System **PKZ 0** refers to all of the components and accessories which make up the line of **PKZM 0** Motor Protectors. It is a modular system, with ample flexibility and comprehensive ratings to accommodate a broad range of industrial control motor switching and protection requirements.

System **PKZ 0** components are in compliance with all pertinent international and domestic standards and can be installed world-wide.

Maximum ratings: 25 Amps, 600 V AC

Manual Motor Protectors, Motor Protectors with Contactor
Motor Starter Combinations

7

- 1 Manual Motor Protector**
 Thermal-Magnetic Motor Protector
 Rated up to 25 Amps
 Maximum 3 Phase HP rating: 15/ 20 @ 460/ 575 V AC
 UL Listed for Group installations per NEC 430-53
 CSA Certified for Group installations per CEC Part 1, 28-206
 High Short Circuit Rating: Up to 50 kA @ 600 V AC
 UL Listed, CSA Certified, in Conformity with IEC/EN 60 947
 CE Marked
 Type: **PKZM 0**-...
- 2 Current Limiter Module**
 Increases short circuit current rating of the **PKZM 0**.
 Fuseless, current limiting set of contacts housed in a module.
 Mounts directly beneath or ahead of the **PKZM 0**.
 Type: **CL-PKZ 0**
- 3 Auxiliary Contact Modules**
 Signals ON/OFF status of **PKZM 0** Motor Protector and Motor Protector + Contactor combination.
 Trip indicating contacts which differentiate between overload and short circuit tripping.
 Early-Make contacts for use with undervoltage trips.
 Type: **NHI**-..., **AGM**-..., **VHI**-...
- 4 Magnetic Contactor Module**
 AC or DC operated versions.
 Supplied with 1 N.O./1N.C. or 2 N.O. contacts.
 Plugs into the load side of the **PKZM 0** protector or can be separately mounted.
 Rated 7 1/2 HP @ 460 V AC/ 10 HP @ 575 V AC
 UL Listed with **PKZM 0** Motor Protector for Group installations per NEC 430-53.
 CSA Certified with **PKZM 0** Motor Protector for Group installations per CEC 28-206.
 IEC 60 947-4-1 rated for Type 1 co-ordination.
 Type: **SE 00**-...
- 5 High Capacity Magnetic Contactor Module**
 Same approvals & features as Type **SE00** above except: Internal current limitation feature to increase short circuit current rating and self-protection characteristics per IEC/EN 60 947.
 IEC 60 947-4-1 rated for Type 2 co-ordination.
 Type: **S 00**

- 6 Door Mounted Handle**
 Rated IP 65/ NEMA/UL 12, 3R.
 3 Positions- ON, OFF, Tripped.
 Door interlocking feature and padlockable with up to 3 padlocks. (Also available without door interlocking or padlockable feature.)
 Plug-in extension shaft to accommodate various mounting depths.
 Black, or Red/Yellow for E-Stop function
 Type: **(R)H-PKZ 0**, **HSOV-PKZ 0**
- 7 Voltage trips**
 Undervoltage trip module
 Shunt trip module
 Mounts to the side of the **PKZM 0**.
 Type: **U-PKZ0**, **A-PKZ0**
- 8(1+4) Magnetic Motor Protector Combination**
 Thermal-Magnetic Motor Protector (1) combined with the Magnetic Contactor Module (4) on a clip plate, suitable for DIN rail mounting (EN 50 022).
 Maximum rating: 7 1/2 HP @ 460 V AC/ 10 HP @ 575 V AC
 UL Listed for Group installations per NEC 430-53.
 CSA Certified for Group installations per CEC 28-206.
 High Short Circuit Rating: Up to 50 kA @ 600 V AC
 UL Listed, CSA Certified, in Conformity with IEC/EN 60 947 IEC 60 947-4-1 rated for Type 1 co-ordination.
 CE Marked
 Type: **PKZM 0**-.../SE 00
- 9(1+5) Magnetic Motor Protector Combination with High Capacity Contactor**
 Thermal-Magnetic Motor Protector (1) combined with the High Capacity Magnetic Contactor Module (5) on a clip plate, suitable for DIN rail mounting (EN 50 022).
 Maximum rating: 7 1/2 HP @ 460 V AC/ 10 HP @ 575 V AC
 UL Listed for Group installations per NEC 430-53
 CSA Certified for Group installations per CEC 28-206.
 High Short Circuit Rating: Up to 50 kA @ 600 V AC
 UL Listed, CSA Certified, in Conformity with IEC/EN 60 947 IEC 60 947-4-1 rated for Type 2 co-ordination.
 CE Marked
 Type: **PKZM 0**-.../S 00
- 10 Mounting/Wiring**
 Clip plate, onto which the compact motor protector combinations **PKZM 0**-.../S(E) 00 are mounted.
 Suitable for DIN rail mounting (EN 50 022).
 Other Mounting/Wiring Hardware:
 - Adapters for direct busbar feeds in control panels.
 - Mounting and Wiring system Type **MVS**-... to combine **PKZM 0** protectors with Type **DIL**...**M** magnetic contactors. (Refer to Section 3 for **DIL**...**M** info.)
 Refer to pages 7/16-18 for additional details on these mounting and wiring accessories.

System PKZ 0 Motor Protectors in Group Motor Applications

PKZM 0 motor protectors are UL listed and CSA certified for group applications as per the intent of NEC 430-53 and CEC part 1, Rule 28-206. This eliminates the need for individual motor branch circuit overcurrent protective devices for each motor, thus greatly reducing the cost and space requirements of industrial control panels and assemblies.

In group installations involving a number of **PKZM 0** motor protectors, the maximum rating of the group branch circuit overcurrent protective device is based on the lowest backup overcurrent rating marked on each motor protector in the group, combined with applicable NEC installation rules.

Please refer to the UL/CSA short circuit current and backup overcurrent protection ratings in columns 8-10 for selection guidelines on **PKZM 0** Motor protectors.

1) Higher short circuit ratings can be obtained by use of the **CL-PKZ0** accessory: (See page 7/11).
 - **PKZM 0-... + CL-PKZ0**: 50 kA @ 600 V AC, for 10 A and 16 A models
 - **PKZM 0-... + CL-PKZ0**: 18 kA @ 600 V AC, for 20 A and 25 A models

1/2	1/2	1	1 1/2
1	1	2	3
1 1/2	1 1/2	3	5
2	3	7 1/2	10

The **PKZM 0.../SE 00** and **PKZM 0.../S 00** are motor protector combinations made up of **PKZM 0...** manual motor protectors (see page 7/6) and System **PKZ 0** magnetic contactors (Types **SE 00** and **S 00**).

These Motor Protector combinations are UL listed and CSA certified as assemblies which provide motor controller functions and running overload protection. In addition, they are UL listed and CSA certified for group applications as per NEC 430-53(c) and CEC part 1, Rule 28-206. This means that a group of motors, each protected and controlled by a **PKZM 0.../S(E) 00**, can be combined under a single branch circuit short circuit and ground fault protective device, the maximum rating of which is marked on each **PKZM 0** motor protector. (See columns 8-10 for UL/CSA short circuit current and backup overcurrent protection ratings.)

Features:

- Ratings: 11 Amp, 600 V AC - 7 1/2 HP @ 460 V, 10 HP @ 575 V max.
- Approved for world markets = UL, CSA, IEC/EN 60 947, CE Marked
- Conformity with "Type 1" and "Type 2" co-ordination levels
- Phase failure sensitive & ambient compensated.
- Adjustable thermal trips set to motor FLC or nameplate current.
- Fixed instantaneous magnetic trip response.
- Open or door mounted handle, padlockable, with 3 position indication (ON, OFF, Trip). See Accessories on page 7/15
- 'Finger Safe' construction.
- Assembled on clip plate for 35 mm DIN rail or panel mounting.

Ordering Information: Specify Type from column 4 and add desired control voltage. Example: **PKZM 0-10/SE 00-11 (120V, 60Hz)**

Note:
DC operated versions come standard with built-in surge suppressors.
Surge Suppressors available for AC versions as an option. See page 7/12

Group Motor Applications

PKZM 0.../S(E) 00 Motor Protector combinations are UL listed and CSA certified for group applications as per the intent of NEC 430-53 and CEC part 1, Rule 28-206. This eliminates the need for individual motor branch circuit overcurrent protective devices for each motor, thus greatly reducing the cost and space requirements of industrial control panels and assemblies.

In group installations involving a number of System **PKZ 0** motor protectors, the maximum rating of the group branch circuit overcurrent protective device is based on the lowest backup overcurrent rating marked on each motor protector in the group, combined with applicable NEC installation rules.

Please refer to the UL/CSA short circuit current and backup overcurrent protection ratings in columns 8-10 for selection guidelines on **PKZM 0** and **PKZM 0.../S(E) 00** motor protectors.

Additional Notes:

PKZM 0.../SE 00 Motor Protector combinations are in conformity with Type 1 co-ordination levels @ up to 500 V AC, per IEC/EN 60 947-4-1.

PKZM 0.../S 00 Motor Protector combinations are in conformity with Type 2 co-ordination levels @ up to 500 VAC, per IEC/EN 60 947-4-1. Further, during UL/CSA short circuit testing of this combination, no heater burn-out or contact welding occurred.

1) UL Type 12 currently under submittal

Ordering Information:
Specify Type from Column 6.
Example: **CI-PKZ 0-G**

System PKZ 0- Motor Protector Accessories- Clip plates, Handles, Indicating Lights

1	2	3	4
	Notes	Type	Price
Clip Plate			
	Always necessary when combining a PKZM 0 manual protector and a S(E) 00 magnetic contactor to create a magnetic Motor Protector Combination. Can be either panel mounted with screws or DIN rail mounted using one 15 mm height rail or two 7.5 or 15 mm height rails. DIN rails must conform to EN 50 022-35.	C-PKZ 0	See Price List
Door Coupling Handles UL/NEMA 12 / IEC IP 65¹⁾ Drive dog and A-H-PKZ 0 extension shaft supplied with all door coupling handles. The extension shaft can be cut to any required length to accommodate mounting depths of 100 – 240 mm.			
	For use as Main Switch. Door/Cover interlocked when switch is in the ON position. Color: Black with On/Off and "+" (Trip) switch positions, lockable in OFF position using three 4 - 8 mm padlocks. Can also be modified to be lockable in the ON position.	H-PKZ 0	See Price List
	For use as Main Switch with Emergency-Stop function. Door/Cover interlocking feature. Color: Red/yellow with On/Off and "+" (Trip) switch positions, lockable in OFF position using three 4 - 8 mm padlocks.	RH-PKZ 0	See Price List
	Simpler mechanism, without any door/cover interlocking or padlocking capability. Color: Black, with On/Off and "+" (Trip) switch positions.	HSOV-PKZ 0	See Price List
1/4" Padlockable Knob for Manual Protector			
	Replaces standard PKZM 0 knob handle with a padlockable version. Accommodates 1/4" padlocks (range: 3 – 6.35 mm). Padlockable in OFF position.	AK-PKZ 0	See Price List
Tamper sealing Cover			
	To prevent unauthorized access to the Motor FLC thermal trip dial setting and the Test-to-Trip function. Uses conventional lead seal.	PL-PKZ 0	See Price List
Indicator Lights			
	For CI23X-..., CI-PKZ 0-..., E-PKZ 0-... Enclosures and Housings		
	Color: White	Voltages: 110 - 230 V	L-PKZ 0 (230V)
		230 - 400 V	L-PKZ 0 (400V)
		415 - 500 V	L-PKZ 0 (500V)
	Color: Green	Voltages: 110 - 230 V	L-PKZ 0-GN (230V)
		230 - 400 V	L-PKZ 0-GN (400V)
		415 - 500 V	L-PKZ 0-GN (500V)

System PKZ 0- Motor Protector MVS Mounting and Wiring Accessory Kits for Motor Starter Combinations

1	2	3	4	5	6
	For Use With PKZM 0 Motor Protectors + DIL...M Magnetic Contactors (Refer to Section 3 for info on Type DIL...M contactors.)	UL/CSA Maximum 3 Phase HP Rating @: 460 V 575 V	MVS Kit Type	Price	Remarks

Full Voltage, Non-Reversing Starter Combinations

	PKZM 0 + DIL (E)EM	5	5	MVS-D4	Includes a mounting plate and finger-safe wiring harness to accommodate FVNR motor starter combinations consisting of PKZM 0 Motor Protectors and DIL...M Magnetic Contactors in various HP sizes. UL listed/CSA certified for group installations and high fault short circuit current ratings (see page 7/19) in association with Moeller Electric components.
	PKZM 0 + DIL 00(A)M	7½	10	MVS-D5	
	PKZM 0 + DIL 0M	10	15	MVS-D11	
	PKZM 0 + DIL 0AM	15	20	MVS-D11	

Accommodates Mechanically Interlocked Contactors

	PKZM 0 + DIUL (E)EM/21/MV	5	5	MVS-W4	Includes a mounting plate and finger-safe wiring harnesses to accommodate FVR motor starter combinations consisting of PKZM 0 Motor Protectors and DIL...M mechanically interlocked Magnetic Contactors in various HP sizes. UL listed/CSA certified for group installations and high fault short circuit current ratings (see page 7/19) in association with Moeller Electric components.
	PKZM 0 + DIUL 00(A)M/11/MV	7½	10	MVS-W5MV	
	PKZM 0 + DIUL 0M/11/MV	10	15	MVS-W11MV	
	PKZM 0 + DIUL 0AM/11/MV	15	20	MVS-W11MV	

Star-Delta Starter Combinations

Open Transition

	PKZM 0 + DIL EM/EEM +DIL ET 11-30-A	7½	10	MVS-S5	Includes a mounting plate and finger-safe wiring harnesses to accommodate Star-Delta motor starter combinations consisting of PKZM 0 Motor Protectors, electronic timing relays and DIL...M Magnetic Contactors in various HP sizes. UL listed/CSA certified for group installations and high fault short circuit current ratings (see page 7/19) in association with Moeller Electric components.
	PKZM 0 + DIL 00AM/00M +ETR 4-51-A	10	15	MVS-S7	
	PKZM 0 + DIL 0M/00AM +ETR 4-51-A	15	20	MVS-S11	

For PKZM 0 Motor Protector Combinations

	PKZM 0-.../SE 00 PKZM 0-.../S 00			MVS-C45-S	Mounting Plate to combine PKZM 0-.../S(E) 00 Motor Protector Combinations with other MVS starters. Also allows feed using bus bar connectors (page 7/16).
--	---	--	--	------------------	---

Notes:

Control Circuit Voltage

The **MVS** System wiring harnesses are designed to accommodate **DIL (E)EM** contactors that are either AC or DC energized and **DIL...M** contactors that are AC energized only.

Surge Suppressors for DIL...M contactors

The following surge suppressors can be used with **DIL...M** contactors mounted on **MVS** mtg. plates:
RC B DIL 250 (RC filter), **VG B DIL 250** (Varistor suppressor) and **FD B-DIL** (diode suppressor)

Refer to Section 3 for more information on **DIL (E)EM** and **DIL M** contactors.

Ordering Information:

Specify Type from Column 4.
 Example: **MVS-D5**

MVS System

The **MVS** system consists of mounting plates and wiring harnesses designed to combine **PKZM 0** Motor Protectors and **DIL...M** Magnetic Contactors in various Motor Starter configurations.

MVS Motor Starter Combinations are UL Listed and CSA Certified for group installations per the intent of NEC 430-53 and are also rated for high fault current ratings in association with listed upstream protective circuit breakers or fuses.

The **MVS** mounting and wiring system greatly cuts down the amount of mounting and wiring assembly time normally associated with motor starters and is thus ideally suited for use in industrial control panels.

Installation Instructions

The **MVS** System Mounting plates are equipped with DIN Rails onto which **PKZM 0** Motor Protector and **DIL...M** Magnetic Contactors are securely fastened. Each **MVS** type comes with its own set of wiring harnesses to accommodate a number of starter configurations such as Full Voltage Non-Reversing and Full Voltage Reversing combinations. Once the wiring harness is in place it will provide a finger-safe connection between the Motor Protector and Contactor(s). One size screwdriver is the only tool required to complete the assembly. The mounting plate itself can either be panel mounted using screws or snapped onto a 35 mm DIN rail (EN 50 022) for quicker assembly. Depending on the starter type, assembly and wiring time is reduced by more than 50% over conventional methods. In addition to the time saving, the **MVS** System kits will further lower costs by reducing overall panel space requirements.

Full Voltage Non-Reversing Combinations: **MVS-D...**

Full Voltage Reversing Combinations: **MVS-W...(MV)**

Star-Delta Combinations **MVS-S...**
