- 2A
- 4A

### **Notable changes to the Apparatus section of this catalog**

- Surge Protection Devices (previously section 4A) has been removed. For information on surge protection, please visit Eaton's Crouse-Hinds MTL Instruments at [www.mtl-inst.com](http://www.mtl-inst.com)
- New Section 4A for transformers

# A Apparatus

## Table of Contents

---

Section A of the Eaton's Crouse-Hinds catalog contains the following product groupings:

### Section 1A

#### Panelboards

(for use in hazardous and non-hazardous areas)  
For central control and protection of a large number of feeder or branch circuits and for housing of circuit breakers.

D2L	XLPB
D2PB	EXD
D2D	GUSC
EPL	D2Z
LP	N2PB
SPB	NLP

### Section 2A

#### Switches

(for use in hazardous and non-hazardous areas)  
Switches and enclosures for disconnecting motor, lighting and other circuits.

EDS, EDSC	FSPC	NST
EFD, EFDC	GUSC	NRS
FLS	WST	6810 Series
EID	GHG	7810 Series
	EBM	N2RS

### Section 3A

#### Instrument Housings

(for use in hazardous areas)  
Housings for a variety of types and makes of meters and instruments, thermostats, heaters and clocks.

HRC	ETW
TCH	ETC
EXH	ETR
XC	D2TW

### Section 4A

#### Transformers

Provide safe and efficient electric power distribution in the most extreme harsh and hazardous locations.

# 1A Circuit Breaker Panelboards

## General Information

### Applications:

Circuit breaker panelboards are used in hazardous and non-hazardous areas (as shown in the individual listings):

- To provide, in one compact unit, a centrally controlled switching system for a large number of feeder or branch circuits
- For controlling lighting, heating, appliance, heat tracing, motor and similar circuits
- In locations where rough usage, moisture, dust, dirt and corrosion are a problem
- To house thermal-magnetic circuit breakers that provide disconnect means, short circuit protection and thermal time delay overload protection

### Features:

Panelboards:

- All main and branch circuit wire lugs are solderless and readily accessible for fast, easy installation
- Are factory wired from main terminal blocks or main bus to line side of branch circuit breakers
- With circuit breakers in factory sealed housings (LP1, EXD and EPL), are also factory wired from the load side of branch circuit breakers to readily accessible terminal blocks
- With circuit breakers grouped in one enclosure (LP2, D2D, D2L, D2Z and D2PB factory sealed), branch circuit wires are attached directly to circuit breaker load terminals

Circuit breakers (thermal magnetic):

- Are trip-free of the handles and cannot be held closed under short circuit or overload conditions
- Four breaker types are used in panelboards manufactured by Eaton's Crouse-Hinds. They are as follows:
- Quicklag® – used in LP, D2PB, EPL and D2L panelboards; 10,000 ampere symmetrical interrupting capacity

### Ratings

Single and two-pole,  
120 / 240 VAC  
Two and three-pole,  
240 VAC

### Fed. Spec.

W-C-375a, Class 1a  
W-C-375a, Class 1b

- EHD/FDB frame – used in EXD and D2D panelboards; 14,000 ampere symmetrical interrupting capacity - 480 VAC

### Ratings

Single-pole, 277 VAC  
or 125 VDC  
Two and three-pole  
480 VAC or 250 VDC

### Fed. Spec.

W-C-375a, Class 2a  
N/A

### Wiring Systems:

- See pages 628 and 629 for wiring diagrams. These are the standard systems used for single and three-phase panelboards having single, two and three-pole circuit breakers
- Standard panelboards are listed with all circuit breakers having the same number of poles and wired for one of these systems
- To meet the requirements of a specific installation, panelboards can be assembled with a combination of single, two and three-pole breakers. To accomplish this, the three individual wiring systems must have the same main service as, for example, 3-phase, 4-wire, solid neutral.

Panelboard Type	Applicable Wiring Systems
D2PB	3, 4, 5, 8, 11, 12

- Diagrams show only four, six or eight circuits; are intended to show only the phase connections of each circuit breaker and do not necessarily show their physical location in a panelboard.

Panelboards are available with the number of circuits indicated in the listings.

### Standard Materials, Finishes, Options and Compliances:

- See individual listing pages

# 1A Exactra™ Panelboards

## Lighting and Heat Tracing LP1 Series LP2 Series (Div. 2)

Cl. I, Div. 1 & 2, Groups B†, C, D  
Cl. II, Div. 1, Groups E†, F, G  
Cl. II, Div. 2, Groups F, G  
Cl. III  
NEMA 3, 4\*, 4X§, 7B†CD, 9EFG, 12

CSA Enc. 3, 4\*, 5  
Explosionproof  
Dust-Ignitionproof  
Factory Sealed‡  
Wet Locations  
Watertight

Exactra™ Factory-Sealed Lighting Panelboards provide flexibility and labor savings when installed, and for future changes in the field. Panels are prewired to maximum circuit capacity and ratings.

### Applications:

Exactra™ Factory-Sealed Lighting Panelboards are ideal:

- In areas made hazardous by the presence of flammable gases and vapors, and combustible dusts
- In areas subject to weather, dampness, and corrosion
- For branch power distribution and circuit protection for motors, valves, pumps, lighting, heat tracing, receptacles, etc.
- For indoor and outdoor applications in petroleum refineries, chemical and petrochemical plants, and other process industry facilities where similar hazards exist
- In areas where flammable vapors or gases or highly combustible dusts may be present due to accidental or abnormal conditions
- To accommodate up to 35 amp branch loads

### Features and Benefits:

- Factory sealed, no external seals required for branch circuits. External seals are required for Class I, Div. 1 applications
- Fully wired for circuit breaker housing to pre-numbered terminals in wiring compartment
- External flange design allows wide unobstructed cover opening for easy wiring access
- External circuit breaker handles can be padlocked "ON" or "OFF"
- Furnished with two 3" and ten 1½" conduit openings
- Breather and drains available for each enclosure
- Available with or without main circuit breaker up to 100 amps
- Isolated neutral and ground bar provided
- Available with up to 6 GFI and/or EPD branch breakers per panel. GFI and EPD branch breakers available within the same panel
- Available with ambient compensated breakers throughout panelboard
- Stainless steel hinges allow the cover to swing wide open or be removed
- Stainless steel hex head bolts captive design prevents lost bolts
- Cast copper-free (less than 0.4%) aluminum construction for excellent corrosion resistance
- Neoprene cover gasket meets NEMA 4 / CSA Enc. 4 / IP65 requirements, provides watertight seal for superior water and corrosion protection
- Copper bus bar system

### Certifications and Compliances:

#### LP1 panelboards

- Class I, Groups B, C, D
- Class I, Zone 1 & 2, IIB + H<sub>2</sub>
- Class II, Groups E, F, G
- Class III
- NEMA 3, 4\*, 4X§, 7B†CD, 9E†FG, 12
- CSA Enc. 3, 4\*, 5
- IP65\* Enclosure
- UL Classified (Standard 1203)
- cUL Classified (Certified by UL to CSA C22.2 No. 30)

#### LP2 Panelboards

- Class I, Division 2, Groups B†, C, D
- Class I, Zone 1 & 2, IIB + H<sub>2</sub>
- Class II, Division 2, Groups F, G
- Class III
- NEMA 3, 4\*, 4X§, 7BCD (Div 2), 9EFG, 12
- CSA Enc. 3, 4\*, 5
- IP65\* Enclosure
- UL Classified (Standard 1203)
- cUL Classified (Certified by UL to CSA C22.2 No. 30)

### Standard Materials:

- Body and cover – cast copper-free aluminum
- Gasket – neoprene
- Operating handles – extruded aluminum (copper-free)
- Operating shafts, cover bolts, washers, GFI/EPD plungers and hinges – stainless steel
- Circuit breaker operator forks –
  - for 1 pole standard breakers - die-cast aluminum (copper-free)
  - for 1 and 2 pole GFI / EPD breakers - die-cast aluminum (copper-free)
  - for 2 and 3 pole standard breakers - stainless steel
- Lifting bracket – cold rolled steel
- Bus bar – copper

### Standard Finishes:

- Aluminum – natural
- Stainless steel – natural
- Cold rolled steel – electrogalvanized

\* NEMA 4/CSA Enc. 4/IP65 hoesitight with breather and drain openings plugged.

† With suffix -GB.

## Options:

Description	Suffix
• Alternate feed: incoming power into terminal enclosure from bottom	<b>A</b>
• Group B and E suitability (10A not avail.)	<b>GB</b>
• Lamicaid nameplate with customer-specified panel identification	<b>LID</b>
• Stainless steel nameplate with customer-specified panel identification	<b>SID</b>
• 125W@120 VAC, 250W@240 VAC internal space heater in circuit breaker enclosure	<b>R22</b>
• External epoxy powder coat finish	<b>S752</b>
• Internal and external epoxy powder coat finish	<b>S753</b>
• One breather and two drains per enclosure	<b>S756V</b>
• All conduit entries plugged with PLG recessed head plugs	<b>S822</b>
• All conduit entries plugged with square headed plugs	<b>S872</b>
• To order an inverted panelboard with all conduit openings for power and branch circuits on the bottom (inverted)	<b>I</b>

## Breaker Options:

Description	Suffix
• EPD branch breaker (up to 6 EPD and/or GFI per panel)	<b>E</b>
• GFI branch breaker (up to 6 EPD and/or GFI per panel)	<b>G</b>
• Ambient compensated (50°C) breakers throughout panelboard	<b>V</b>
• HID branch breaker for lighting loads	<b>H</b>

## Lighting Panelboard

### Accessories:

Description	Cat. #
• Extra circuit breaker operator assemblies 1-pole (qty. 3)	<b>LP K1</b>
• Replacement cover plugs for unused circuit breaker positions (qty. 6)	<b>LP K2</b>
• Extra circuit breaker operator assemblies for 1 pole and 2 pole GFI/EPD breakers (qty. 3)	<b>LP K3</b>
• GFI/EPD "push to test" plungers (qty. 6)	<b>LP K4</b>
• GFI/EPD entry plugs (qty. 6)	<b>LP K5</b>
• Replacement mounting feet (qty. 2)	<b>LP K6</b>
• Extra circuit breaker operator assemblies for 2 pole standard and GFI/EPD breakers	<b>LP K7</b>
• Extra circuit breaker operator assemblies for 3 pole breakers	<b>LP K8</b>

## Panel Capacity:

Panel Size	Max. No. of Branch Spaces			Main Breaker Max. Amp	Available w/GFI, EPD Branch Protection
	With Main Lug Only	With Main 2-pole	With Main 3-pole		
B	24	22	21	100	Yes
C	36	34	33	100	Yes

† Items are not available with main circuit breaker.  
■ Provided for main lug only; main breaker must be specified with amperage.

### Catalog Number Example:

Lighting Panelboards can be furnished with an assortment of breaker ratings and pole configurations. Assortments may be ordered by adding the number of poles and amp rating designations to the catalog number.

Example:

A three-phase, Class I, Div. 2, Groups C, D lighting panelboard with:

- 5 three-pole breakers – with 15 amp rating
- 6 single-pole breakers – with 20 amp GFI personnel protection
- Three-pole main breaker – with 100 amp rating
- Alternate feed option
- Breather and drain option

- Select basic panelboard catalog number from listing:
  - Determine phase (available with single-phase or three-phase wiring).
  - Determine a total even number of breaker spaces needed to complete your desired lighting panelboard.

Note:

3 breaker spaces = Three-pole breaker  
2 breaker spaces = Two-pole breaker  
2 breaker spaces = Two-pole GFI (or EPD) breaker  
1 breaker space = Single-pole breaker  
1 breaker space = Single-pole GFI (or EPD) breaker

- Review Panel Capacity table see page 631
- If GFI or EPD breakers are to be included insert "G", "E" or "EG" after base catalog number (e.g., LP2B316G).
- Maximum number of GFI and/or EPD breaker spaces is 6 per panel. (e.g. 6 single-pole or 3 two-pole). For more, consult factory.
- If ambient compensated breakers are required, insert "V" (e.g. LP2B318GV).

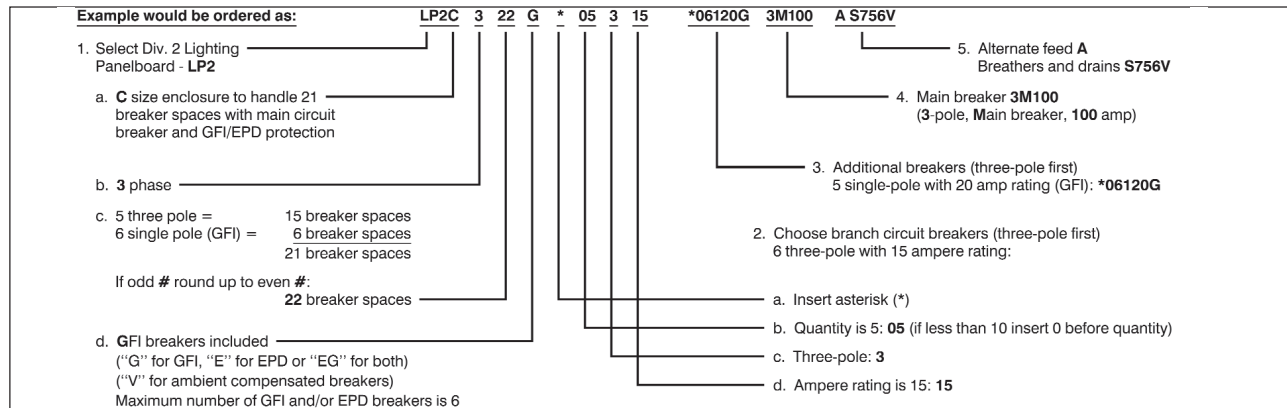

- Using three-pole branch breakers first, select circuit breakers for lighting panel board application:
  - Place an asterisk (\*) before each quantity of circuit breakers
  - First insert the quantity of breakers needed.
  - Second insert the quantity of poles (start with three-pole breakers).

Note: Single-phase panelboards can have single- or two-pole breakers. Three-phase panelboards can have single, two- or three-pole breakers.

- Third insert the ampere rating needed (start with highest ampere rating).
- Insert "G" for GFI or "E" for EPD type breakers, if desired.

- For additional circuit breakers repeat step 2. If there are more three-poles with different amp ratings, then continue with three-pole designations. Otherwise continue with two-pole circuit breakers, and then single-pole breakers.
- To add a main breaker, insert a space, the number of poles (2 or 3), an "M" to indicate main breaker, then indicate the amp rating (See "ratings" for trip ratings available). If no main breaker is specified, the panelboard will have main lugs. No suffix needed in catalog number for main lug only. For future spaces, to provide for operating mechanism without breaker write 00 (e.g. one three-pole mechanism without breaker: 01300).

Unused breaker positions without designations will be blanked and plugged. Complete panel will be provided for future breaker installations.

PowerPlus™ Series Panelboards provide both premium factory-sealed and value non-factory-sealed solutions for the protection and distribution of lighting, power, and heat tracing circuits. This panel solution is designed, engineered, and manufactured to be the industry's safest and most dependable panelboard for hazardous area locations.

### PowerPlus Premium and Value Solutions

- **Premium Solution:** PowerPlus factory-sealed panelboards are premium panelboards that provide maximum circuit flexibility with labor savings during installation, operation, and maintenance, and are accommodating for future changes in the field (order with either "S" or "A" in base part number). Panels are pre-wired to maximum circuit capacity, allowing for easy and safe replacement or installation of components in the field, while maintaining factory-sealed integrity.
- **Value Solution:** PowerPlus non-factory-sealed panelboards are value panelboards that offer maximum circuit flexibility and many of the same features and benefits of the PowerPlus premium line. This value solution is provided without terminal housing and factory wiring of circuits with "N" in base part number). The non-factory-sealed solution reduces initial panelboard material costs and requires field wiring to circuit breakers and external seals to be field-installed during installation.

### Applications:

EPL and D2L PowerPlus™ panelboards are used:

- In areas made hazardous by the continuous or abnormal presence of flammable gases, vapors, and combustible dusts
- In areas subject to weather, dampness, and corrosion
- For branch power distribution and circuit protection to motors, valves, pumps, lighting, heat tracing, receptacles, etc.
- For indoor and outdoor applications in petroleum refineries, chemical and petrochemical plants, and other process industry facilities where similar hazards exist
- To accommodate up to 100 amp branch loads (only 3 circuits), balance is up to 50 amps

### Certifications and Compliances:

#### EPL Series:

- NEC/CEC:
  - Class I, Division 1 & 2, Groups B†, C, D
  - Class I, Zone 1 & 2, IIB + H<sub>2</sub>†
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- NEMA/EEMAC: 3, 4, 4X‡, 7B†CD, 9EFG, 12
- CSA Enc. 3, 4, 5
- UL Standard: 67, 1203
- cUL (to CSA Standard C22.2 Nos. 29 & 30)
- IP65

#### D2L Series (Division 2):

- NEC/CEC:
  - Class I, Division 2, Groups B†, C, D
  - Class I, Zone 2, IIB + H<sub>2</sub>†
  - Class II, Division 2, Groups F, G
  - Class III
- NEMA/EEMAC: 3, 4, 4X‡, 7B†CD, 12
- CSA Enc. 3, 4, 5
- UL Standard: 67, 1203
- cUL (to CSA Standard C22.2 Nos. 29 & 30)
- IP65

### Standard Materials and Finishes:

- Circuit breaker enclosure body and cover – copper-free aluminum
- Terminal housing – type 316L stainless steel ("S") or copper-free aluminum ("A")
- Gasket – neoprene (cast aluminum enclosure); foam-in-place (stainless steel enclosure)
- Operating handles – copper-free aluminum
- Operating shafts and bushings, cover bolts, washers, hinges, breather/drain, retractile springs – stainless steel
- Circuit breaker operators – non-metallic
- Lifting bracket – electrogalvanized cold rolled steel
- Chassis – silver-plated copper
- Breather cap – Delrin® non-metallic material
- Neutral and ground bar – tin-plated aluminum

† Group B and IIB + H<sub>2</sub> is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers.

To order with brackets installed at factory, add suffix -GB. For field installable kit, order EPL-GB-KIT separately.

‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

Delrin® is a registered trademark of DuPont.

1A

This corrosion-resistant Type 4X breather and drain comes standard with all PowerPlus panelboards. This permits all models to maintain their Type 4 (Type 4X with suffix S752) rating while utilizing a breather/drain solution to drain internal condensation while protecting against ingress of rain and hose water.

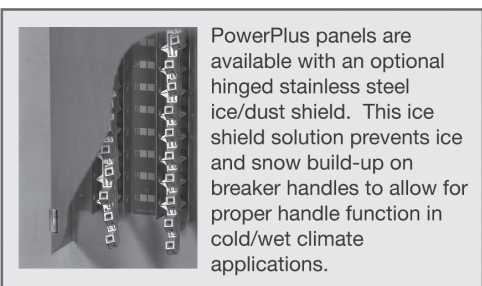

PowerPlus D2L and EPL panels are available with GFI and/or EPD breakers. This 21-position electrical test circuit allows for testing of GFI, EPD, or a combination of both in one panel. EPLDN panels are available with up to 42 GFI or EPD circuits with 225 amp main breaker.

PowerPlus panels come standard with a high-quality silver-plated copper buss system. This provides high-efficiency current flow between the main feed and branch breakers.

Each branch and main breaker handle is provided with lockout/tagout capability, which complies with OSHA lockout/tagout requirements for safety. This allows for locking in the ON or OFF position for standard maintenance checks.

Spring-loaded, quick-release, captive stainless steel cover bolts come standard. This design prevents damage to the flat joint flame path when opening and closing the cover while providing visual identification of bolt engagement.

PowerPlus panels are available with an optional hinged stainless steel ice/dust shield. This ice shield solution prevents ice and snow build-up on breaker handles to allow for proper handle function in cold/wet climate applications.

Stainless steel hinges are engineered to provide maximum stability and allow the cover to swing fully open. This avoids misalignment of cover to the body of the enclosure and prevents the cover from obstructing interior access.

**EPLCN or EXDCN\***

\*Note: D2D / EXD panels are not available with GFI or EPD circuit breakers or electrical test circuit as standard. Please contact factory if required.

† Group B and IIB + H2 is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EPL-GB-KIT separately.  
‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

# 1A PowerPlus™ Panelboards

## Lighting and Heat Tracing EPL Series (Div. 1 & 2) D2L Series (Div. 2)

EPL Series:  
Cl. I, Div. 1 & 2, Groups B†, C, D  
Cl. I, Zone 1 & 2, IIB + H<sub>2</sub>†  
Cl. II, Div. 1, Groups E, F, G  
Cl. II, Div. 2, Groups F, G  
Cl. III  
NEMA/EEMAC 3, 4, 4X‡, 7B†CD, 9EFG, 12

D2L Series:  
Cl. I, Div. 2, Groups B†, C, D  
Cl. I, Zone 2, IIB + H<sub>2</sub>†  
Cl. II, Div. 2, Groups F, G  
Cl. III  
NEMA/EEMAC: 3, 4, 4X‡, 7B†CD, 12

Integrated steel lifting eye is mounted on the top side of each PowerPlus panel. This provides a stable lifting position to ensure ease of mounting during the installation process.

PowerPlus cast enclosures are manufactured with an external flange design. This design allows for a wide unobstructed cover opening and provides a completely accessible interior for ease of maintenance and wiring.

Superior self-aligning breaker operators are designed for both field and factory installation. This patent-pending design guarantees proper handle alignment when closing the cover.\*

All panels with terminal housings are factory-sealed†† and fully wired for maximum available circuits. This allows PowerPlus models the ability to have additional breakers field-installed while maintaining their factory seal.

All terminal blocks come fully wired with each contact numbered for easy connecting of branch entries.

Heavy gauge 316L stainless steel terminal housings are supplied with three removable gland plates to be used with Myers® Hubs. This design allows for the flexibility of factory- or field-drilled openings for hubs.

Stainless steel terminal housings offer a high-integrity gasket, providing a watertight seal to meet enclosure Type 4/CSA ENC. 4/IP65 requirements. This provides superior protection of enclosed wiring against water and corrosion. Cast aluminum enclosures are also gasketed, providing a NEMA 4 watertight seal.

PowerPlus panelboards offer an industrial grade 316L stainless steel terminal housing as standard. This design offers an increased internal volume with a removable front cover for easy access during field installation and maintenance. A cast aluminum terminal housing is standard on EPL and EXD panels and available on D2L and D2D panels.

### D2LBS (Inverted) or D2DBS (Inverted)

\* Not available in Size F offering. Spring aligning forks are standard on Size F panels.  
††EPL\*A and EXD\*A conduit entries 2" or larger in Class I, Division 1 must be sealed within 18" of enclosure. All alternate feed entries to breaker housing (suffix A) must have an external seal within 18" of enclosure.

† Group B and IIB + H<sub>2</sub> is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EPL-GB-KIT separately.  
‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

### Electrical Ratings:

#### Branch Breakers (120/240VAC Quicklag® Bolt-On)

##### Trip Ratings:

- 1-, 2-, and 3-pole
- 10, 15, 20, 25, 30, 35, 40, 45, 50 amp (available in all breaker spaces in panel), 55, 60, 70, 80, 90, 100 amp (only 3 breaker spaces available for 55 to 100 amp branch breakers)
- GFI type, 1- and 2-pole (5mA sensitivity) 15, 20, 25, 30, 40 (50 amp - available 2-pole only)
- EPD type, 1- and 2-pole (30mA sensitivity) 15, 20, 25, 30, 40 (50 amp - available 2-pole only)
- HID type, 1- and 2-pole, 15, 20, 25, 30, 35, 40, 50, 60
- Available with GFI, EPD, or a combination of both in one panel with a 21-position electrical test circuit
- Ambient compensated breakers available to +50°C

##### Main Breaker Trip Ratings:

- 2- or 3-pole
- Size B: 10 to 100 amps
- Size C and D: 10 to 225 amps

##### Main Lugs:

- Size B, C, and F: 225 amps
- Size D: not available; main breaker only

### Options:

To add the following features to the panelboard, add a dash and then the suffix to the Cat. No. When multiple suffixes are needed, add them to the Cat. No. in alpha-numeric order.

Description	Suffix
Space heater.....	<b>R22</b>
Square head plugs on all conduit openings.....	<b>SP</b>
Epoxy powder coat finish, external.....	<b>S752</b>
Epoxy powder coat finish, internal and external.....	<b>S753</b>
Recess head plugs on all conduit openings.....	<b>RP</b>
Stainless steel breaker operator cover (ice shield).....	<b>HG</b>
Group B kit factory installed.....	<b>GB</b>
GFI breakers.....	<b>G</b>
EPD breakers.....	<b>E</b>
HID breakers.....	<b>H</b>
Ambient compensated breakers (50°C).....	<b>V</b>
Lamacoid Nameplate.....	<b>LID</b>

#### A standard panelboard has conduit openings for power and branch circuits on top.

To order a panelboard with main power feed from the bottom of breaker housing, and branch entries on top (alternate)..... **-A\*\***

To order an inverted panelboard with all conduit openings for power and branch circuits on the bottom (inverted)..... **-I**

To order an inverted panelboard with main power feed on top and bottom (alternate inverted)..... **-A-I\*\***

### Accessories:

#### Gland Plates

Field installable gland plates with factory-provided aluminum Myers™ Hubs for the D2L stainless steel terminal housing (one 3-inch hub and 12 branch entry hubs - size dependent upon suffix, each kit includes 3 gland plates, 1 for the top or bottom and 1 for each side):

- ¾" branch entry hub
- 1" branch entry hub
- 1 ½" branch entry hub
- Replacement gland plate (no hubs)

**Part Number**  
**D2L HUB2 KIT**  
**D2L HUB3 KIT**  
**D2L HUB5 KIT**  
**D2L HUB0 KIT**

#### Circuit Breaker Operator Assemblies:

### Table A – Panel Capacity

#### Maximum Number of Breaker Spaces:

Panel Size	Max. No. of Branch Circuit Breaker Spaces			Available Main Breaker Ampacity	Available With GFI, EPD Branch Protection
	With Main Lug Only	With Main Breaker			
		2-pole	3-pole		
B	24	22	21	Up to 100■	Yes
C§	42	40	39	Up to 100■	Yes
		36	36	110 to 225⊕	Yes
D	42	42	42	Up to 225⊕	Yes

### Table B – To Size Panels with GFI or EPD Branch Breakers

#### Maximum Number of GFI or EPD Breakers

Panel Size with Main Lug or Main Breaker	Maximum Number of GFI or EPD Breakers	
	Single-Pole	Two-Pole
B	21	12 (10 with 3-pole MCB, 11 with 2-pole MCB)
C	21	14
D	EPLDN only - can go up to 42 GFI or EPD circuits. EPLDN will accommodate up to 225 amp main breaker.	

Each factory-sealed panel is equipped with 42 load wires for GFI/EPD breakers and any combination with standard branch breakers. Determine the total number of load wires required to complete your panel. You may not exceed 42 load wires.

	Load Wires Required
Single-pole breaker	1
Single-pole GFI (or EPD) breaker	2
Two-pole breaker	2
Two-pole GFI (or EPD) breaker	3
Three-pole breaker	3
	<b>Maximum Total: 42 load wires (factory sealed)</b>
EPLDN Panels	<b>Maximum Total: 84 load wires (non-factory sealed)</b>

1A

† Group B and IIB + H<sub>2</sub> is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EPL-GB-KIT separately.

‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

§ All size B and size C panels with main breaker rated up to 100 amps use a back-fed branch breaker. All size D and size C panels with main breaker rated from 110 amps to 225 amps have a dedicated location for main breaker. Size C ordered with suffix 2M00 or 3M00 are provided with 36 branch circuits for maximum breaker ampacity.

⊕ Main breakers are mounted external to chassis.

■ Main breakers are chassis mounted and back-fed.

### Lighting Panelboard Catalog Number Example

Example:

Class I, Division 2 / Zone 2, Group B panel with:

- 240VAC lighting panelboard
- (28) single-pole 20 amp branch breakers
- (1) single-pole 15 amp branch GFI breaker
- 225 amp 3-pole main circuit breaker

#### Example would be ordered as:

**D2L C S 3 30G \* 28 1 20 \* 01 1 15G - 3 M 225 -GB**

- Select panel type \_\_\_\_\_  
D2L = Div. 2 / Zone 2 Panelboard  
EPL = Div. 1 & 2 / Zone 1 & 2 Panelboard
- Select size of enclosure \_\_\_\_\_  
B = 24 circuit panel  
C = 42 circuit panel (36 circuit panel with main breaker greater than 100 amps)  
D = 42 circuit panel
- Select terminal enclosure material type \_\_\_\_\_  
**Premium Solution**  
S = stainless steel terminal housing (Div. 2 / Zone 2 panels only)  
A = cast aluminum terminal housing  
**Value Solution**  
N = no terminal housing (non-factory-sealed - Div. 1 & 2 / Zone 1 & 2)
- Select panel phase \_\_\_\_\_  
1 = single-phase electrical system  
3 = three-phase electrical system
- Select breaker spaces \_\_\_\_\_  
1-pole breaker = 1 breaker space  
2-pole breaker = 2 breaker spaces  
3-pole breaker = 3 breaker spaces  
  
*Example:*  
(28) 1-pole 20 amp breakers = 28 spaces  
+ (1) 1-pole 15 amp GFI breaker = 1 spaces  
Total breaker spaces = 29  
**If odd, round up to even = 30**  
  
Note: GFI and EPD each require 1 additional load wire per breaker.  
Factory sealed PowerPlus panels offer a maximum of 42 load wires.  
For requirements greater than 42, consider non-factory sealed PowerPlus panels.
- Insert asterisk (\*) before each branch breaker series \_\_\_\_\_
- Quantity of alike branch breakers \_\_\_\_\_
- Branch breaker pole rating \_\_\_\_\_  
1 = single-pole breaker  
2 = 2-pole breaker  
3 = 3-pole breaker
- Branch breaker ampere rating (numerical value represents ampere rating) \_\_\_\_\_  
20 = 20 amps
- Insert asterisk (\*) before each branch breaker series \_\_\_\_\_
- Quantity of alike branch breakers \_\_\_\_\_
- Branch breaker pole rating (see #8 above) \_\_\_\_\_
- Branch breaker ampere rating \_\_\_\_\_  
15 = 15 amps  
G = GFI breakers  
15G = GFI with 15 amps
- Dash indicates that main breaker follows \_\_\_\_\_
- Main breaker number of poles \_\_\_\_\_

18. Group B Option  
17. Indicates main breaker amperage rating  
16. M indicates main breaker

† Group B and IIB + H₂ is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EPL-GB-KIT separately.  
‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

# 1A

PowerPlus™ Series Panelboards provide both premium factory-sealed and value non-factory-sealed solutions for the protection and distribution of lighting, power, and heat tracing circuits. This panel solution is designed, engineered, and manufactured to be the industry's safest and most dependable panelboard for hazardous area locations.

## PowerPlus Premium and Value Solutions

- **Premium Solution:** PowerPlus factory-sealed panelboards are premium panelboards that provide maximum circuit flexibility with labor savings during installation, operation, and maintenance, and are accommodating for future changes in the field (order with either "S" or "A" in base part number). Panels are pre-wired to maximum circuit capacity, allowing for easy and safe replacement or installation of components in the field, while maintaining factory-sealed integrity.
- **Value Solution:** PowerPlus non-factory-sealed panelboards are value panelboards that offer maximum circuit flexibility and many of the same features and benefits of the PowerPlus premium line. This value solution is provided without terminal housing and factory wiring of circuits (order with "N" in base part number). The non-factory-sealed solution reduces initial panelboard material costs and requires field wiring to circuit breakers and external seals to be field-installed during installation.

## Applications:

EXD and D2D PowerPlus™ panelboards are used:

- In areas made hazardous by the continuous or abnormal presence of flammable gases, vapors, and combustible dusts
- In areas subject to weather, dampness, and corrosion
- For branch power distribution and circuit protection to motors, valves, pumps, lighting, heat tracing, receptacles, etc.
- For indoor and outdoor applications in petroleum refineries, chemical and petrochemical plants, and other process industry facilities where similar hazards exist
- To accommodate up to 100 amp branch loads (only 3 circuits), balance is up to 50 amps

## Certifications and Compliances:

### EXD Series:

- UL Standard: 67, 1203
- cUL (to CSA Standard C22.2 Nos. 29 & 30)
- IP65

## Standard Materials and Finishes:

- Circuit breaker enclosure body and cover – copper-free aluminum
- Terminal housing – type 316L stainless steel ("S") or copper-free aluminum ("A")
- Gasket – neoprene (cast aluminum enclosure); foam-in-place (stainless steel enclosure)
- Operating handles – copper-free aluminum
- Operating shafts and bushings, cover bolts, washers, hinges, breather/drain, retractile springs – stainless steel
- Circuit breaker operators – EXD/D2D Size F: copper-free aluminum; all other types: non-metallic
- Lifting bracket – electrogalvanized cold rolled steel
- Chassis – silver-plated copper
- Breather cap – Delrin® non-metallic material
- Neutral and ground bar – tin-plated aluminum

1A

†Group B and IIB + H<sub>2</sub> is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EXD-GB-KIT for Sizes B, C, and D separately.  
‡NEMA 4X rating is available when ordered with suffix S752 or S753.  
Delrin® is a registered trademark of DuPont.

# 1A PowerPlus™ Panelboards

**Power**  
**EXD Series (Div. 1 & 2)**  
**D2D Series (Div. 2)**

EXD Series:  
 Cl. I, Div. 1 & 2, Groups B†, C, D  
 Cl. I, Zone 1 & 2, IIB + H2‡  
 Cl. II, Div. 1, Groups E, F, G  
 Cl. II, Div. 2, Groups F, G  
 Cl. III  
 NEMA/IEEAC 3, 4, 4X‡, 7B†CD, 9EFG, 12

D2D Series:  
 Cl. I, Div. 2, Groups B†, C, D  
 Cl. I, Zone 2, IIB + H2‡  
 Cl. II, Div. 2, Groups F, G  
 Cl. III  
 NEMA/IEEAC: 3, 4, 4X‡, 7B†CD, 12

This corrosion-resistant Type 4X breather and drain comes standard with all PowerPlus panelboards. This permits all models to maintain their Type 4 (Type 4X with suffix S752) rating while utilizing a breather/drain solution to drain internal condensation while protecting against ingress of rain and hose water.

PowerPlus D2L and EPL panels are available with GFI and/or EPD breakers. This 21-position electrical test circuit allows for testing of GFI, EPD, or a combination of both in one panel. EPLDN panels are available with up to 42 GFI or EPD circuits with 225 amp main breaker.

PowerPlus panels come standard with a high-quality silver-plated copper buss system. This provides high-efficiency current flow between the main feed and branch breakers.

Each branch and main breaker handle is provided with lockout/tagout capability, which complies with OSHA lockout/tagout requirements for safety. This allows for locking in the ON or OFF position for standard maintenance checks.

Spring-loaded, quick-release, captive stainless steel cover bolts come standard. This design prevents damage to the flat joint flame path when opening and closing the cover while providing visual identification of bolt engagement.

PowerPlus panels are available with an optional hinged stainless steel ice/dust shield. This ice shield solution prevents ice and snow build-up on breaker handles to allow for proper handle function in cold/wet climate applications.

Stainless steel hinges are engineered to provide maximum stability and allow the cover to swing fully open. This avoids misalignment of cover to the body of the enclosure and prevents the cover from obstructing interior access.

**EPLCN or EXDCN\***

\*Note: D2D / EXD panels are not available with GFI or EPD circuit breakers or electrical test circuit as standard. Please contact factory if required.

† Group B and IIB + H2 is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EXD-GB-KIT for sizes B, C and D separately.  
 ‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

Cl. III

NEMA/EEMAC: 3, 4, 4X‡, 7B†CD, 12

1A

Integrated steel lifting eye is mounted on the top side of each PowerPlus panel. This provides a stable lifting position to ensure ease of mounting during the installation process.

PowerPlus cast enclosures are manufactured with an external flange design. This design allows for a wide unobstructed cover opening and provides a completely accessible interior for ease of maintenance and wiring.

Superior self-aligning breaker operators are designed for both field and factory installation. This patent-pending design guarantees proper handle alignment when closing the cover.\*

All panels with terminal housings are factory-sealed†† and fully wired for maximum available circuits. This allows PowerPlus models the ability to have additional breakers field-installed while maintaining their factory seal.

All terminal blocks come fully wired with each contact numbered for easy connecting of branch entries.

Heavy gauge 316L stainless steel terminal housings are supplied with three removable gland plates to be used with Myers® Hubs. This design allows for the flexibility of factory- or field-drilled openings for hubs.

Stainless steel terminal housings offer a high-integrity gasket, providing a watertight seal to meet enclosure Type 4/CSA ENC. 4/IP65 requirements. This provides superior protection of enclosed wiring against water and corrosion. Cast aluminum enclosures are also gasketed, providing a NEMA 4 watertight seal.

### D2LBS (Inverted) or D2DBS (Inverted)

\* Not available in Size F offering. Spring aligning forks are standard on Size F panels.

††EPL\*A and EXD\*A conduit entries 2" or larger in Class I, Division 1 must be sealed within 18" of enclosure. All alternate feed entries to breaker housing (suffix A) must have an external seal within 18" of enclosure.

PowerPlus panelboards offer an industrial grade 316L stainless steel terminal housing as standard. This design offers an increased internal volume with a removable front cover for easy access during field installation and maintenance. A cast aluminum terminal housing is standard on EPL and EXD panels and available on D2L and D2D panels.

† Group B and IIB + H2 is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EXD-GB-KIT for sizes B, C and D separately.

‡ NEMA 4X rating is available when ordered with suffix S752 or S753.

## Electrical Ratings:

### Branch Breakers Trip Ratings:

Panel Size	Voltage	Phase / Wire	Main Breaker Amperage	Branch Breaker
B	480Y/277	3P 4W	Up to 100	G-frame
	480Δ	3P 3W	Up to 100	G-frame
C	480Y/277	3P 4W	Up to 100	G-frame
	480Δ	3P 3W	Up to 100	G-frame
D	480Y/277	3P 4W	Up to 225	G-frame
	480Δ	3P 3W	Up to 225	G-frame
F	480Y/277,	3P 3W or	Up to 225	F-frame
	480Δ, or	3P 4W		
	600Δ††			

### Panel Sizes B, C, and D (G-Frame Cutler-Hammer™):

- 1-, 2-, and 3-pole: GHB 480/277Y (standard offering)
- 2- and 3-pole: GDB 480Δ (requires suffix -GDB)
- 1-, 2-, and 3-pole GBH 600Y/347 (requires suffix -GBH; contact factory)
- 15, 20, 25, 30, 35, 40, 45, 50 amp (available in all breaker spaces in panel), 60, 70, 80, 90, 100 amp (only 3 breaker spaces available)‡‡
- Ambient compensated breakers are optional to +50°C (suffix V)

### Panel Size F (F-frame breaker: EHD Cutler-Hammer™ standard):

- 15, 20, 25, 30, 35, 40, 45, 50, 60, 70 amp (available in all breaker spaces in panel), 80, 90, 100 amp (only 3 breaker spaces available)
- Breaker types available†††
  - FDB: 2-, and 3-pole 600V
  - FD: 1-, 2- (277V), and 3-pole (600V)
  - HFD: 1-, 2- (277V), and 3-pole (600V)
  - EHD: 1-, 2- (277V), and 3-pole (480V)

### Main Breaker Trip Ratings:

- 2- and 3-pole (contact factory for single phase sizes B, C, D)
- Size B, C: 15 to 100 amps
- Size D, F: 15 to 225 amps

### Main Lugs:

- Size B, C, and F: 225 amps
- Size D: not available; main breaker only

### Ampere Interrupting Capacity:

- All size panels are certified to 10kAIC
- Breaker AIC Ratings:
  - GHB Breaker: 14kAIC at 480Y/277
  - EHD Breaker: 14kAIC at 480V

### Breaker types optional with Sizes B, C, and D panel only:

- GDB Breaker: 14kAIC at 480V

### Breaker types optional with Size F panel only:

- FDB Breaker: 14kAIC at 480V and 600V
- FD Breaker: 18kAIC at 600V and 35kAIC at 480V & 277V
- HFD Breaker: 25kAIC at 600V and 65kAIC at 480V & 277V

## Options:

To add the following features to the panelboard, add a dash and then the suffix to the Cat. No. When multiple suffixes are needed, add them to the Cat. No. in alpha-numeric order.

Description	Suffix
Space heater .....	R44
Square head plugs on all conduit openings* .....	SP
Epoxy powder coat finish, external .....	S752
Epoxy powder coat finish, internal and external .....	S753
Recess head plugs on all conduit openings* .....	RP
Stainless steel breaker operator cover (ice shield) .....	HG
Group B kit factory installed .....	GB
GFI breakers☼ .....	G
EPD breakers☼ .....	E
HID breakers☼ .....	H
Ambient compensated breakers (50°C) .....	V
GDB 480Δ 3P 3W system■ .....	GDB
FDB 600V breakers* .....	FDB600
FD 600V breakers* .....	FD600
HFD 600V breakers* .....	HFD600
Lamacoid Nameplate .....	LID

### A standard panelboard has conduit openings for power and branch circuits on top.

To order a panelboard with main power feed from the bottom of breaker housing, and branch entries on top (alternate) ..... -A\*\*

To order an inverted panelboard with all conduit openings for power and branch circuits on the bottom (inverted) ..... -I

To order an inverted panelboard with main power feed on top and bottom (alternate inverted) ..... -A-I\*\*

†Group B and IIB + H2 is standard on all PowerPlus panels, but requires special brackets to be installed on breakers to ensure long-term operability of circuit breakers. To order with brackets installed at factory, add suffix -GB. For field installable kit, order EXD-GB-KIT for Sizes B, C, and D separately.

‡NEMA 4X rating is available when ordered with suffix S752 or S753.

††For 480Δ 3P 3W system or for 600VAC, a suffix is required. Note: for single-pole 480Δ, GHB breakers will be furnished for Sizes B, C, and D.

†††Two-pole GDB breakers are only available up to 50 amps.

††††F-frame breakers are only available in Size F panel with up to a maximum of 30 circuit spaces.

☼Please contact factory. Single pole 480V EPD available. For all others, please contact factory. Two breaker positions for single pole EPD: odds start at position 1; evens start at position 4.

■Available in D2D and EXD Sizes B, C, and D only.

\*Available with D2D and EXD Size F panels only.

\*\*D2D/EXD Sizes C and D are only available with up to 36 circuits.

•Not available on stainless terminal housings.

SynergEX Panelboards offer superior solutions utilizing individually encapsulated circuit breakers to provide maximum safety in the most extreme environments. The finger safe design provides ultimate flexibility and speed during installation, normal operations and maintenance activities in the field. This advanced design is approved for all hazardous gases, which allows for operation in multiple locations and hazardous situations.

### Applications:

SynergEX Panelboards provide overcurrent and short circuit protection for low voltage power, lighting, and heat tracing applications in indoor and outdoor hazardous areas, such as:

- Refineries
- Chemical and petrochemical plants
- Mining
- Corrosive process facilities
- Food processing facilities
- Indoor and outdoor industrial applications

### Features:

- Lightweight design for reduced labor and equipment installation
- Dead-front design allows for operating breakers without hot permit
- Finger safe design eliminates safety risk for personnel
- Patented friction welded encapsulated molded-case circuit breakers
- Robust design providing operations in all gas groups and extreme hot/cold environments
- Front viewing window for easy visual indication of breaker status
- Quick snap encapsulated circuit breakers (no bolts or screws)
- Removable gland plates for easy addition of entries
- Gangable for main breaker housing

### Certifications and Compliances:

#### NEC/CEC:

- Class I, Zone 1, Aex de IIC T4
- Ex de IIC T4
- Class I, Division 2, Groups A, B, C, D
- Class II, Division 1, Groups E, F, G, Extb IIIC T100°C Db
- Type 4X, IP66

### Electrical Ratings:

#### SynergEX Panelboard:

- Max. 225A / Phase (3 phase max.)
- Max. 480VAC
- Max. 225A main breaker (external enclosure)
- 10kA short circuit current

#### Encapsulated Circuit Breakers:

- 480/277VAC
  - 1-, 2- and 3-pole
  - 10, 15, 20, 25, 30, 35, 40 amps
  - Auxiliary and signal contact
- 240/120VAC
  - 1-, 2- and 3-pole
  - 10, 15, 20, 25, 30, 35, 40 amps
  - 1-pole GFI and EPD
  - Auxiliary and signal contact

### Standard Materials:

- Enclosure – 316L stainless steel or painted steel
- Observation window – laminated safety glass
- External parts (hinges, screws, washers, ¼ turn locks, gland plates) – 316L stainless steel
- Internal parts (screws, washers, back plate, fasteners) – 304 stainless steel
- Gasket – silicone
- Dead-front panel – flame rated fiberboard (V-1)
- Bus bars – nickel-plated copper
- Filler plates – flame rated nylon (V-0)
- Bonding/grounding assembly – brass
- Encapsulated circuit breakers – flame rated nylon (V-2)

- Ⓐ **Extreme temperature durability** - This panelboard is designed to withstand temperatures ranging from -40°C to +55°C, offering operational durability in the most extreme environments.
- Ⓑ **Efficient breaker operation** - Dead front design allows for breakers to be easily and quickly reset.
- Ⓒ **Certified for all hazardous gases** - The individually encapsulated breakers are certified for all hazardous gases (ABCD, IIC), allowing an end-user to install the product in a variety of hazardous locations.
- Ⓓ **Finger safe configuration** - Enhanced finger safe design prevents contact with live parts, ensuring personnel safety.
- Ⓔ **Quick snap, screwless breaker replacement** - Our circuit breakers are individually encapsulated without any bolts or screws, greatly reducing installation time and cost.

NEMA 4X, IP65

## Applications:

D2Z panelboards are designed specifically for use in:

- Class I, Zone 1, Division 2, Groups A, B, C, D hazardous area locations.
- In damp, wet or corrosive locations.
- Indoors or outdoors in Zone 1, Division 2 areas of petroleum refineries, chemical and petrochemical plants, and other process industry facilities.

## Features:

- cCSAus, PTB\* certified for Class I, Zone 1, Division 2 hazardous areas.
- Fiberglass-reinforced polyester enclosures:
  - Non-metallic, corrosion-free
  - Increased safety Ex-e protection
  - Impact resistant
  - NEMA 4X, IP65
  - Enclosure meets UL 94-V0
  - UV listed
- 316L stainless steel enclosures (suffix S860):
  - Corrosion resistant
  - Industrial grade thickness
  - NEMA 4X, IP65
- Unique design allows for panels with more than 42 circuits.
- Main disconnect switches 40, 80, 125, 180A.
- Optional flameproof Ex-d fusing of main disconnect.
- Flameproof Ex-d encapsulated UL 489 branch circuit breakers:
  - Thermal-magnetic protection up to 40A with 240 VAC circuit breakers.
  - Thermal-magnetic protection up to 25A with 480 VAC circuit breakers.
  - Auxiliary contacts (mechanical or electrical).\*\*
  - Lockout on components.
  - Prewired to Increase Safety terminal blocks.
  - GFI branch breakers (EPDs).\*\*
- Clear, NEMA 4X / IP65 window, hinged for actuation or breakers.
- Double lockout on windows and breakers.
- Brass plates for hub or cable gland entries.
- Enclosures are to be vertically mounted on switchrack frames or walls.
- Completely pre-wired ready for connection to terminal blocks.

**D2Z with 316L stainless steel enclosure (suffix S860)**

## Options:

The following special options are available from the factory by adding the suffix to the Cat. #:

### Description

D2Z Series panelboards are now available with 316L stainless steel enclosures. This material is ideal for wash down and corrosive areas requiring product endurance in adverse locations.

\*Available with ATEX certification, please consult factory.

\*\*Available with only UL 1077 supplemental protectors.

\*\*\*For ambients -20°C or less, optional heater is required.

## Ordering Procedure Step 1: Window

Determine the number of windows required from the following chart based on the number of branch breakers. Multiply breaker space by number of breakers. Round the sum total to the next highest whole number to determine required windows. i.e. For (8) 1-pole and (2) 2-pole breakers:  $(8 \times 0.16) + (2 \times 0.25) = 1.78 = 2$  windows required.

	Max. No. Per Window	Branch Circuit Breakers (max 40A)	Space Required For Each Breaker
	6	1-pole	.16
	4	2-pole or 1-pole with EPD or 1-pole with signal contact	.25
	3	3-pole or 1-pole + Neutral with signal contact or 2-pole with signal contact	.33
	2	4-pole or 2-pole with EPD or 3-pole with signal contact	.50

1A

## Step 2: Disconnect Switch

If a disconnect switch is required, select suffix from table.

### Main Switch Disconnect

	3-phase	Single Phase
40	-3S* 40	-2S* 40
80	-3S* 80	-2S* 80
125	-3S* 125	-2S* 125
180	-3S 180	—

\*Add F if fuses required. Fuses supplied by others. See page 656

D2Z	C	3	40EAX	*06340	-3SF125	-S848 -BC

**Class I, Div. 2, Groups A, B, C, D;  
Zone 1, AEx & Ex de IIC panelboards**

**Panel Type – see step 3  
(No. of enclosures) (A, B, C, or D)**

**1 – single-phase      3 – 3-phase**

**Circuit Breaker Total: (see Step 1 details)**  
 (12) single-pole = 12 circuits  
 + (6) three-pole = 18 circuits  
 + (2) single-pole EPD = 4 circuits  
 + (5) single-pole = 5 circuits  
 w/ Aux contacts      39 circuits → **40 circuits**  
 If an odd number, round up to an even number.

Add suffix if included: E for EPD, AX for auxiliary contacts, SC for signal contacts, K for MOVs and portable power  
 Note: Maximum number of devices per window: (6) 1-pole devices; (4) 2-pole devices; (3) 3-pole devices or combinations of each, where a 3-pole device = (3) 1-pole devices, and a 2-pole device = (2) 1-pole devices

**Choose Circuit Breakers (2, 6, 10, 16, 20, 25, 32 or 40 Amp)†**  
 (3-pole first – Options, then 2-pole then single-pole)  
 a. Insert Asterisk\*  
 b. Quantity is 6: **06**  
 (if less than 10, insert 0 before quantity)  
 c. Three-pole: **3**  
 d. Ampere Rating : **40** (if less than 10, insert 0 before amperage)  
 (max 40 amperes for 240VAC; max 25 amperes for 480VAC)

Options “E” for EPD  
 “AX” for auxiliary contacts  
 “SC” for signal contacts  
 “K” for MOVs and portable power, 480 VAC only

**Select disconnect switch (see Step 2 details) if required**  
 (3-phase, 4-pole Main Switch, Fused, 125 A)

**480 VAC, 10 kAIC Circuit Breakers – S848**

**Branch Entries**  
 (Side A [bottom] standard)  
 B – Side B left side  
 C – Side C right side

**1A**

### Example Order Number: D2Z C 3 40EAX \* 06340 \* 12120 \* 02120E \* 05110AX-3SF125-BC

(6) 3-pole/40A = \*06340  
 (12) single-pole/20A = \*12120  
 (2) single-pole/20A EPD = \*02120E  
 (5) single-pole/10A = \*05110AX  
 w/Aux contacts

For other panels or options, consult factory

‡ For a D2Z panelboard with 316 stainless steel enclosure, add suffix “S860” to catalog number

## Dimensions

# D2PB Division 2 Circuit Breaker Panelboards

Cl. I, Div. 2, Groups C, D  
NEMA 3, 7CD (Div. 2), 12  
Dust-tight  
Raintight

Wet Locations

1A

## Factory Sealed, Single & Two-Pole Circuit Breakers

### Applications:

D2PB panelboards are designed specifically for use:

- In Class I, Division 2, Groups C, D hazardous areas where flammable vapors or gases may be present due to accident or abnormal locations
- In damp, wet or corrosive locations
- Indoors or outdoors in Division 2 areas of petroleum refineries, chemical and petrochemical plants, and other process industry facilities

For general application, circuit breaker and wiring system information, see pages 626–629.

### Features:

- Enclosures are of external flange design, which makes the interior completely accessible when the cover is removed
- Provided with concealed mounting, which is made possible by having four clearance holes for lag screws or mounting bolts in the back of the enclosure, one in each corner
- The interior sub-assembly, consisting of a mounting plate, main terminal blocks, and circuit breakers, is removable as a complete unit
- Ample gutter space is provided for ease of field wiring
- Circuit breakers are contained in compact, individual factory sealed enclosures suitable for Class I, Division 2, Groups C, D hazardous areas. The individual enclosures are easily removed and replaced, therefore changing or adding individual circuit breakers will not present a problem
- The main cover, which is gasketed to exclude dirt and moisture, is attached to the body with hex head bolts and is removed only when installing the panelboard or making wiring changes. In the center of the main cover is a gasketed hinged door, which provides access only to the circuit breaker operating handles, and is held closed by two quick release catches. The door can be locked by as many as 3 padlocks to prevent unauthorized operation
- Tapped conduit openings are provided for main conduit and branch circuits, as shown in the dimensional information. Standard openings can be reduced or plugged to meet most installation requirements
- Circuit breakers are arranged in two vertical rows and have the circuit numbers marked on the handles. The left row is numbered 1, 3, 5, 7, etc. and the right row 2, 4, 6, 8, etc. Identifying information may be typed on the circuit directory card attached to the inside of the hinged door

### Certifications and Compliances:

- NEC: Class I, Division 2, Groups C, D
- NEMA: 3, 7CD (Division 2), 12
- UL Standard: 67, 877

### Crouse-Hinds

by **EATON**

### Standard Materials:

- Bodies, covers and hinged doors – copper-free aluminum
- Breaker operating handles – type 6 / 6 nylon
- Interior parts – sheet steel

### Standard Finishes:

- Copper-free aluminum – natural
- Type 6 / 6 nylon – natural (black)
- Sheet steel – electrogalvanized with chromate finish

### Options:

- Description:**
- Panelboard provided with operating handle lockouts for lockout in ON or OFF positions. Stainless steel lockout frame integral to panel faceplate.
    - D2PB Size 1..... **L12**
    - D2PB Size 2..... **L24**
  - Branch conduit entries furnished with Eaton's Crouse-Hinds type PLG plugs..... **S822**
  - Square head plugs in all openings.... **S872**
  - Branch circuit conduit openings located at bottom instead of at top.. **INV**
  - Drilled and tapped conduit openings other than standard – available on special order – specify.. **I**
  - Breather and drain..... **DV**
  - Circuit breaker operating handle lockout - order D2PB02
  - Assortment of single-pole and two-pole circuit breakers and trip ratings – see listings.
- Wiring system other than those listed – See page 628

**Suffix:**

**Specify**

1A

### Size Ranges:

Panel Size	Max. No. of Breakers	
	Single-Pole	Two-Pole
1	12	6
2	24	12

### Electrical Rating Ranges:

- Circuit breakers
- Single-pole – 120/240VAC max.
- Two-pole – 120/240VAC max.
- Trip ratings – 15, 20 and 30 amp

### Dimensions In Inches:

# 1A D2PB Division 2 Circuit Breaker Panelboards

### Replacement Circuit Breaker Assemblies

Where D2PB (and N2PB) panelboards have been ordered with less than the maximum number of circuit breakers, breakers can easily be added in the field. Circuit breaker assemblies for field addition or replacement are listed below; they consist of the breaker itself in its factory sealed Class I, Division 2, Groups C, D enclosure, and necessary mounting hardware. These assemblies are not suitable for use as individually mounted units.

#### Circuit Breaker Assemblies

Ampere Rating	Single-Pole Cat. #	Two-Pole Cat. #
15	D2CB11 15	D2CB12 15
20	D2CB11 20	D2CB12 20
30	D2CB11 30	D2CB12 30

### Ordering Information:

Panelboards are available with single-pole and two-pole, 15, 20, or 30 ampere circuit breakers. To order a panelboard with all breakers of the same rating, add the desired rating as a suffix to the Cat. No. For example, the 12 circuit D2PB1512 panelboard with all the circuit breakers rated at 20 amperes would be ordered as D2PB1512-20.

Panelboards shown below can also be furnished with an assortment of single-pole and two-pole breakers and breaker ampere ratings. To order, the quantities of breakers and ampere ratings are added as a suffix to the Cat. No. The total number of poles will determine the panel size (24 poles maximum), and the wiring systems must be compatible when combining single- and two-pole circuit breakers. For example, a typical D2PB panelboard with a combination of 3 single-pole 15 ampere, 3 single-pole 20 ampere, 2 single-pole 30 ampere, 4 two-pole 20 ampere, and 4 two-pole 30 ampere circuit breakers would be ordered as D2PB2508-315-320-230-808-420-430. The total number of poles is 24 and wiring systems 5 and 8 are compatible 4 wire, 3 phase.

The D2PB with a main breaker is available up to 100 amps. To order D2PB with main breaker, add the appropriate suffix. Example: D2PB1512-15 with three-pole, 100 amp main circuit breaker would be ordered as D2PB1512-15-3M100. If two-pole main is required, change the number 3 to 2. If a lower trip rating than 100 is required, the suffix will change accordingly.

Max. No. of Breakers				Single-Pole Circuit Breakers		Two-Pole Circuit Breakers

# D2PB, D2L, D2D Circuit Breaker Panelboard Assemblies

with Transformer

Cl. I, Div. 2, Groups B†, C, D  
NEMA 3, 4‡, 7B†CD (Div. 2), 12  
Wet Locations  
Watertight‡

1A

## Applications:

D2PB, D2L, D2D circuit breaker panelboard assemblies with transformers are for use:

- In Class I, Division 2, Group C, D hazardous areas where, due to accident or abnormal operations, flammable vapors or gases may be present, and which are subject to weather, dampness and corrosion
- Indoors or outdoors in Division 2 areas such as petroleum refineries, chemical and petrochemical plants, and other process industry facilities
- Where high voltage supply must be stepped down to the lower voltage necessary to serve lighting, heating, appliance, heat tracing, motor and similar circuits

For general information on panelboard applications, circuit breakers and wiring systems, see pages 626–629.

## Features:

- The factory assembled panelboard and transformer are on one compact frame, suitable for either wall or pole mounting. Wiring between the transformer secondary and main lugs of the panelboard is accomplished at the factory.
- Easy to install and wire. The main feed is connected to the transformer primary and the branch circuits are wired to the panelboard terminal blocks.
- The assembly can be installed in the load area to reduce the length of runs of low voltage branch circuits.
- Panelboards used are standard D2PB, D2L, or D2D units with circuit breakers listed in this section.
- Transformers are compound filled or epoxy filled to completely seal out moisture and dirt.

## Certifications and Compliances:

- NEC/CEC:  
Class I, Division 2, Group B†, C, D
- NEMA/EEMAC: 3, 4‡, 7B†CD (Division 2), 12
- UL Standard: 67, 1604
- CSA Standard: C22.2 No. 213

## Standard Materials:

- Frames – structural aluminum
- Mounting hardware – stainless steel
- Transformer enclosure – sheet steel, welded
- For panelboard materials, see individual listing pages

## Standard Finishes:

- Aluminum – natural
- Stainless steel – natural
- Sheet steel – primed and painted
- For panelboard finishes, see individual listing pages

## Options:

- Material – structural steel frames
- Finish – primed and painted or hot dip galvanized
- For options available on the panelboards themselves, see individual listings pages

## Size Ranges:

### Transformers

Single or three-phase – 5kVA to 30kVA

### Panelboards

	Max. No. of Breakers		
	Single-pole	Two-pole	Three-pole
D2PB	24	12	
D2L	42	20	14
D2D	30	14	10

## Electrical Rating Ranges:

- Transformers – 480 volt primary
- Transformers – 120 / 240 volt secondary
- Panelboards – see individual listings

# GUSC Circuit Breaker Load Centers

with Quicklag® Circuit Breakers

Cl. I, Div. 1 & 2, Groups B†, C, D  
 Cl. II, Div. 1, Groups E, F, G  
 Cl. II, Div. 2, Groups F, G  
 Cl. III

Explosionproof  
 Dust-Ignitionproof  
 Raintight  
 Wet Locations

1A

## Applications:

GUSC circuit breaker load centers are used in:

- Areas which are hazardous due to the presence of flammable vapors, gases or highly combustible dusts, and which are subject to weather, dampness and corrosion
- Indoors or outdoors at petroleum refineries, chemical and petrochemical plants and other process industry facilities where similar hazards exist

For general application and circuit breaker information, see pages 626–627.

## Features:

- Compact rectangular enclosures with round threaded covers
- External operating handles can be padlocked in either "ON" or "OFF" positions
- Not furnished with internal wiring as field wiring connections are made directly to circuit breaker line and load terminals. To meet varying grounding requirements, an insulated neutral terminal block is provided and is equipped with a removable grounding jumper
- Bodies have 1" vertical throughfeed hubs

## Certifications and Compliances:

- NEC:
  - Class I, Div. 1 & 2, Groups B†, C, D
  - Class II, Div. 1, Groups E, F, G
  - Class II, Div. 2, Groups F, G
  - Class III
- NEMA: 3, 7BCD, 9EFG, 12
- UL Standard: 1203

## Standard Materials:

- Bodies – *Feraloy*® iron alloy
- Covers and operating handles – copper-free aluminum
- Operating shafts – stainless steel
- Interior parts – sheet steel

## Standard Finishes:

- *Feraloy* iron alloy – electrogalvanized and aluminum acrylic paint
- Copper-free aluminum – natural
- Stainless steel – natural
- Sheet steel – electrogalvanized with chromate finish

## Size Ranges:

Max. No. of Breakers

Single-pole	Two-pole
2	1

## Electrical Rating Ranges:

- Quicklag circuit breakers: single-pole, 240VAC max.; two-pole, 240VAC max.
- Trip ratings: 10, 15, 20, 30 and 40 amp.

## Options:

The following special options are available from factory by adding suffix to Cat. No.:

Description	Suffix
• Breather and drain (Class I and Class II).....	S198V
• Breather and drain (Class I and Class II, Groups F, G).....	S454V
• Assortment of single and two-pole circuit breakers and trip ratings.....	Specify

## Factory Sealed Single & Two-Pole Breakers

### Applications:

- N2PB panelboards are for use in central control and protection of a large number of feeder or branch circuits and for housing circuit breakers in Class I, Division 2, Groups C & D hazardous areas.

### Features:

- Enclosures are made of *Krydon*®, Eaton's Crouse-Hinds' high impact strength fiberglass-reinforced polyester material with excellent corrosion resistance and stability to heat
- Enclosure access door provided with stainless steel thumb screws for easy access; access door may be padlocked to prevent unauthorized access
- Circuit breakers are contained in compact, individual factory sealed enclosures suitable for Class I, Division 2, Groups C, D hazardous areas

### Certifications and Compliances:

- NEMA 3, 7CD (Div. 2), 9FG (Div. 2), 12
- NEC:
  - Class I, Division 2, Groups C, D
  - Class II, Division 2, Groups F, G

### Options:

## Factory Sealed Single & Two-Pole Breakers

### Ordering Information

Panelboards are available with 15, 20 or 30 ampere circuit breakers. To order a panelboard with all breakers of the same rating, add the desired rating as a suffix to the Cat. No. For example, the 12 circuit N2PB2426-2512 panelboard with all the circuit breakers rated 20 amperes would be ordered as N2PB2426-2512-20.

Panelboards listed below can also be furnished with an assortment of single-pole and two-pole breakers and breaker ratings. To order, the quantities of breakers and ampere ratings are added as suffixes to the Cat. No. The total number of poles will

determine the panel size (24 poles max.), and the wiring systems must be compatible when combining single- and two-pole circuit breakers.

For example, a typical N2PB panelboard with a combination of 5 single-pole 20 ampere, 3 single-pole 30 ampere, and 4 two-pole 30 ampere breakers would be ordered as N2PB2426-2508-520-330-804-30. The total number of poles is 16 and wiring systems 25 and 8 are compatible 4 wire, 3 phase. The N2PB with a main breaker is available up to 100 amps. N2PB with main breaker, add appropriate suffix.

**Example:** N2PB2426-2512-15 with three-pole, 100 amp main circuit breaker would be ordered as N2PB2426-2512-15-3M100. If two-pole main is required, change the number 3 to 2. If a lower trip rating is required, the number will change accordingly. Main breaker housing is positioned on top of panel similar to D2PB main. (See Section 1A.)

# 1A XLPB Industrial Panelboards

NEMA 1, 3, 3R, 4, 4X, 12  
 NEMA PB1  
 UL/cUL Listed

## Applications:

XLPB Industrial Panelboards are used / installed:

- In areas made corrosive due to the presence of chemicals, salt water, and/or moisture
- In locations where rough usage, moisture, dust, dirt, and corrosion are a problem
- In areas subject to weather, dampness, or wash down requirements
- To provide, in one compact unit, a centrally controlled switching system for a large number of feeder or branch circuits
- For branch power distribution and circuit protection of motors, valves, pumps, lighting, heat tracing, receptacles, etc.
- In indoor and outdoor installations
- To house thermal-magnetic circuit breakers that provide disconnect means, short circuit protection, and thermal time delay overload protection

XLPB Panelboard Closed

XLPB Panelboard Open

## Features and Benefits:

- Heavy-duty welded mounting feet provide ease of installation (customer can easily support the panel with bottom mounting feet, while fastening the top feet)
- High quality foam-in-place gasket prevents ingress of water and corrosive agents, reducing panel failure due to moisture/corrosion
- An integral drainage channel allows for opening the panel door without moisture or dust seeping into panel from the top side of the enclosure
- An internal/external ground stud assembly enables rapid and reliable protective ground connection
- Industrial grade NEMA 4X panel designed for harsh environments provides long product life

## Standard Materials & Finishes:

- 316L stainless steel or painted sheet steel
- Eaton Pow-R-Line™ chassis
- Eaton Cutler-Hammer™ circuit breakers
- Stainless steel hardware
- High integrity foam-in-place gasket
- Industrial laminate insulate dead-front cover
- SS316 quarter-turn screw driver entry standard

## Electrical Ratings:

- 120/208, 240, 277/480, 480, and 347/600, 600 voltage panels
- 100 and 225 amp rated chassis
- Isolated neutral and ground bars
- Main breakers up to 225 amps
- 12, 18, 24, and 42 circuit panels
- 10kAIC

## Panel Capacity:

Panel Size	With Main Lug	With Main Breaker			Main Capacity		Available w/GFI/EPD Branch Protection
		2-Pole	3-Pole	Main Capacity	Main Capacity		
A	12	10	9	Up to 100 Amp	Up to 225 Amp	Up to 240V*	
B	18	16	15	Up to 100 Amp	Up to 225 Amp	Up to 240V*	
C	24	22	21	Up to 100 Amp	Up to 225 Amp	Up to 240V*	
D	42	40	39	Up to 100 Amp	Up to 225 Amp	Up to 240V*	

## Certifications and Compliances:

- NEMA 1, 3, 3R, 4, 4X, 12
- NEMA PB1
- UL508A Listed / cUL Certified (CAN/CSA C22.2, No. 14) (UL File E246968)
- UL67 components
- UL489/CAN/CSA C22.2, No. 5 circuit breakers

\*277V EPD Branch Protection potentially available - single phase only (requires 2 breaker spaces)

## Ordering Information:

*Example:*

- NEMA 4X stainless steel
- 120/208 VAC 3-phase
- (8) 1-pole, 20 amp circuit breakers
- 3-pole, 100 amp main
- Bottom entry (inverted)

**Example would be ordered as:**

	<b>XLPB</b>	<b>A</b>	<b>S</b>	<b>2</b>	<b>3</b>	<b>08</b>	<b>*08120</b>	<b>-3M100</b>	<b>-I</b>
--	-------------	----------	----------	----------	----------	-----------	---------------	---------------	-----------

1. Panel Type \_\_\_\_\_  
 XLPB
2. Size Enclosure \_\_\_\_\_  
 A = 12 circuit panelboard  
 B = 18 circuit panelboard  
 C = 24 circuit panelboard  
 D = 42 circuit panelboard
3. Enclosure Material Type \_\_\_\_\_  
 S = stainless steel  
 P = painted steel
4. Voltage \_\_\_\_\_  
 2 = 120/208, 240  
 4 = 480/277, 480  
 6 = 347/600
5. Phase \_\_\_\_\_  
 1 = single phase  
 3 = 3 phase
6. Total Number of Branch Circuits \_\_\_\_\_  
 Refer to step 2 for maximum number of branch circuits per enclosure size.  
 Number of branch circuits equals combined number of branch  
 circuit breaker poles - i.e. qty. (8) 1-pole, 20 amp breakers = 08 poles  
  
*Option: Ambient compensated breakers for 50°C, add suffix V after total  
 number of branch circuits*
7. Branch Breaker Series \_\_\_\_\_  
 \*Quantity, Pole, Amp  
 \*08120 = qty. (08), 1-pole, 20 amp circuit breakers  
  
*Option: For GFI circuit breakers, add suffix G after Total Number of Branch  
 Circuits and Branch Breaker Series (ex. XLPBAS2308**G**\*04120\*04115**G**-3M100*  
  
*Option: For EPD circuit breakers, add suffix E after Total Number of Branch  
 Circuits and Branch Breaker Series (ex. XLPBAS2308**E**\*04120\*04115**E**-3M100*
8. Main Breaker \_\_\_\_\_  
 2 or 3 pole, 15 to 225A  
*Example: 3M100 = 3-pole main breaker, 100 amp*
9. Options (see Options Section for more information) \_\_\_\_\_

1A

## Applications:

- NLP panelboards are for use in central control and protection of a large number of feeder or branch circuits and for housing circuit breakers.

## Features:

- Enclosures are made of *Krydon*® high impact strength fiberglass-reinforced polyester material with excellent corrosion resistance and stability to heat
- Enclosure access door provided with stainless steel thumb screws for easy access
- Access door may be padlocked to prevent unauthorized access
- Standard with plug-on circuit breakers

## Certifications and Complies:

- NEMA 3 and 12
- UL Standard: 67

## Options:

- Assortment of circuit breaker trip ratings – specify
- Assortment of single, two and three-pole circuit breakers – specify
- Wiring system other than those listed – specify
- Ground fault interrupter – circuit breakers with built-in ground fault interrupters can be provided. These interrupters cause the breaker to open when a ground fault occurs. Suffix "GFI" should be added after each circuit breaker rating to be supplied with ground fault interrupters

## Size Ranges:

Panel Type	Mains Rating	Main Lug Only	Max. No. of Branch Circuit Breakers					
			1-Pole		2-Pole		3-Pole	
			3w	4w	3w	4w	3w	4w
NLPQ1426	200A		24	30	12	14	–	10

## Electrical Rating Ranges:

- QO® circuit breakers, single or two-pole 120/240VAC; three-pole 240VAC
- Trip ratings:
  - 10 to 70 amps, single-pole
  - 10 to 70 amps, two-pole
  - 10 to 60 amps, three-pole
- Qwik-Gard® GFI circuit breakers:
  - Single-pole – 120 VAC 15 to 30 amps;
  - Two-pole – 120/240VAC 15 to 50 amps

## Ordering Information:

Panelboards are available with 10, 15, 20, 25, 30, 35, 40, 45, 50, 60 or 70 ampere circuit breakers. To order a panelboard with all breakers of the same rating, add the desired rating as a suffix to the Cat. No. For example, the 12 circuit NLPQ1426-2512 with all circuit breakers rated 20 amperes would be ordered as NLPQ1426-2512-20.

Panelboards can be furnished with an assortment of breaker ratings. Where all circuit breakers have the same number of poles, assortments may be ordered by adding the quantities and ampere ratings as suffixes to the Cat. No. For example, the 12 circuit NLPQ1426-2512 with six 15 ampere, four 40 ampere and two 50 ampere single-pole circuit breakers would be ordered as NLPQ1426-2512-615-440-250.

**Example:** An NLPQ panelboard using wiring system 24 with four 15 ampere breakers, two 40 ampere and four 50 ampere breakers and two 15 ampere breakers, one 25 ampere breaker, and one 30 ampere breaker with GFI – Catalog No. NLPQ1426-2414-415-240-450-215GFI-125GFI-130GFI

The NLP and NLPQ panelboards accommodate Square D NQOD and QON interiors as follows.

Enclosure	3 Wire Branches	4 Wire Branches
NLPQ1426	QON124L200I	QON330L200

Note: When ordering enclosures only, interiors and circuit breakers are not included and must be ordered separately from Square D.

## Dimensions In Inches:

Cat. #	Nominal Inside Dimensions			Door Opening Dimensions		Mounting Dimensions		Alternate Mounting Dimensions	
	nw	nl	nd	dw	dl	mw	ml	mwa	mla
NLP1426	14	26	8½	9⅞	23⅞	1⅞	27¼	15⅞	23¼

Note: Not to be used for construction purposes unless approved.

\* Watertight, weatherproof with door closed.

① Insert branch circuit breaker rating desired, 10, 15, 20, 25, 30, 35, 40, 45, 50, 60 or 70 amp.

‡ 200A QON main lugs are #4/0 Cu/Al.

† See page 677 for wiring diagrams.

Note: Hubs, grounding plates and bushings must be ordered separately. See page 677 for listing.

**Hubs**

*Krydon*<sup>®</sup> material hubs for conduit entrances, in sizes 1/2" through 3" are available for factory or field installation in all enclosures made of *Krydon* material. For factory installation, send drawing showing sizes and locations of hubs. Furnished with and gaskets to assure.

Conduit Size	Hole Size	Hub Cat. #
1/2	7/8	NHUB1
3/4	1 1/8	NHUB2
1	1 3/8	NHUB3
1 1/4	1 3/4	NHUB4
1 1/2	2	NHUB5
2	2 1/2	NHUB6
2 1/2	3	NHUB7
3	3 5/8	NHUB8

**Standard Materials:**

- Up to 1 1/2" – *Krydon* material with steel interiors
- 2", 2 1/2" and 3" – *Krydon* material with *Feraloy*<sup>®</sup> iron alloy interiors

**Standard Finishes:**

- *Krydon* material – natural
- Steel – electrogalvanized and bleached chromate
- *Feraloy* iron alloy – electrogalvanized

**Standard Materials:**

- Grounding plates – steel
- Grounding bushings – steel with thermoplastic insulating throat

**Standard Finishes:**

- Steel – electrogalvanized

**Grounding Plates and Grounding Bushings**

Grounding Plates (1/2" through 1") and insulated bushings (1/2" through 3") permit use of the conduit as the grounding circuit. Both types have set screws and ground-wire terminals.

# 2A Switches

## Application and Selection

### Quick Selector Chart

#### Applications:

- Switches and enclosures are used in hazardous and non-hazardous areas to disconnect motor, lighting and other circuits and prevent arcing of the enclosed switch from igniting hazardous atmospheres.

#### Considerations for Selection:

##### Enclosure Location:

- NEC/CEC and NEMA/EEMAC compliances for hazardous areas and/or wet and dirty locations

##### Electrical:

- Consistency with the functions to be performed

##### Application:

- Selection of appropriate switch and operating mechanism

#### Options:

- Optional material and finishes available for highly corrosive atmospheres
- Various hub sizes are available to suit particular applications

### Quick Selector Chart

Switch Enclosure	NEC/CEC & NEMA/EEMAC Compliances	Electrical Rating			Switch Type	Fused or Unfused

## Non-fused

### Applications:

- Provides an explosionproof disconnect switch assembly for hazardous area electrical systems
- Incorporates Eaton's Crouse-Hinds' high integrity manufacturing standards for reliability and safety in a compact, space-efficient NEMA 4 enclosure

### Features and Benefits:

- Can be ordered as enclosure only, allowing for field installation of switch while maintaining product certification
- NEMA 4X breather and drain\*\* provides a moisture control solution in hose-down applications
- Small, compact footprint - less mounting space required
- Large red painted aluminum rotary handle operator mounted on cover assembly provides rugged, reliable performance in the field and allows for the position of the switch to be easily identified from a distance
- Neoprene cover gasket provides UL Type 4 (hosetight) environmental rating
- Detachable/adjustable mounting feet provide flexible mounting alternatives for ease of installation; no need to replace the entire enclosure if a mounting foot is broken
- Stainless steel hinges provide easy access to inside of enclosure for wiring and maintenance
- (2) Conduit entries, one on top and one on bottom (EIDA—1" NPT entries, EIDB—1 1/2" NPT entries) for easy top or bottom feed of conductors
- (2) 1/2" NPT conduit entries, one on top and one on bottom, for field addition of breather and/or drain or for use with auxiliary contacts; †holes come plugged with Eaton's Crouse-Hinds PLG explosionproof as standard
- Provides lockout/tagout capability which complies with OSHA requirements, allowing for locking in the ON or OFF position for standard maintenance checks
- Complies with NEC Article 312 wire bending requirements for max gauge wire, allowing for easy and safe installation, and reliable operation of product

### Certifications and Compliances:

- Class I, Divisions 1 & 2, Groups B, C, D
- Class I, Zones 1 & 2
- Class II, Division 1, Groups E, F, G
- Class III
- Enclosure Type 3, 3R, 4 or 4X\*, 7BCD, 9EFG
- UL Standard 1203
- cUL to CSA C22.2 No. 30

# EBM Disconnect Switches and Enclosures

## 600 VAC Heavy Duty

Cl. I, Div. 1 & 2, Groups B, C, D  
 Cl. II, Div. 1, Groups E, F, G  
 Cl. II, Div. 2, Groups F, G  
 Cl. III  
 NEMA 3, 3R, 4 $\ddagger$ , 4X $\dagger\dagger$ , 7BCD, 9EFG, 12

Explosionproof  
 Dust-Ignitionproof  
 Watertight  
 Wet Locations

**2A**

### Applications:

EBM series hinged cover disconnect switches are used:

- To disconnect motor, lighting and other circuits.
- In locations made hazardous by the presence of flammable gases or vapors or ignitable dusts.
- Indoors or outdoors in damp, wet and dirty locations, or in areas where frequent washdowns, heavy rain or water spray is prevalent.
- To provide disconnect means and short circuit protection (fusible version).
- On switchracks or other assemblies where it is desired that motor control be centrally located.

### Features:

- Rugged corrosion resistant cast copper-free aluminum construction (less than 0.4 of 1%).
- Switch operating handle is located through the right side wall of the body, permits visual confirmation of correct alignment and operation.
- Total compliance to the wiring end room requirements of the National Electrical Code.
- Semi-clamshell enclosure design, with an external flanged ground joint between body and cover makes interior components more accessible.
- Minimum enclosure-to-enclosure spacing with little interference between the opened cover and an adjacent enclosure.
- Stainless steel hinges allow the cover to swing well out of the way.
- Stainless steel quick release captive hexhead cover bolts. Stainless steel springs provide clear indication that cover bolts are fully retracted from the body.
- Switch operating handle can be padlocked in either the "ON" or "OFF" position.
- Neoprene cover gasket permanently attached to the cover seals out moisture.
- Bodies have top and bottom drilled and tapped conduit entrances for power and conduits. Removable reducers are supplied as standard, to accommodate smaller size conduits. All conduit entrances are plugged.
- Tap on mounting feet.

### Certifications and Compliances:

- NEC/CEC:
  - Class I, Division 1 & 2, Groups B, C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- UL Standards: UL1203
- High A.I.C. Rating (Interrupting Capacity)
  - For Class I, Div. 1, Groups C & D only

Volt	RMS Symm-Amperes
240	65,000
480	50,000
600	25,000

- CSA Standard: C22.2 No. 30
- NEMA: 3, 3R, 4 $\ddagger$ , 4X $\dagger\dagger$ , 7BCD, 9EFG, 12

### Standard Materials:

- Body and cover – copper-free aluminum
- Operating handle – copper-free aluminum
- Operating shaft and bushing – stainless steel
- Interior parts – sheet steel, electrogalvanized
- Cover bolts, washers and retractile springs – stainless steel
- Hinges – stainless steel

## Heavy Duty

### Applications:

- FLS heavy duty enclosed switches are used:
- In a rigid metallic conduit system for surface mounting adjacent to or remote from equipment being controlled
  - As disconnect switches for main feed or individual motor control
  - To prevent arcing of the enclosed switch from causing ignition of a specific hazardous atmosphere, or atmospheres, external to the enclosure
  - In industrial areas such as chemical plants, oil and gas refineries, paint and varnish manufacturing plants, gasoline bulk loading terminals, grain elevators, grain processing industries, coal processing or handling areas and metal handling or finishing areas where atmosphere may contain hazardous gases and/or dust
  - In non-hazardous area where sturdy, durable enclosures are required

### Features:

- Enclosed devices are unfused, visible blade motor circuit switches
- Rugged cast metal enclosures with mounting lugs and taper tapped hubs with integral bushings, in through feed arrangement
- Interior of the enclosures is readily accessible through threaded cover openings at each end, set at an angle to facilitate wiring
- Threaded covers and a threaded type operating shaft and bushing provide quick assembly and easy maintenance
- A padlock can be used to lock the operating handle in an "ON" or "OFF" position
- Body and cover threads treated with lubricant at factory to provide raintightness

### Certifications and Compliances:

- NEC:
  - Class I, Divisions 1 & 2, Groups C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- NEMA: 3, 4, 7CD, 9EFG, 12
- UL Standard: 1203

### Standard Materials:

- Body – copper-free aluminum
- Cover – copper-free aluminum
- Shaft – stainless steel
- Shaft bushings – stainless steel

### Standard Finishes:

- Copper-free aluminum – natural
- Stainless steel – natural

### Options:

Description	Suffix
Ground/neutral wire stud provided	S168
Breather and Drain	S198V
Auxiliary switch: 1A, 1B	S784
Auxiliary switch: 2A, 2B	S785

# 2A Explosion Protected Disconnect Switches

10, 20, 40, 80, 125 and 180 Amp  
600VAC Non-metallic Enclosure

cCSAus Certified  
Cl. I, Div. 2, Groups A, B, C, D  
Cl. I, Zones 1 and 2, AEx de IIC, T6  
Cl. II, Div. 1, Groups E, F, G (CSA)  
Cl. II, Div. 2, Groups F, G  
ATEX Approved  
Ex de IIC, T6, Zones 1 and 2, IP66

## Applications:

Explosion Protected Disconnect Switches are used in a metallic conduit or cable system for surface mounting to control motor, lighting, and other circuits and:

- For individual motor control
- Are used to prevent arcing internal to the enclosed switch from causing ignition of a specific hazardous atmosphere or atmospheres
- Are designed for industrial areas such as chemical plants, oil and gas refineries, paint and varnish manufacturing plants, gasoline bulk loading terminals, and finishing areas where sturdy, durable enclosures are required

## Features:

- Explosion protected factory sealed motor circuit switches.
- Innovative break-line in cover allows full wiring access, making installation quick and easy.
- High-impact enclosure is designed for excellent corrosion resistance and will not warp from hot or cold water.
- Tongue-in-groove seal guarantees IP66 rating and eliminates possibility of accidental opening or leakage.
- Lockable handle meets OSHA lockout/tagout requirements.
- Molded-in-place mounting feet provide a water channel between wall and enclosure.
- Large rotary handle provides easy gripping with gloved hands.
- Captive cover screws prevent water exposure and possible corrosion.

## Certifications and Compliances:

- cCSAus Certified
- Class I, Division 2, Groups A, B, C, D
- Class I, Zones 1 and 2, AEx de IIC, T6
- Class II, Division 1, Groups E, F, G (CSA)
- Class II, Division 2, Groups F, G
- ATEX Approved - PTB
- Ex de IIC, T6, Zones 1 and 2A, IP66
- GOST-R and GOST-K
- CSA Standard: C22.2 No.14
- NEMA 4X
- IP66

## Standard Materials:

- Enclosure
  - 10A: Impact-resistance thermoplastic
  - 20A – 180A: Fiberglass-reinforced polyester
  - Non-metallic, corrosion resistance
  - Increased safety Ex-e protection
  - Impact Resistance
  - NEMA 4X, IP66 Protection
  - Enclosure meets UL 94-V0
  - UV Rated
- Enclosure Gasket – Silicon
- Handle – Impact-resistant thermoplastic
- Cover Screws – Stainless steel
- Conduit Entries: Zinc Myers™ Hubs

Cl. I, Div. 2, Groups B, C, D  
 NEMA 3, 4X, 7 (B, C, D Div. 2), 12  
 Watertight  
 Dust-tight  
 Factory Sealed

### Applications:

- N2RS heavy-duty enclosed switches are used:
- In a rigid metallic conduit or cable system for surface mounting adjacent to or remote from equipment being controlled.
  - For individual motor control.
  - To prevent arcing internal to the enclosed switch from causing ignition of a specific hazardous atmosphere, or atmospheres.
  - In industrial areas such as chemical plants, oil and gas refineries, paint and varnish manufacturing plants, gasoline bulk loading terminals, and finishing areas where atmospheres may contain hazardous gases.
  - In non-hazardous areas where sturdy, durable enclosures are required.
  - When controlling motor, lighting and other circuits.

### Standard Materials:

- Enclosure – *Krydon* material
- External Hardware – Stainless Steel
- Operating Handle – Nylon

### Size Ranges:

- Hub size:
    - (2) 1½" (30, 60 amps)
    - (2) 2½" (100 amps)
- Krydon* material hubs included (not mounted)

### Dimensions In Inches:

### Features:

- Enclosed devices are unfused, factory sealed motor circuit switches.
- Exceeds NEC® wiring end room requirements for ease of installation.
- RSWP factory sealed industrial control switch, no external seals are required.
- Enclosure is made of *Krydon*® high-impact strength fiberglass-reinforced polyester material having excellent corrosion resistance and stability to heat.
- *Krydon* material hubs with integral bushings, for dead-end or through-feed arrangements are supplied.
- *Krydon* material mounting feet supplied.
- Suitable for wash down and corrosive areas (Type 4X).
- A padlock can be used to lock the operating handle in the "OFF" position.
- Rotary actuator with snap action.
- Unitized, strong and durable construction provides longer service life for equipment.
- Factory sealed 10A, 600 VAC auxiliary contact switch provided.

### Certifications and Complies:

### Applications:

- GUSC snap switches are used:
- In a rigid metallic conduit system for surface mounting adjacent to or remote from the equipment being controlled
  - To prevent arcing of the enclosed switches from causing ignition of a specific hazardous atmosphere, or atmospheres, external to the enclosure
  - In industrial areas such as chemical plants, oil and gas refineries, paint and varnish manufacturing plants, gasoline bulk loading terminals, grain elevators, grain processing industries, coal processing or handling areas, or metal handling or finishing areas where the atmosphere may contain hazardous gases and/or dust
  - In non-hazardous areas where sturdy, durable enclosures are required

### Features:

- Enclosures are of rugged metal construction with mounting lugs and taper tapped hubs with integral bushings, in a through feed or bottom feed arrangement, for connection to the rigid metallic conduit
- Cover is threaded, which provides for fast and proper assembly
- Provided with a threaded operating shaft and bushing
- Provision is made to use a padlock with 3/4" hasp, to lock the operating lever in an "ON" or "OFF" position
- Body and cover threads treated with lubricant at factory to provide raintightness

## Applications:

GHG273 series of switches are used:

- To prevent arcing of enclosed switch from causing ignition of a specific hazardous atmosphere external to the enclosure
- In Division 2, Zone 1 and Zone 2 industrial areas such as: chemical plants, oil and gas refineries, paint and varnish manufacturing plants, gasoline bulk loading terminals, grain elevators and processing industries, coal processing or handling areas, or finishing areas where atmosphere may contain hazardous gases and/or dust
- In non-hazardous areas where sturdy, durable enclosures are required for both indoor and outdoor installations of light switches

## Features:

- Small and compact in design.
- Large grounding plate.
- Captive cover screws.
- Protective collar for inadvertent operation.
- Large actuator surface allows for operation while wearing work gloves.
- Labyrinth seal to guarantee the degree of protection IP66.
- The toggle has a luminescent label to locate switch in dark areas.
- Cable entry from the top is made possible by turning the base.

- CSA Standard: C22.2 No. 30

### Standard Materials:

- Bodies and covers – *Feraloy*® iron alloy
- Shafts – stainless steel
- Shaft bushings – stainless steel

### Standard Finishes:

- Feraloy* iron alloy – electrogalvanized and aluminum acrylic paint
- Stainless steel – natural

### Options:

#### Description

- Two or three gang bodies can be supplied with combinations of devices listed for one gang enclosures – Refer to modular listing, section 4C
- Class I Group B, NEMA 7B – see listing pages .....
- Bodies and Covers: copper-free aluminum .....
- Flush wall mounting cover with 1/2" overhang – single gang only – dull black instrument finish .....

#### Suffix

- GB

- S173

EDS Enclosed Snap Switch

### Electrical Ratings

Complies with U.L. snap switch test requirements as follows:

Type of Test	AC-Rated (only) Switch
Overload	Rated Amp. +380% Power Factor .40 – .50 100 cycles, 6 – 10 cycles per minute
Non-Inductive Endurance	10,000 cycles, 18 – 24 cycles per minute at rated current – .98 min. P.F.
Inductive Endurance	10,000 cycles, 18 – 24 cycles per minute – .75 – .80 P.F.
Tungsten Filament Lamp Endurance	10,000 cycles, 6 – 10 cycles per minute at rated current and 120 volts
Temperature Rise	Not to exceed 30°C
Dielectric Withstand	1500 volts

### Dimensions

#### In Inches:

# 2A WST Enclosed Switches

**Heavy Duty  
30, 60, 100 Amp**

NEMA 3R, 4, 12  
Wet Locations  
Watertight

## Applications:

WST heavy duty enclosed switches are used in conduit systems:

- As a means of disconnecting motors, lighting and power circuits. A fusible type switch, when used, also provides for short circuit protection
- Indoors or outdoors in industrial areas, subways, railroad facilities or any other area that is subjected to dust, dirt, chemical vapors or moisture (rain or hosing)
- Either pole-mounted or on flat surfaces

## Features:

- Enclosure, handle and other exterior parts are lightweight and corrosion resistant.
- Insulated – groundable type terminal block for grounded or ungrounded neutral supplied.
- Mounting lugs may be rotated 90 degrees or moved to the vertical centerline position for pole-mounting.
- Side hinged cover is retained in a closed position by compression spring draw-pull catches, which permits the opening or closing of the cover without having to use any tools. Lower cover latch is equipped for padlocking.
- The cover is interlocked with the body and operating mechanism to prevent the opening of the enclosure, except when the switch is in the "OFF" position.
- The operating handle may be padlocked in the "ON" or "OFF" position, thereby preventing unauthorized operation of the switch and/or opening of the enclosure. Up to three padlocks may be used.
- Switches are NEMA type HD heavy duty with visible blades, a quick make-and-break mechanism with reinforced, positive pressure-type blade and jaw construction. Fusible types have fuse clips with steel reinforcing springs of positive pressure type. Pressure connectors are used for wire connection.

## Certifications and Complies:

- NEMA: 3R, 4, 12
- UL Standard: 98
- CSA Standard: C22.2 Nos. 4 & 14

## Standard Materials:

- Enclosure – copper-free aluminum
- Operating handle – copper-free aluminum
- Other exterior parts – stainless steel

## Standard Finishes:

- Copper-free aluminum – natural
- Stainless steel – natural

## Options:

The following special options are available by adding suffix Cat. No.:

- |  |               |
|--|---------------|
| <b>Description</b>   | <b>Suffix</b> |
| • Auxiliary switch, 600VAC-DC heavy duty pushbutton station rating, can be supplied, and its contacts will close after switch contacts close and open before switch opens..... | <b>S483</b>   |

## Size Ranges:

- Conduit openings for 1" – 1½" inclusive are arranged for through feed. Removal of the threaded bushings permits use of the next larger conduit size.
- Other sizes and arrangements are available. Detailed information on request.

WST shown open

## Electrical Rating Ranges:

- 2 and 3-pole; fusible or non-fusible; 240VAC, 600VAC and 250VDC
- 30, 60 and 100 amperes
- 3 to 75 hp

# W2ST Enclosed Switches

**Heavy Duty  
30, 60, 100 Amp**

Cl. I, Div. 2, Groups B, C, D  
NEMA 3, 12  
Raintight

**2A**

## Applications:

W2ST Factory Sealed Industrial Control Switches are used:

- In hazardous areas rated Class I, Division 2, Groups B, C and D
- In a rigid metallic conduit or cable system
- For surface or flush mounting adjacent to or remote from equipment being controlled
- In industrial applications such as chemical plants, wastewater treatment plants, oil and gas refineries, steel mills or any other areas where atmospheres may contain hazardous gases
- When controlling motors, pumps, valves, lighting and other circuits

## Features:

- Enclosed devices are unfused, factory sealed motor circuit switches
- Exceeds NEC® wiring end room requirements for ease of wiring
- RSWP factory sealed industrial control switch, no external seals are required
- The cover is interlocked with the body and operating mechanism to prevent the opening of the enclosure, except when the switch is in the "OFF" position
- Mounting lugs may be rotated 90° or moved to the vertical centerline portion for pole mounting
- Side hinged covers are retained in a closed position by compression spring draw-pull catches, which permit the opening or closing of the cover without tools
- The switch operating handle may be padlocked in the "ON" or "OFF" position with up to three padlocks

## 2A Industrial Disconnect Switches

**30, 40, 60, and 100 Amp  
600VAC  
Non-metallic Enclosure**

NEMA Type 3, 4X, 12  
Corrosion Resistant  
Watertight

### Applications:

- Used in manual "ON" and "OFF" control of single-phase or three-phase AC motors where overload protection is not required or is provided separately.
- Meet NEC Article 430 requirements for a separate disconnect means within sight of all motor loads.
- Offers the ability to lock directly wired motor loads in the "OFF" position to comply with OSHA lockout/tagout requirements.
- Meets stringent hosedown requirements.

### Features:

- Enclosures are constructed from high impact thermoplastic, providing superior durability and corrosion resistance.
- Enclosure designed with tapered edges to keep liquids away from cover opening.
- Large pistol-grip handle provides easy gripping even with gloved hands.
- Lockable handle meets OSHA lockout/tagout requirements. Handles can be locked in the "OFF" position.
- Hidden hinge cover opens to 145°, making installation and maintenance quick and easy.
- Formed-in-place continuous gasket ensures NEMA 4X full perimeter sealing.
- Captive cover mounting screws.
- Brass enclosure assembly cover screw inserts allow for higher torque and prevent stripping.

### Certifications and Complies:

#### All units

- cUL
- NEMA Type 3, 4X, 12

#### Non-fused Units

- UL 508 – 40 & 60 amp
- UL 98 – 100 amp

#### Fused Units

- UL 98 – Enclosed Switch

### Standard Materials:

- Enclosure – VALOX® thermoplastic
- Enclosure Gasket – Neoprene
- Handle – Impact-resistant Thermoplastic
- Cover Screws – Stainless Steel
- Screw Assembly Inserts – Brass
- Conduit Entries – See Table 1\*

- For manual starting of motors up to 30 HP
- In damp or wet locations

**Features:**

- Compact enclosure meets NEMA 3R requirements
- Can be padlocked to help conform to OSHA lockout requirements
- Grounding terminal provides ground for box and cover
- Enclosed switch body does not expose contacts
- Double break butt-type silver alloy contacts provide long life
- Two 1/2", 3/4", 1" knockouts on bottom

## 600VAC/250VDC Heavy Duty

### Applications:

- NST disconnect switches are for use in disconnecting motor, lighting and other circuits.

### Features:

- Enclosures are made of *Krydon*®, Eaton's Crouse-Hinds' high impact strength fiberglass-reinforced polyester material having excellent corrosion resistance and stability to heat.
- Unitized, strong and durable enclosure construction provides longer service life for equipment.
- Enclosure has hinged access door which opens 160° for easy wiring and maintenance. Three screws for door frame are hidden behind access door.
- Access door may be padlocked to prevent unauthorized access.

### Options:

#### Description

- Auxiliary switch, 600 VAC-DC heavy duty pushbutton station rating, can be supplied. Its contacts will close after switch contacts close and open before switch opens.....
- Hubs (see "Note on Hubs") – see page 677
- Grounding plate or bushing – see page 677

#### Suffix

S483\*

Disconnect switch with built-in *Krydon* material handle

### Certifications and Complies:

# 3A EXH Series Explosionproof Electric Air Heaters

Cl. I, Div. 1 & 2, Groups C, D Explosionproof  
 Cl. II, Div. 1, Groups E, F, G Dust-Ignitionproof  
 Cl. II, Div. 2, Groups F, G  
 NEMA 7CD, 9EFG

## Applications:

EXH explosionproof electric heaters are used:

- In areas made hazardous by the presence of flammable gases and vapors, and combustible dusts
- For rugged locations including: oil refineries, petrochemical plants, rigs, pumping stations, turbine compressors, pulp and paper mills, coal mines, grain elevators, etc.
- In areas where flammable vapors or gases or highly combustible dusts may be present due to accidental or abnormal conditions
- For standby heat to prevent process heat loss, or for personnel comfort during maintenance/repair operations

## Features:

- Split fan guard for easy access to fan
- Compact design makes handling during installation easy
- Evacuated cores heat up quickly with even heat distribution
- Larger models offer greater kilowatt range providing more economical means to heat large areas
- Permanently sealed cores improve reliability and make field servicing easier
- Control box provides easy access for installation and maintenance

## Certifications and Compliances:

- Class I, Division 1 & 2, Groups C, D
- Class II, Division 1, Groups E, F, G
- Class II, Division 2, Groups F, G
- NEMA: 7CD, 9EFG
- UL Standard: 823
- CSA Standard: C22.2 Nos. 25, 30, 46

## Standard Materials and Finishes:

- Fan – Aluminum blade; steel spider and hub with 5/8 in. (15.875 mm.) bore
- Core – Steel with integral aluminum fins, vacuum charged and hermetically sealed
- Heating Elements – Three long life, low watt-density, high grade metal sheathed elements
- Heat Transfer Fluid – Long life formulated ethylene glycol and water, freeze protected to -49°F (-45°C)
- Cabinet Material – 14 gauge (0.075 in.) (1.90 mm) steel; epoxy coated with 5 stage pre-treatment including iron phosphate
- Conduit Material – Heavy walled, 0.122 in (3.1 mm.) steel cadmium plated

Heater shown has optional built-in thermostat.

## Options:

The following special options are available:

Description	Suffix
Built-in disconnect switch .....	D
Built-in pilot light .....	P
3-way switch .....	S
Built-in thermostat .....	T
Built-in HRC1 explosionproof thermostat .....	HRC

## Accessories:

- Basic mounting kit – suitable for applications where the support arm can be bolted or welded directly to structural steel or concrete.  
**Cat. # BMK-EXH5 (insert fan size: 12, 16 or 20)**
- Wall mounting kit – suitable for mounting on Z sections.  
**Cat. # WMK-EXH5 (insert fan size: 12, 16 or 20)**
- Hanging mounting kit – simple and economical if adequate overhead structure exists. Requires 1/2" pipe, cut and threaded – not supplied.  
**Cat. # HMK-EXH5**
- Swivel hanging mount kit – swivels 360°. Requires 1/2" pipe, cut and threaded – not supplied.  
**Cat. # SHMK-EXH5 (insert fan size: 12, 16 or 20)**
- Pipe mounting kit – useful in buildings with insufficient strength to use other types of mounts. requires 3" pipe.  
**Cat. # PMKEXH5 (insert fan size: 12, 16 or 20)**

- Motor Type** Explosionproof. Thermally protected. Permanently lubricated ball bearings. 1725 RPM.
- Fan Guard** Split design with close wiring spacing. 1/4 in. (6.3mm.) probe will not enter.
- Heating Elements** Three long-life, low watt-density, high grade metal-sheathed elements.
- Temperature High-Limit** Automatic reset type, snap-action bimetal, open on temperature rise. Rated 100,000 cycles at 10 amps, handles 0.128 amps.
- Control Circuit** 120 Volts, 0.128 ams, 15 VA.
- Control Transformer** Multi-tap primary, 120V secondary, 50 VA.
- Contactors** 60 or 100 amp. rated 1,000,000 cycles at maximum capacity, operating at not more than 84% full load. 120V, 15 VA fuse protected coil.
- Overpressure Protection** Fusible alloy plug 170 psi (1.17 MPa).
- Temperature Code Rating** T3B 165°C (329°F) Class I & II.
- Temperature Limitations** Operational; -49°F to 176°F (-45°C to 80°C), short term to 248°F (120°C).

### Catalog Number Example:

\* Not available with built-in disconnect switch (option D).

# XC Series Explosionproof Electric Heaters

NEC: Cl. I, Div. 1 & 2, Groups B\*, C & D  
IEC: Cl. I, Zones 1 & 2, Group IIB & H<sub>2</sub>\*  
NEMA: 7B\*CD

3A

## Applications:

Single phase XC explosionproof electric heaters are used:

- In areas where flammable liquids, gases or vapors are present
- For rugged locations including:
  - Petroleum refineries, gasoline storage and dispensing areas
  - Wastewater treatment plants
  - Areas that use flammable liquids for cleaning parts in dip tanks
  - Petrochemical plants
  - Paint spraying areas
  - Aircraft hangars and fuel servicing areas
  - Hydrogen fuel cell and battery storage facilities
  - Natural gas plants
- In areas where flammable vapors or gases may be present due to accidental or abnormal conditions
- For standby heat to prevent process heat loss or for personnel comfort during maintenance/repair operations

## Standard Features:

- Sloped-top cabinet prevents objects that restrict airflow from being set on top
- Corrosion-resistant design with no exposed copper or brass – suitable for H<sub>2</sub>S environments
- High-velocity airflow heats up area faster with better heat distribution
- 14-gauge steel cabinet for rugged reliability
- Short cabinet lengths take up less wall and floor space
- Optional built-in thermostat (Class I, Division 1, Groups C & D, and Zone 1, Group IIB models) reduces field installation costs
- *Incoloy*® 840 heating elements have longer life expectancy
- Radial-embossed aluminum plate fins warp less for better heat transfer
- Galvanized steel mounting brackets for quick installation

## Certifications and Compliances:

- NEC: Class I, Divisions 1 & 2, Groups B\*, C, D
- IEC: Class I, Zones 1 & 2, Group IIB + H<sub>2</sub>\*
- NEMA: 7B\*CD
- UL Standard: 823
- CSA Standard: C22.2 Nos. 25, 30, 46
- Temperature Code: T2A – 280°C (536°F)

## Standard Materials and Finishes:

- Heating elements – resistance wire embedded in a magnesium oxide refractory and sheathed in an *Incoloy*® 840 tube
- Finned tube assembly – aluminum tube with radial-embossed aluminum plate fins
- Cabinet – 14-gauge (0.075"/1.90 mm) steel, green-gray epoxy powder-coated front and side panels, galvanized steel back panel

## Accessories and Options:

- Built-in thermostat for 120-, 208-, 240-, 277- or 480-volt applications (see ordering information on next page)
- Remotely mounted HRC85 explosionproof thermostat using *Honeywell*® control for 45°F– 85°F heating range (order separately)

## Specifications:

Nominal kW	1.2	1.8	3.6	4.8	7.6
<b>Shipping Weight (lbs.) (kg)</b>	61.3 27.8	61.3 27.8	61.3 27.8	88.4 40.1	104.3 47.3
<b>Enclosures</b>	NEMA Type 7. For dry indoor use only. Do not immerse in water. Do not store or use in areas exposed to rain or snow.				
<b>Mounting Brackets</b>	Two 14-gauge galvanized steel brackets.				
<b>Heating Elements</b>	Two <i>Incoloy</i> ® 840-sheathed elements.				
<b>Optional Built-In Thermostat</b>	Explosionproof room thermostat with 10 settings.				
<b>Cabinet Material</b>	14-gauge (0.075"/1.90 mm) steel. Rear panel is galvanized. Front and side panels are baked green-gray epoxy powder coated with five-stage pre-treatment, including iron phosphate.				
<b>Temperature Code Rating</b>	T2A – 280°C (536°F)				
<b>Temperature Limitations</b>					
<b>Operational</b>	–45°C to 40°C (–49°F to 104°F)				
<b>Storage</b>	–45°C to 80°C (–49°F to 176°F)				

\*Hydrogen applications only apply to heaters without built-in thermostats.

\*Or equivalent breaker as per National Electrical Code and Canadian Electrical Code

1. Remote-mounted explosionproof room thermostats are not suitable for Group B & IIC applications. Remote contactors are also required on all 600-volt heaters and heaters with a current draw greater than 22 amps (supplied and installed by others).
2. Remote mounted explosionproof room thermostats suitable for Group B, IIB + H<sub>2</sub> applications are a special-order item.
3. Operation at lower than rated voltages will result in reduced kW output and amp draw.  
Actual Output (kW) = [(Supply Voltage)<sup>2</sup> ÷ (Rated Voltage)<sup>2</sup>] x Rated Unit Wattage (kW)

# HRC Thermostats with Honeywell Control

Cl. I, Div. 1 & 2, Groups C, D  
 Cl. II, Div. 1, Groups E, F, G  
 Cl. II, Div. 2, Groups F, G  
 Cl. III  
 NEMA 7CD, 9EFG, 12

Explosionproof  
 Dust-Ignitionproof  
 Raintight  
 Wet Locations

**3A**

## Applications:

HRC thermostats with Honeywell control are used:

- For heavy duty line voltage thermostats to control fan coils, fans, motor starters, valves, contactors, and circulator motors in heating and/or cooling systems. If larger motors than listed are to be controlled, relays or magnetic motor starters must be interconnected between motors and thermostats
- In specific hazardous atmospheres such as encountered in oil refineries, chemical plants, paint and varnish manufacturing plants, certain hazardous metal finishing areas, coal processing locations, granaries and grain processing plants

## Features:

- A heavy duty snap switch is mounted in the enclosure; the temperature sensitive element is mounted on the external surface of the cover and actuates the switch through a shaft and bearing mechanism
- An external knob permits temperature setting within calibrated range; the knob is removable to prevent unauthorized adjustment; room ambient is indicated on thermometer at front

## Certifications and Complies:

- NEC/CEC:
  - Class I, Division 1 & 2, Groups C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- NEMA/EEMAC: 7CD, 9EFG, 12
- UL Standard: 1203
- CSA Standard: C22.2 No. 30

## Standard Materials:

- Feraloy® iron alloy

## Standard Finishes:

- Electrogalvanized and aluminum acrylic paint

## Size Ranges:

- Hubs – 3/4" through-feed

## Electrical Rating Ranges:

- 120 / 240 VAC
- 50 / 60 hertz
- Full load current in amperes:

	120 VAC	240 VAC
Heating	10.2	6.5
Cooling	7.4	4.0

## Ordering Information:

# 3A HRC Bimetal Thermostat

Cl. I, Div. 1 & 2, Groups C, D  
Cl. II, Div. 1, Groups E, F, G  
Cl. II, Div. 2, Groups F, G  
Cl. III

Explosionproof  
Dust-Ignitionproof

## Applications:

HRC Bimetal Thermostats are used:

- To control heating only, cooling only or ventilation systems in demanding industrial environments
- In specific hazardous atmospheres such as encountered in oil refineries, chemical plants, paint and varnish manufacturing plants, coal processing locations, waste storage facilities, pulp and paper mills, granaries and grain processing plants or any other location where specific explosive gases or dusts are present

## Features:

- Bimetal sensing element that is fast acting, reliable and unaffected by altitude
- Compact, lightweight design makes it easy to install
- No exposed copper or brass parts for excellent resistance to corrosion
- Feed-through design for easy installation
- Durable all aluminum exterior
- Available for heating only or heating or cooling/ventilation applications

## Certifications and Compliances:

- NEC/CEC:
  - Class I, Division 1 & 2, Groups C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- UL Standard: 1203
- CSA Standard: C22.2 No. 30

## Standard Materials:

- Copper-free aluminum

## Standard Finishes:

- Natural

## Size Ranges:

- Conduit opening – 3/4" hub

## Electrical Ratings:

- 480 VAC max
- 1/2 HP @ 120 VAC
- 1 HP @ 250 VAC
- 22 amps Res.

## Temperature Range:

- 36°F to 82°F (2°C to 28°C)
- Temperature differential: 2.5°F (1.5°C)

## Ordering Information

Hub Size	Description	Cat. #
3/4"	Single Pole, Single Throw (heating only)	HRC1
3/4"	Single Pole, Double Throw (heating or cooling/ventilation applications)	HRC2

## Dimensions In Inches:

## Factory-sealed

### Applications:

Type TCH electric clocks are used:

- In oil refinery control rooms, hospital operating rooms, chemical plants, grain handling and processing plants and other similar locations where specific hazardous atmospheres may exist

### Features:

- Sheet steel case may be used where environmental conditions are not severe; electric motor and connections are contained in corrosion-resistant enclosure; dials are 13" in diameter; reset knob protrudes from bottom of case
- Disassembly for installation and maintenance is easily performed; the motor housing is factory-sealed, with no external seals required

### Certifications and Compliances:

- NEC:
  - Class I, Division 1 & 2, Groups C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- UL Standard: 1203

### Standard Materials:

- Clock body and cover – sheet steel
- Motor housing – copper-free aluminum

### Standard Finishes:

- Aluminum – aluminum acrylic paint
- Sheet steel – baked aluminum enamel

### Size Ranges:

- Hubs – 1" through-feed

### Electrical Rating Ranges:

- 110VAC, 60 hertz
- Self-starting synchronous motor – 3 watts

### Options:

The following special options are available:

**Description** **Suffix**  
 Sheet metal band notched for conduit, can be supplied for enclosing gap between wall surface and back of case **See listings**

Sheet Steel Case

### Ordering Information:

Enclosure with Clock Motor	Hub Size	Style	Cat. #	Enclosing Sheet Metal Band Cat. #

# 3A ETW Telephones

Cl. I, Div. 1 & 2, Groups B, C, D  
 Cl. II, Div. 1, Groups E, F, G  
 Cl. II, Div. 2, Groups F, G  
 Cl. III

Explosionproof  
 Dust-Ignitionproof  
 Raintight  
 Wet Locations

## Applications:

ETW series telephones are used:

- For communication in areas which may be hazardous due to the presence of flammable gases or vapors, and/or combustible dusts
- In chemical plants, oil refineries, bulk loading stations, paint and varnish manufacturing plants, grain processing and similar industries

## Features:

- Modern styled, pushbutton wall-mount unit is very rugged in design, suitable for the harshest industrial applications
- Large, easy to read keyboard allows gloves-on operation
- Cast copper-free aluminum housing, with baked on powder coat finish, is highly resistant to corrosive atmospheres
- Units are tone or pulse compatible and offer superior audio clarity
- Handset cord features a pin-type connector for easy field replacement; handset circuit is intrinsically safe
- Up to ten units can be connected on one line

ETW401

## Certifications and Compliances:

- NEC/CEC:
  - Class I, Divisions 1 & 2, Groups B, C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
- UL Standard: 1203, 698
- CSA Standard: C22.2 No. 30
- FCC Approved

## Standard Materials:

- Enclosure – copper-free aluminum
- Handset – high impact plastic

## Standard Finishes:

- Enclosure – baked powder paint (safety blue)

## Accessories:

- A standard volume explosionproof ringer (**ETR1**) is available, see page 714 for listing.
- For locations with a high level of ambient noise, a louder ringer can be installed. An ESR bell or ETH horn may be used by installing an ETC relay between the telephone line switch and the bell or horn. The relay coil is energized by the ringing current and the relay contacts control a separate power source to the signal.

## Ordering Information:

Description	Cat. #
Phone w/ handset	ETW401

## Telephones for Hazardous Areas

### Ex-ResistTel, FernTel IP - Hazardous Area Communication Series

#### Applications:

Industrial telephones developed specifically for the harsh and hazardous environments are found in:

- Oil refineries, petrochemical plants, offshore platforms, marine applications and industrial manufacturing.

These telephones can handle large temperature differences found outdoors, high humidity and exposure to sea water, as well as heavy mechanical wear and tear.

#### Features:

Ex-ResistTel – Hazardous Analog Telephone

- Fully encapsulated electronics in robust glass fiber-reinforced polymer housing with ½” NPT conduit entries and Type 4X (IP66) protection
- Programmable with alphanumeric display and a 21-piece stainless steel lighted keypad
- Hermetically sealed non-contact hook sensing switch improves system reliability
- Captive cover screws prevent loss during installation
- Ventilation/pressure balancing plug eliminates moisture collection inside the enclosure
- 10 ringing melodies, maximum 50 directory entries; multiple languages available
- Operating Environment from -20°C to +40°C
- Ringer output: 90dB; noise suppression: 3dB

FernTel IP – Hazardous Voice over Internet Protocol Telephone

- Corrosion resistant polycarbonate housing with ½” NPT conduit entries and Type 3 (IP65) protection
- Programmable with alphanumeric illuminated display and a 21-piece lighted keypad
- Hermetically sealed non-contact hook sensing switch improves system reliability
- Captive cover screws prevent loss during installation
- Power supply: PoE (power over ethernet) with no separate power supply required
- Operating Connection: 10/100 BASE-T Ethernet LAN
- Protocol: H323 and SIP
- Operating Environment from -20°C to +55°C
- Ringer Output: 95dB

Ex-ResistTel

FernTel IP

#### Certifications and Compliances:

Ex-ResistTel

- Class I, Division 2, Groups A, B, C, D T6
- Type 4X, IP66 to EN 60529
- UL & cUL
- FCC: Parts 15 and 68 hearing aid compatible
- TIA-968-A & CS-03 Part 1

FernTel IP

- Class I, Division 2, Groups A, B, C, D T5
- Type 3, IP65 to EN 60529
- UL & cUL

#### Standard Materials:

- Enclosure – Glass fiber-reinforced polymer (Ex-ResistTel); Polycarbonate (FernTel IP)
- Keypad, Faceplate, Trip, Armored Cord – 316 SST

#### Dimensions & Weights:

- Ex-ResistTel – 10.5” x 9” x 5.3”; 12 lbs
- FernTel IP – 12” x 8” x 5”; 5.5 lbs

 Wet Locations

## Features:

- ETC232 power relays are used with ESR bells and ETH, W2H or WH horns; the relay coil is energized by the telephone ringing circuit, and the relay contacts control the separate 115VAC, 60 hertz power source
- ETR1 external ringer for ETW401 telephone; for low ambient noise areas, ring tone level is similar to a general use telephone; includes a ring detect relay which is powered by the telephone line voltage, (maximum 90VAC)

## Certifications and Compliances:

- NEC/CEC:
  - Class I, Division 1 & 2, Groups B\*, C, D
  - Class II, Division 1, Groups E, F, G
  - Class II, Division 2, Groups F, G
  - Class III
- UL Standard: 1203
- CSA Standard: C22.2 No. 30

## Standard Materials:

- Bodies – copper-free aluminum
- Covers – copper-free aluminum

## Standard Finishes:

- Aluminum – baked epoxy powder paint

XDT Hazardous Location Dry-Type Transformers	see pages 716–718

# 4A XDT Hazardous Location Dry-Type Transformers

Cl. I, Div. 2, Groups A, B, C, D NEMA 3R, 4X

## Resin Encapsulated Dry-Type Series

Eaton's Crouse-Hinds Hazardous Location Dry-Type Transformers provide safe and efficient electric power distribution in the most extreme harsh and hazardous locations.

### Applications:

Eaton's Crouse-Hinds Hazardous Location Dry-Type Transformers are designed to operate where volatile flammable liquids or gases are handled, processed, or used, and where ignitable concentrations of gases or vapors are normally prevented by positive mechanical ventilation, such as:

- Refineries
- Chemical and petrochemical plants
- Mining
- Corrosive process facilities
- Indoor and outdoor industrial applications

### Features:

- Resin-encapsulated core-coil assembly for reliable performance in extreme environments
- NEMA 3R and 4X enclosures provide essential ingress protection
- 180°C insulation system with 115°C winding temperature rise creates optimal loading capabilities
- Ratings: single phase - 0.5 kVA through 37.5 kVA; three phase - 3 kVA through 150 kVA
- Custom configurations available to meet customer specifications

### Certifications and Compliances:

- Class I, Division 2, Groups A, B, C, D
- NEMA 3R, 4X
- UL Standard 1604
- cUL to C22.2 No. 66 and C22.2 No. 213-M1987

### Standard Materials:

- Enclosure – painted steel (NEMA 3R) or 316 stainless steel (NEMA 4X)
- Windings – aluminum or copper

### Electrical Ratings:

- Single phase: 0.5 to 37.5 kVA
- Three phase: 3 to 150 kVA
- 180°C insulation
- 115°C winding temperature rise
- Frequency: 60 Hz
- Impedance: 2 to 5%

### Options:
