E-Series CIRCUIT BREAKER

The E-Series hydraulic-magnetic circuit breaker is ideally suited for higher current and voltage applications. It is UL listed and CSA certified for branch circuit protection, which does not require a fuse back up. It is also UL recognized and CSA certified as a supplementary protector and as a manual motor controller.

Its physical features include front and back mounting, screw and stud terminals and heavy duty box wire connectors for solid wire or a pressure plate connector for standard wire. The E-series is available with handle actuators and can be configured as .1-125 amps, up to 600VAC or 125VDC, with choice of time delays, actuator colors and 1 to 6 poles configuration. Additionally, a Power Selector device is also available.

Product Highlights:

- · UL listed and CSA certified
- Certified for circuit branch protection
- Recognized as a supplementary protector and as a manual motor controller
- Optional power selector device

Typical Applications:

- High Voltage/High Current Applications
- Renewable Energy
- Military
- Industrial Controls
- Generators

Electrical

Auxiliary Switch Rating

Maximum Voltage 600VAC 50/60 Hz, 125VDC (See

Table A)

Standard current coils: 0.100, **Current Ratings** 0.250, 0.500, 1.00, 2.50, 5.00,

7.50, 10.0, 15.0, 20.0, 25.0, 30.0, 50.0, 60.0, 70.0 & 100 Amp. SPDT; 10.1A 250VAC, 1.0A

65VDC; 0.5A 80VDC, 0.1A 125VAC

(with gold contacts).

Insulation Resistance Minimum of 100 Megohms at 500

VDC.

UL, CSA: 2200 V 50/60 Hz for one Dielectric Strenath minute between all electrically

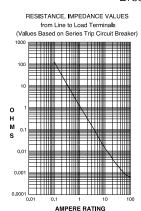

isolated terminals. E-Series Circuit Breakers comply with the 8mm spacing and 3750V 50/60 Hz dielectric requirements from hazardous voltage to operator accessible surfaces, between adjacent poles and from main circuits to auxiliary circuits per Publications EN 60950 and VDE

0805.

Values from Line to Load Terminal Resistance, Impedance

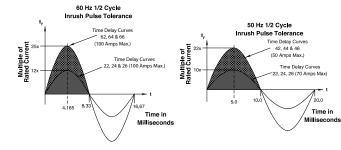

- based on Series Trip Circuit

Breaker.

| CURRENT (AMPS) | TOLERANCE (%) |
|-------------------|------------------|
| 0.10 - 5.0 | ± 15 |
| 5.1 - 20.0 | ± 25 |
| 20.1 - 50.0 | ± 35 |

Pulse Tolerance Curves

Mechanical

Endurance 10,000 ON-OFF operations @ 6

per minute; with rated Current and

Voltage.

Trip Free All E-Series Circuit Breakers will

trip on overload, even when Handle is forcibly held in the ON

position.

Trip Indication The operating Handle moves

> positively to the OFF position when an overload causes the

breaker to trip.

Physical

Number of Poles 1 - 6

Mounting A 3" minimum spacing must be

provided between the circuit breaker arc venting area on back connected E-Series circuit breakers and grounded obstructions. E-Series circuit breakers must be mounted on a

vertical surface.

Front connected E-Series circuit Connectors, Box Type

breakers are supplied with box type pressure connectors that accept copper or aluminum conductors as follows: 1/0-14 Copper, 1/0-12 Aluminum. Series and Switch Only, (with or

Internal Circuit Configuration without auxiliary switch). Shunt

with current coils.

Weight Approximately 252 grams/pole

(Approximately 9 ounces/pole) Housing-Black; Actuator - See

Ordering Scheme.

12 AGENCY APPROVAL

UL 1077 / UL508 Recognized & CSA Accepted
UL 1077 Recognized, CSA Accepted, & VDE Certified

- Auxiliary Switch available on Switch Only and Series Trip units. On multi-pole units, only one auxiliary switch is normally supplied mounted in the extreme right pole. Back mounted
- units require special mounting provisions when auxiliary switch is specified. VDE approval on Auxiliary Switch Codes 0,2,3 & 4 only. Voltage Trip Coils are not rated for continuous duty. Available only with Frequency & Delay Codes 10 & 20. Series Trip construction with a voltage coil s VDE approved only if tied to a protected pole.
 Frequency & Delay Codes 92,94 & 96 are not VDE Certified.
 Current Coil Ratings 0.100 - 100 ams are VDE Certified.
 125 A rating (Code 912) available as a Switch Only (Circuit Code A), rated 125 VDC (Code B).

- An Anti-Flash Over Barrier is supplied between poles on multi-pole units with 10-32 (Terminal Code 1). 1/4-20 (Code 2), M5 (Code A), and M6 (Code B) terminals per UL requirement. Box Wire Connector will accept #14 through 0 AWG. copper wire or #12 through 0 AWG. 10
- Box Wire Connector with Pressure Plate for stranded wire, consult factory for details.
- Terminal Codes A,B,D,E,G & H are not VDE Certified. VDE approvals require Dual (I-O, ON-OFF) or I-O markings on all handles 13
 - Back Mounted breakers can also be front mounted by utilizing the proper front panel mounting inserts normally supplied. However, terminal connections must be made prior to mounting. Application ratings B, D, T, & W are available with VDE.

 415, 480 & 600 VAC ratings require 3 or 4 pole break 3Ø and 2 pole break 1Ø.

Notes:

Standard multi-pole units identical poles except when specifying auxiliary switch - (see Note 4). For mixed ratings, consult factory. VDE Certification on 1-5 poles only.

Series Trip construction available with either front or back connected terminals. Series Trip construction with a voltage coil is not available as a single pole unit and must be

tied to a protected pole. On multi-pole units, only one auxiliary switch is normally supplied mounted in the extreme right pole per Figure A. Back mounted units require special mounting provisions when auxiliary switch is specified. VDE Certification on auxiliary switch codes 0, 2, 3 & 4 only. 4

5 Voltage Trip Coils are not rated for continuous duty. Available only with Frequency & Delay Codes 10 & 20.

6 Frequency & Delay Codes 92, 94 & 96 are not VDE Certified.

Current Ratings under 0.100 amps are not VDE Certified .

An Anti-Flash Over Barrier is supplied between poles on multi-pole units with 10-32 Stud (Terminal Code 1) or 1/4-20 Stud (Code 2) terminals per UL requirement.

Box Wire Connector will accept #14 through 0 AWG. copper wire or #12 through 0 AWG 9 aluminum wire.

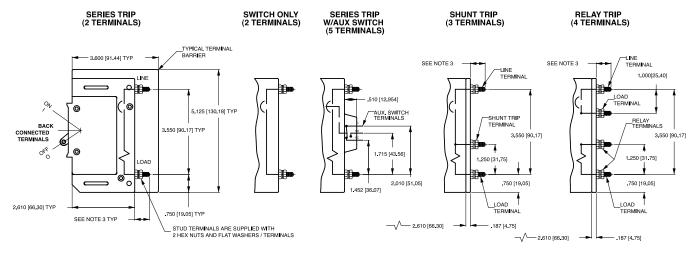

auminum wire.

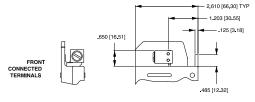

Box Wire Connector with Pressure Plate for stranded wire, consult factory for details.

Back Mounted breakers can also be front mounted by utilizing the proper front panel mounting inserts normally supplied. However, terminal connections must be made prior to mounting. VDE Certification requires dual (I-O , ON-OFF) markings on all handles.

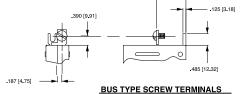

Not available with VDE Certification.

NOTES
Delay Curves 10,20,30: Breakers to hold 100% and must trip at 150% of rated current and greater within the time limit shown in these curves.
Delay Curves 12,14,16,22,24,26,62,64,66,72,74,76: Breakers to hold 100% and must trip at 125% of rated current and greater within the time limit shown in these curves.
Delay Curves 32,34,36,92,94,96: Breakers to hold 100% and must trip at 135% of rated current and greater within the time limit shown in these curves.
All curves: Data shown represents breaker response at ambient temperature of 77°F (25°C) with no preloading: Breakers are mounted in standard wall-mount position.
The minimum inrush pulse tolerance handling capacity on the above standard delays is 16 times rated current &20 times rated current for high inrush delays based on a 60Hz 1/2 cycle, 8.33 ms pulse.

About Carling

Founded in 1920, Carling Technologies is a leading manufacturer of electrical and electronic switches and assemblies, circuit breakers, electronic controls, power distribution units, and multiplexed power distribution systems. With four ISO registered manufacturing facilities and technical sales offices worldwide, Carling Technologies Sales, Service and Engineering teams do much more than manufacture electrical components, they engineer powerful solutions! To learn more about Carling please visit www.carlingtech.com/company-profile.
