

SUPER E-LINE

TABLE 3: HIGH CURRENT SUPER E-LINE TRANSISTORS (P_D=1.2 Watts)

This range of devices is rated at 1.2 Watts and offers extremely low saturation voltages coupled with high continuous and pulsed current capability. Typical application areas to benefit from these products are emergency lighting, lap top computer power supplies, automotive circuits and flash gun converters.

* Development Sample Data

TABLE 4: HIGH PERFORMANCE DARLINGTON TRANSISTORS (P_D= upto 1 Watt)

The devices shown in this table are designed for applications requiring very high current gain at current levels up to 1A and power dissipation upto 1 Watt. They are ideal for lamp, relay and solenoid drivers in wide ranging applications from dot matrix printers to harsh environments such as automotive circuits.
