## POWER RELAY

## 1 POLE - 1/3/5/10A Medium Load Control

## LZ Series

## - FEATURES

- UL, CSA, SEV recognized
- Contact rating types - Low level to 10 amps switching
- Standard and high sensitivity types available
- High surge strength version available
- UL class B $\left(130^{\circ} \mathrm{C}\right)$ insulation type available (only plastic sealed type)
- Printed circuit terminals - 0.1 " grid pitch
- Plastic sealed type, RTIII
- RoHS compliant.

Please see page 9 for more information

## ■ PARTNUMBER INFORMATION

[Example] $\frac{\mathrm{LZ}}{(\mathrm{a})}-\frac{\mathrm{B}}{(\mathrm{b})} \frac{12}{(\mathrm{c})} \frac{\mathrm{H}}{(\mathrm{d})} \frac{\mathrm{M}}{(\mathrm{e})} \frac{\mathrm{S}}{(\mathrm{f})} \frac{\mathrm{E}}{(\mathrm{g})}-\frac{\mathrm{K}}{(\mathrm{h})} \frac{\mathrm{HV}}{(\mathrm{i})}-\frac{\mathrm{UC}}{(\mathrm{j})}$

## RoHS Compliance and Lead Free Information

## 1. General Information

- All relays produced by Fujitsu Components are compliant with RoHS directive 2011/65/EU including amendments.
- Cadmium as used in electrical contacts is exempted from the RoHS directives.

As per Annex III of directive 2011/65/EU.

- All relays are lead-free. Please refer to Lead-Free Status Info for older date codes at: http://www.fujitsu.com/downloads/MICRO/fcai/relays/lead-free-letter.pdf
- Lead free solder plating on relay terminals is $\mathrm{Sn}-3.0 \mathrm{Ag}-0.5 \mathrm{Cu}$, unless otherwise specified. This material has been verified to be compatible with PbSn assembly process.

## 2. Recommended Lead Free Solder Condition

- Recommended solder Sn-3.0Ag-0.5Cu.

## Flow Solder Condition:

```
Pre-heating: maximum \(120^{\circ} \mathrm{C}\) within 90 sec .
Soldering: dip within 5 sec . at \(255^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}\) solder bath
Relay must be cooled by air immediately after soldering
```

```
Solder by Soldering Iron:
Soldering Iron 30-60W
Temperature: maximum 350-360 }\mp@subsup{}{}{\circ}\textrm{C
Duration: maximum 3 sec.
```

## We highly recommend that you confirm your actual solder conditions

## 3. Moisture Sensitivity

- Moisture Sensitivity Level standard is not applicable to electromechanical relays, unless otherwise indicated.

## 4. Tin Whiskers

- Dipped SnAgCu solder is known as presenting a low risk to tin whisker development. No considerable length whisker was found by our in house test.
