SERIES

Mechanical time switches

- Daily time setting*
- Weekly time setting**

Type 12.01

- Daily
- 1 CO 16 A
- 35.8 mm wide
- 35 mm rail mount

Type 12.11

- Daily
- 1 NO 16 A
- 17.5 mm wide
- 35 mm rail mount

Type 12.31-0000

- Daily
- 1 CO 16 A
- 72 x 72 mm
- Front panel mount

Type 12.31-0007

- Weekly
- 1 CO 16 A
- 72 x 72 mm
- Front panel mount

- Minimum time interval setting:
1 h (12.31-0007)
30 min (12.01)
15 min (12.11 - 12.31-0000)

* Same program every day

** Different program possible for each of the 7 days of the week

For outline drawing see page 14

- Mechanical daily time switch
- 1 CO 16 A
- 35 mm rail (EN 60715) mount
- Mechanical daily time switch
- 1 NO 16 A
- 35 mm rail (EN 60715) mount
- Mechanical daily or weekly
- 1 CO 16 A
- Front panel mounting

Type 12.51

Digital (analogue-style) time switch, daily/weekly programming

- Can be programmed in "Classic" mode via the joystick, or "Smart" mode via smartphones with NFC communication
- Minimum time interval setting - 30 minutes
- Easily configurable for daily or weekly programming

Type 12.81

Digital Astro-switch

- Can be programmed in "Classic" mode via the joystick, or "Smart" mode via smartphones with NFC communication
- Astro program: calculation of sunrise and sunset times through date, time and location coordinates
- Option for Astro ON period override, by timeswitch
- Location coordinates easily settable for most European countries through post codes
- Offset function: allows programming of switching times offset from the astronomic time (by up to 90 min, in 10 min steps)
- Summer/Winter European, Australian, Brazilian time
- 1 CO 16 A output contact
- LCD status indication, set-up and programming
- Lock with a 4-digit PIN
- Back-light display
- Internal battery for set-up and programming without supply, easily replaceable from the front
- Protective separation between supply and contacts
- 35 mm wide
- 35 mm rail (EN 60715) mount
- Cadmium free contact material

Approvals (according to type)

Weekly Astro time switch

- Suitable for applications where a variable light level is required - programmable via smartphone with NFC communications
- Compatible with power supply/ballasts with 0-10V or PWM inputs

Type 12.A4

- 1 analog output: 0-10V or PWM

• Functions:

- "Astro" ON, "Astro" OFF, ON/OFF
- Location coordinates easily settable for most European countries through Post codes
- Offset function: allows programming of switching times offset from the astronomic time (by up to 90 min, in 1 min step)
- Minimum time interval setting - 1 minute
- 50 storable programs
- Summer/Winter European, Australian, Brazilian time
- LCD status indication, set-up and programming
- Lock with a 4-digit PIN
- Back-light display
- Internal battery for set-up and programming without supply, easily replaceable from the front
- Protective separation between supply and contacts
- 35 mm wide
- 35 mm rail (EN 60715) mount
- Cadmium free contact material

NEW 12.A4

- Weekly programming
- 1 analog output: 0-10V or PWM

For outline drawing see page 15

Analogue output characteristics

| | |
|---------------|---------------------|
| Output signal | 0-10 V, 10mA max |
| Output signal | PWM 30 V, 20 mA max |

- ⊖ = Automatic
- I = Permanently ON

Type 12.31

Type 12.71

**Types 12.51
12.81**

Wiring diagrams

NB: All the outputs follow the same programming.

Two programming modes for type 12.51, 12.61, 12.62, 12.81, 12.A1, 12.A2, 12.A4

"Smart"

Mode via smartphones with NFC communication using Finder toolbox Android App.

"Classic"

Mode via the joystick

Android, Google Play and the Google Play logo are trademarks of Google Inc. Apple is a trademark of Apple Inc. App Store is a service mark of Apple Inc.

Finder Toolbox for programming

Once the App FINDER Toolbox is downloaded and installed, you can read an existing program, or program your device with maximum flexibility, changing the smallest details and saving your program directly to your smartphone.

At this point you simply touch the time switch with the smartphone to transfer the data.

Finder Toolbox for reference

Finder Toolbox provides all technical data sheets and news from Finder.

Functions type 12.81

The Override feature permits the 12.81 three different ways of functioning:

- 1 Classic function where the **AstroON** and **AstroOFF** times are determined by the geographic coordinates. These times vary every day.
- 2 Functions such that the output turns on according to the **AstroON** time and turns off according to the clock off-time OFF . Application example: shop window lighting on by **AstroON** at sunset and off OFF at 00:30.
- 3 Functions such that the output turns on according to the **AstroON** time and turns off according to the clock off-time OFF , and then turns back on at the clock on-time ON (for the remainder of the ASTRO time period). Application example: company car park lighting, on by **AstroON** at sunset, off end of the evening shift at 23:00 OFF . On again at the beginning of the morning shift at 5:00 ON and off automatically by **AstroOFF***

* Depending on the time of year (summer specifically) it may be that the override ON time will fall after the AstroOFF time. In this case, the output switches off at the AstroOFF time and the override ON time is ignored.

Power-save mode

If the 230 V AC supply is not connected, the time switch enters power-save mode: only the clock is maintained active whilst the display turns off so as to guarantee a long life for the built-in back-up battery. With a press to the joystick it is possible to “awake” the device and enter Display mode (with the “plug” symbol displayed). A further press to will enter the program or set-up mode as explained in the Display mode section above.

After about 1 minute of inactivity the power-save mode will start again. During program or set-up the current absorption is higher than in power-save mode, thus influencing the battery life.

In this mode the display back-light is not active. It is activated following a press to the joystick only with the 230 V AC supply connected, but after about 1 minute of inactivity the display back-light will turn off, and to activate it again it is necessary to press the joystick again.

Note: the output relay only functions if the power supply is connected.
