

max. 24 m³/h

DC axial fans

Series 400 J 40 x 40 x 25 mm

Highlights:

- Very rigid compression curve for high air flow at high back pressure.
- Low operating noise level at high back pressure.

General characteristics:

- Material: fibreglass-reinforced plastic. Impeller PA, housing PBT.
- Fully integrated electronic commutation.
- Protected against reverse polarity and locking.
- Connection via single strands AWG 26, TR 64. Bared and tin-plated.
- Air exhaust over struts. Direction of rotation counter-clockwise, seen on rotor.
- Mass: 50 g.

Speed signal /2

- Speed-proportional, square-wave signal for external monitoring of the fan motor speed
- 2, 3, or 6 pulses per revolution
- Open-collector signal output
- Extremely wide operating voltage range
- Easy adaptation to user interface
- Connection via separate cable
- The sensor signal also serves as a major comparison variable for setting and maintaining the setpoint speed for interactive or controlled cooling with one or more interconnected fans.

Electrical hookup

All voltages measured to ground.
External load resistor R_a / U_S / U_{BS} required.

Signal output voltage

Standard signal for all models (exceptions see below)

Signal frequency $[F] = 3 \times n / 60\text{Hz}$

For multi options control input and 4100 NH7 and NH8

Signal frequency $[F] = 3 \times n / 60\text{Hz}$

All TD Fans e.g. 6300 TD

Signal frequency $[F] = 6 \times n / 60\text{Hz}$

Subject to change

Note:

Fans that come with these fan specials could have variations with respect to the temperature range, voltage range, and power consumption compared to standard fans without specials.
