**Surge arrester****2-Electrode arrester****DG2R470L**

- 1) Sampling size in accordance to AQL0.65 II
- 2) Tests according to ITU-T Rec. K. 12 and IEC61643-311 or GB/T 9043

**Dimensions****Cautions and warnings**

- Surge arresters must not be operated directly in power supply networks, whose maximum operating voltage exceeds the minimum spark-over voltage of the surge arresters.
- Surge arresters may become hot in case of longer periods of current stress (danger of burning).
- If the contacts of the surge arrester are defective, current stress can lead to the formation of sparks and Ic
- Surge arresters may be used only within their specified values. In case of overload, the head contacts may fail or the component may be destroyed.
- Damaged surge arresters must not be re-used.
