

## Switches and Indicators

## Index

## Series 99

## General Notes

The series 99 contains indicators and illuminated pushbuttons with maintained and momentary action with one or two contacts which may be either normally open or normally closed or a combination of the two. The illuminated pushbuttons are equipped with the low-level switching system.
The series 99 PCB keylock switch with a spacing of 19.05 mm completes the existing range of indicators and illuminated pushbuttons. The PCB keylock switch is available with two and three positions, with maintained action, and with either one or two normally open contacts as well as with one normally open and one normally closed one.

## Mounting

The illuminated pushbuttons of series 99 can be soldered to a printed circuit board. The contact layout conforms to the module of 2.54 mm (1/10"). A centering pin ensures dimensionally exact mounting in rows or blocks.
With an M 1.2 screw the pushbuttons can also be fixed to a printed circuit board. (This screw must be ordered separately.) The pushbuttons can be joined together easily with a coupling piece to form rows or blocks.
The layout of the PCB keylock switch conforms to the module of 2.54 mm (1/10").
Two centering pins ensure a dimensionally exact mounting. The contact layout corresponds to that of series 99 switches.

## Rules for cleaning soldered PC boards

In many cases the boards are cleaned following mechanical soldering. In this case it is essential to prevent the cleaning fluid containing dirt, grease and flux from entering the switch.

## Lenses

The lens consists of a bezel, a marking plate and a transparent lens plate, which may be either flat or concave.

## Marking

For engraving, hot stamping and film inserts, see under "Markings" on page 546 .

## Illumination

Illumination of the different coloured lenses is by lamps bipin T 1 longlife (6-36 V) or LED bipin T 1 .

## Position indication

When a switch with maintained action is actuated, the lens remains in the depressed position mechanically. The state of the switch is apparent at all times from the position of the lens.

## Keylock switch

standard lock (Index D)
10 different locks wit standard nos. 311-320. If the lock number is not specified, we supply no. 311. Additional 125 locks, no. 321-445, are available on request. Master keys for locks no. 311-445 may be
ordered by quoting no. 31-989.300.
Two keys are supplied with each keylock switch.
Spare keys for standard DOM locks may be ordered by quoting no. 31-989 (please state the lock number).

## Number structure

## Low Level switching element

## switching system

This low-level switching system was designed for switching low powers in electronic circuits. The switching system assures reliable switching of loads.
Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.
Special features are the long life, extremely short rebound time and stable contact resistance.
Contact combinations: 1 normally open contact, 2 normally open contacts, 1 normally closed/1 normally open contact, 1 normally closed contact

## material

material of contacts
gold-plated
switching element
polycarbonate PC

## mechanical characteristics

## ambient air temperature

$-25^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely
(as per DIN IEC 68-)
mechanical life
illuminated pushbuttons 5 million operations
PCB keylock switches 50000 operations
rebound time
typ. <= $100 \mu \mathrm{~s}$
resistance to shock
(single impacts, semi-sinusoidal)
15 g for 11 ms as per IEC 68-2-27
storage temperature
$-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
(as per DIN IEC 68-)

## electrical characteristics

## electric strength

2500 VAC, 50 Hz , 1 min. between all terminals and earth, as per IC 512-2-11.

## insulation resistance

$10^{12} \Omega$ between contacts at 100 VDC, as per IEC $512-2$, test 3 a
volume resistance
starting value (initial) <= $50 \mathrm{~m} \Omega$ as per IEC $512-2$, test 2 b

## actuator

## material

lens bezel
polycarbonate PC, heat-resistant

## lens plate

polymethylmethacrylate PMMA, heat-resistant

## mechanical characteristics

## actuating force

pushbuttons with tactile point: $\quad 2.0 \pm 0.3 \mathrm{~N}$
pushbuttons without tactile point: $1.3 \pm 0.4 \mathrm{~N}$

## actuating torque

4.7-6.0 Ncm (measured at the key)

## ambient air temperature

$-25^{\circ} \mathrm{C}$ to $+55^{\circ} \mathrm{C}$
for indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely
(as per DIN IEC 68-)
angle of rotation for print keylock switch
keylock switch with 2 positions: $90^{\circ}$
keylock switch with 3 positions: $2 \times 90^{\circ}$

## degree of protection

front as per IEC 529:
IP 40, PCB keylock switch, illuminated pushbutton
mechanical life
illuminated pushbuttons 5 million operations
PCB keylock switches 50000 operations
storage temperature
$-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$
(as per DIN IEC 68-)

## travel

lead distance NC contact: $1.1 \pm 0.2 \mathrm{~mm}$; lead distance NO contact: $2.1 \pm 0.2 \mathrm{~mm}$; total distance: $3.6 \pm 0.2 \mathrm{~mm}$

## electrical characteristics

electrostatic breakdown value
10 kV as per IEC 65 (Co) 28.

## technical drawing

1 indicator single, illuminated/-pushbutton single
page 531, 533

2 indicator double, illuminated-/pushbutton double page 531, 534

3 indicator triple, illuminated-/pushbutton triple page 532, 534

4 keylock switch 2 positions, keylock switch 3 positions page 535, 536

## mounting dimension

1 indicator single, indicator double, indicator triple, illuminated/-pushbutton single, illuminated-/pushbutton double, illuminated-/pushbutton triple
page 531, 532, 533, 534

2 keylock switch 2 positions, keylock switch 3 positions page 535, 536

## components layouts

1 indicator single, illuminated/-pushbutton single, keylock switch 2 positions, keylock switch 3 positions page $531,533,535,536$

2 indicator double, illuminated-/pushbutton double page 531, 534

3 indicator triple, illuminated-/pushbutton triple page 532, 534

## 1. Engraving

## Typefaces

In addition to the most commonly used world languages (see DIN 1451) with close spacing, the following typefaces are available: Scandinavian, Slavian, Greek, Russian.

## Coloured filling of engraving

Unless requested otherwise by the customer, the lettering on white and black marking plates will be in black and white.

## Symbols

A list of the symbols available can be supplied on request.

## 2. Hot stamping

For large batches it is worth while to have the lettering produced by hot stamping.

## Typefaces

For letters and figures, typefaces with 2.5 $\mathrm{mm}, 3 \mathrm{~mm}$ and 4 mm are available.

## Symbols

A list of the symbols available can be supplied on request.

## 3. Film inserts

Instead of being engraved, the lenses can have a film inserted, possiblly backed by a colour foil, placed between the lens plate and the marking plate.

## Film dimensions

for single button: $16 \times 16 \mathrm{~mm}$ for double button: $16 \times 34,7 \mathrm{~mm}$ for triple button: $16 \times 53,8 \mathrm{~mm}$

Film thickness $\mathbf{0 , 2} \mathbf{~ m m}$
