

# Surge arrester

## 2-electrode arrester

Series/Type: EHV62-H36B2 Ordering code: B88069X1693B252

Date: 2015-06-17

Version: 02

EPCOS AG is a TDK Group Company.

Surge arrester B88069X1693B252

## 2-electrode arrester EHV62-H36B2

#### **Features**

- Built to automotive standard (ISO/TS 16949)
- Small size
- Fast response time
- High current capability
- Stable performance over service life
- Low capacitance and insertion loss
- High insulation resistance
- RoHS-compatible

## **Applications**

## Automotive:

- On-board chargers
- Vehicle charging stations

#### Others:

- LED lighting
- Power supply
- Photovoltaic
- Air conditioning

## **Electrical specifications**

DC spark-over voltage 1) 2)	3600	V
Tolerance	±20	%
Min.	2880	V
Max.	4320	V
Impulse spark-over voltage		
at 100 V/µs - for 99% of measured values	< 4350	V
<ul> <li>typical values of distribution</li> </ul>	< 4150	V
at 1 kV/µs - for 99% of measured values	< 4500	V
- typical values of distribution	< 4300	V
at 5 kV/µs - for 99% of measured values	< 5000	V
· typical values of distribution	< 4500	V
Service life		
300 operations 8/20 µs	100	Α
3 operations 8/20 μs	3	kA
1 operation 8/20 μs	5	kA
Insulation resistance at 100 V <sub>DC</sub>	> 1	$G\Omega$
Capacitance at 1 MHz	< 1	pF
Arc voltage at 1 A	~ 45	V
Glow to arc transition current	< 0.3	Α
Glow voltage at 0.1 A	~ 240	V
AC withstand voltage (1 min)	1800	V
Weight	~ 1	g
Operation temperature	-40 +125	°C
Recommended storage		
- temperature	+5 +35	°C
- humidity	45 80	%
- period	≤ 2	years
Climatic category (IEC 60068-1)	40/125/21

Surge arrester	B88069X1693B252

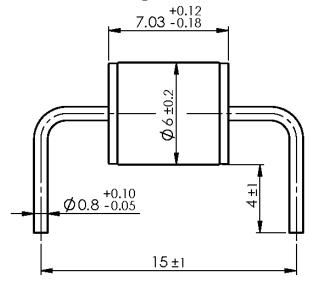

Marking, blue positive	EPCOS 3600 WWY
3/	3600 - Nominal voltage  WW - Calendar week of production  Y - Year of production (last digit)

Certifications UL 1449 (E319264)

2-electrode arrester

Terms and current waveforms in accordance with: ITU-T Rec. K. 12; IEC 61643-21; 61643-311; IEC 61663-2.

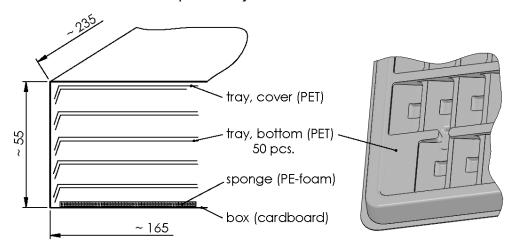

## Dimensional drawing in mm

## Ordering code and packing advice

B88069X1693**B252** = 250 pcs. in trays

PPD AB PD / PPD AB PM 2015-06-17

<sup>1)</sup> At delivery AQL 0.65 level II, DIN ISO 2859

<sup>2)</sup> In ionized mode

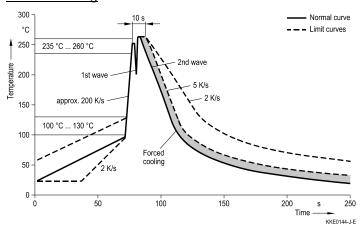

Surge arrester B88069X1693B252

#### 2-electrode arrester EHV62-H36B2

## Soldering parameter

#### Wave soldering

Wave profile features	Pb-free assembly
Solder	Sn 95.5 / Ag 3.8 / Cu 0.7
Solder bath temperature	263 (±3) °C
Dwell time	< 3 s

Soldering profile applied to a single soldering process.

#### **Cautions and warnings**

- Do not operate surge arresters in power supply networks, whose maximum operating voltage exceeds the minimum spark-over voltage of the surge arresters.
- Electromagnetic fields and ionizing radiation may affect the electrical characteristics of the arrester. The impact of such effects (inductive and capacitive field distortion from adjacent components) must be avoided by appropriate circuit design measures.
- Surge arresters may become hot in the event of longer periods of current stress (burn risk). In the event of overload the connectors may fail or the component may be destroyed.
- If the contacts of the surge arresters are defective, current load can cause sparks and loud noises.
- Surge arresters must be handled with care and must not be dropped.
- Do not continue to use damaged surge arresters.

## Display of ordering codes for EPCOS products

The ordering code for one and the same EPCOS product can be represented differently in data sheets, data books, other publications, on the EPCOS website, or in order-related documents such as shipping notes, order confirmations and product labels. The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products. Detailed information can be found on the Internet under www.epcos.com/orderingcodes

### Important notes

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
- 6. Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
- 7. The trade names EPCOS, Alu-X, CeraDiode, CeraLink, CeraPad, CeraPlas, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, ExoCore, FilterCap, FormFit, LeaXield, MiniBlue, MiniCell, MKD, MKK, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, PQSine, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, TFAP, ThermoFuse, WindCap are **trademarks registered or pending** in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
