## Maximum Ratings

(Above which useful life may be impaired. For user guidelines, not tested.)

## Note:

Stresses greater than those listed under MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

## ESD Ratings

| Symbol | Parameters | Conditions | Value | Units |
| :--- | :--- | :--- | :---: | :---: |
| $\mathrm{V}_{(\text {ESD })}$ | Electrostatic discharge | Human-body model (HBM), per ANSI/ESDA/JEDEC JS- <br> $001^{(1)}$ | Charged-device model (CDM), per JEDEC specification <br> JESD22-C101 | 2000 |

## Note:

1. JEDEC document JEP155 states that 500-V HBM allow safe manufacturing with a standard ESD control process.
2. JEDEC document JEP157 states that $250-\mathrm{V}$ HBM allow safe manufacturing with a standard ESD control process.
