## Notes:

${ }^{1}$ All ac voltage ranges are specified from $1 \%$ to $100 \%$ of range. Because inputs below $1 \%$ of range are not specified, it is normal for this and other true-rms meters to display non-zero readings when the test leads are disconnected from a circuit or are shorted together. For volts, crest factor of $\leq 3$ at 4000 counts, decreasing linearly to 1.5 at full scale. AC volts is ac coupled and ac mV is dc coupled.
${ }^{2}$ Frequency is ac coupled, 5 Hz to 50 kHz for ac voltage. Frequency is dc coupled, 45 Hz to 5 kHz for ac current.
