GN 115-NL with key

Zinc die casting / Stainless Steel, Operation with socket key, not lockable

SPECIFICATION

Version in Zinc die casting

Types

- Type **DK**: Operation with triangular spindle (DK7)
- Type VK7: Operation with square spindle A/F7
- Type VK8: Operation with square spindle A/F8
- Type SCH: Operation with slot
- Type **VDE**: Operation with double bit
- Type **SK10**: Operation with hexagon A/F10

Lock housing

Zinc die casting

Locating ring

- chrome plated (Standard)
- plastic coated, black, RAL 9005, textured finish SW

All other parts

Steel zinc plated, blue passivated

Version in Stainless Steel

Types

- Type **DK**: Operation with triangular spindle (DK7)
- Type VK7: Operation with square spindle A/F7
- Type VK8: Operation with square spindle A/F8
- Type SCH: Operation with slot
- Type VDE: Operation with double bit

Lock housing

Stainless Steel AISI 303 NI

Latch

Stainless Steel AISI 304

Protection class IP 65

INFORMATION

Latches GN 115 lock by a turning operation limited to 90° which moves the locking behind the door frame. The bevels of the latch ease the closing of the door.

Latches with different cranks cover a latch distance A from 4 to 50 mm. $\,$

The operating bolt of the stainless steel version is fitted with an O-ring for sealing.

Latches GN 115 are supplied with loosely enclosed latch.

TECHNICAL INFORMATION

- List of latch types (see page 1456)
- IP Protection classes (see page A23)
- Stainless Steel characteristics (see page A26)

ACCESSORY

- Socket keys GN 119.2 (see page 1530)
- Protective caps GN 120 (see page 1486)
- Opening handles GN 120.1 (see page 1487)

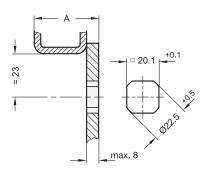

CONSTRUCTION AND ASSEMBLY INSTRUCTIONS

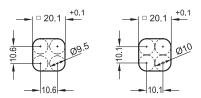

For installation, set a bore diameter in the door as shown in the outline drawing.

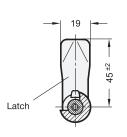

Once assembled, the latch is pushed through the bore diameter from the front. The hexagon nut can then be pushed over the latch from the back and bolted in place.

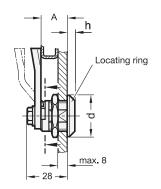

The **installation bore diameter** in the door leaf is usually generated by punching or laser machining in series production.

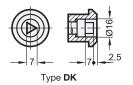

For small series and steel sheets below 2 mm thickness, the sheet metal punshes GN 123 (see page 1493) are the tool of choice. The installation bore diameter can also be set by drilling / milling as shown in the outline drawings.
