{cc}}$ and temperature.

Notes:
12. Due to the symmetry of the part, the direction of the propagation delay applies to either direction $A$ to $B_{n}$ or $B_{n}$ to $A$. Propagation time is the calculated RC time constant of the typical ON resistance of the switch and the specified load capacitance when capacitance when driven by an ideal voltage source.
13. The Switch signal enable and disables time are the same for Bn and A if they are reversed at input and output.

16. Inputs are measured separately one transition per measurement.
17. $t_{P L Z}$ and $t_{P H Z}$ are the same as $t_{\text {dis. }}$
18. $t_{\text {PZL }}$ and $t_{\text {PZH }}$ are the same as $t_{E N}$.
19. $\mathrm{t}_{\mathrm{PLH}}$ and $\mathrm{t}_{\text {PHL }}$ are the same as $\mathrm{t}_{\mathrm{PD}}$

## Mechanical Data

 SOT363- Moisture Sensitivity: Level 1 per J-STD-020
- Terminals: Finish - Mate Tin Plated Leads, Solderable per MIL-STD-202, Method 208 e3)
- Weight: 0.0064 grams (Approximate)

## X2-DFN1410-6

- Moisture Sensitivity: Level 1 per J-STD-020
- Terminals: Finish - NiPdAu Nickel Palladium Gold, Solderable per MIL-STD-202, Method 208 e4)
- Weight: 0.002 grams (Approximate)

## IMPORTANT NOTICE

1. 2. The Information contained herein is for informational purpose only and is provided only to illustrate the operation of Diodes products described herein and application examples. Diodes does not assume any liability arising out of the application or use of this document or any product described herein. This document is intended for skilled and technically trained engineering customers and users who design with Diodes products. Diodes products may be used to facilitate safety-related applications; however, in all instances customers and users are responsible for (a) selecting the appropriate Diodes products for their applications, (b) evaluating the suitability of the Diodes products for their intended applications, (c) ensuring their applications, which incorporate Diodes products, comply the applicable legal and regulatory requirements as well as safety and functional-safety related standards, and (d) ensuring they design with appropriate safeguards (including testing, validation, quality control techniques, redundancy, malfunction prevention, and appropriate treatment for aging degradation) to minimize the risks associated with their applications.
3. Diodes assumes no liability for any application-related information, support, assistance or feedback that may be provided by Diodes from time to time. Any customer or user of this document or products described herein will assume all risks and liabilities associated with such use, and will hold Diodes and all companies whose products are represented herein or on Diodes' websites, harmless against all damages and liabilities.
4. Products described herein may be covered by one or more United States, international or foreign patents and pending patent applications. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks and trademark applications. Diodes does not convey any license under any of its intellectual property rights or the rights of any third parties (including third parties whose products and services may be described in this document or on Diodes' website) under this document.
5. Diodes products are provided subject to Diodes' Standard Terms and Conditions of Sale (https://www.diodes.com/about/company/terms-and-conditions/terms-and-conditions-of-sales/) or other applicable terms. This document does not alter or expand the applicable warranties provided by Diodes. Diodes does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel.
6. Diodes products and technology may not be used for or incorporated into any products or systems whose manufacture, use or sale is prohibited under any applicable laws and regulations. Should customers or users use Diodes products in contravention of any applicable laws or regulations, or for any unintended or unauthorized application, customers and users will (a) be solely responsible for any damages, losses or penalties arising in connection therewith or as a result thereof, and (b) indemnify and hold Diodes and its representatives and agents harmless against any and all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim relating to any noncompliance with the applicable laws and regulations, as well as any unintended or unauthorized application.
7. While efforts have been made to ensure the information contained in this document is accurate, complete and current, it may contain technical inaccuracies, omissions and typographical errors. Diodes does not warrant that information contained in this document is error-free and Diodes is under no obligation to update or otherwise correct this information. Notwithstanding the foregoing, Diodes reserves the right to make modifications, enhancements, improvements, corrections or other changes without further notice to this document and any product described herein. This document is written in English but may be translated into multiple languages for reference. Only the English version of this document is the final and determinative format released by Diodes.
8. Any unauthorized copying, modification, distribution, transmission, display or other use of this document (or any portion hereof) is prohibited. Diodes assumes no responsibility for any losses incurred by the customers or users or any third parties arising from any such unauthorized use.
