**Single-phase energy meter
with backlit LCD display**

Type 7M.24.8.230.0001

**S0 pulse output
kWh energy meter**

- Display of active energy consumption (kWh)
- Active power accuracy Class B according to EN 50470-3
- S0 pulse output for remote energy monitoring according to EN 62053-31
- Sealable tamperproof terminal shield
- Protection category II
- 35 mm rail (EN 60715) mount

NEW 7M.24.8.230.0001

- Reference current 5 A (40 A Maximum)
- S0 pulse output
- 1-phase 230 V AC
- kWh

Finder Toolbox NFC App for programming

Once the FINDER Toolbox NFC App is downloaded and installed, you can easily program your device thanks to NFC technology. One of the main features is that even in the absence of the power supply network, it is possible to read an energy counter, read the existing configuration, change the communication protocol parameters, or save and share the settings.

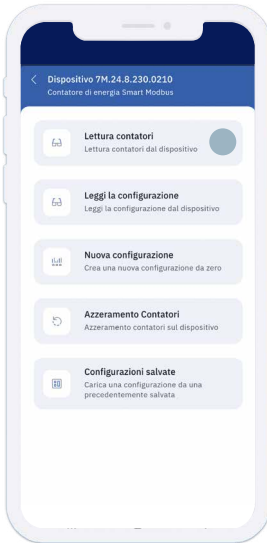

All that is required for the transfer of data is to simply touch the device with the smartphone.

Finder Toolbox for information

Finder Toolbox can provide you with all the latest technical data sheets and news from Finder.

Example using the NFC Toolbox APP

Reading Counters

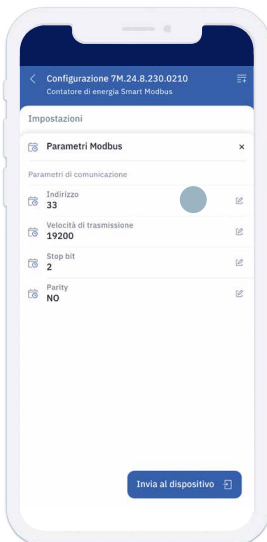

If you want to read all the energy counters select **"Read Counters"**

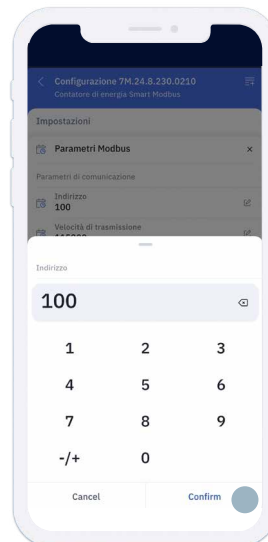

Even in the absence of the power supply network all the measurements made are readable thanks to the App - not just MID values.

Modbus parameter settings

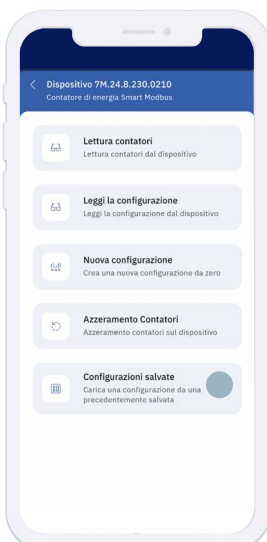

Select **"Address"** in order to change default values

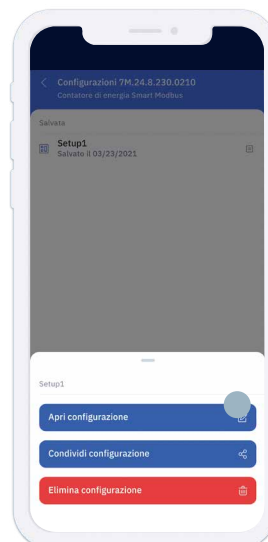

write the new address: **100**.
Click **"Confirm"**

Saved configuration
