

# MIL-DTL-83513/03 & /04 Micro-D Connectors Metal Shell Crimp, Pre-Wired

Micro-D  
MIL-DTL-83513

**Micro-D Pre-Wired Pigtails** — These connectors feature gold-plated TwistPin contacts and mil spec crimp termination. Specify aluminum shells for best availability. 100% tested and backpotted, ready for use.

**Choose the Wire Type To Fit Your Application** — For lightest weight and smallest diameter, select M22759/33 space grade insulated wire.

## APPLICATION NOTES

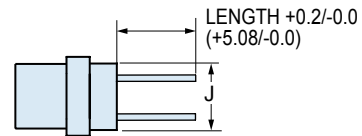

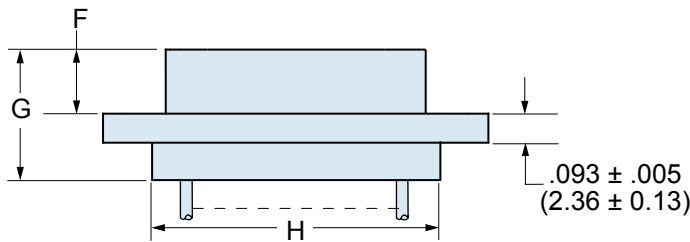

- Shell Material & Finish:** Cadmium plating offers better corrosion resistance compared to nickel, but cad is not acceptable for space or RoHS applications. Electroless nickel plated aluminum is recommended for new design activity. Or, choose stainless steel shells for corrosive environments.
- Tin-Plated Wire:** The next revision of the mil spec is expected to prohibit the use of pure tin. Glenair M83513 connectors do not contain any components exceeding 97% tin.
- M22759/33 Corrosion:** The M83513 spec contains a cautionary note regarding M22759/33 wire. The wire insulation is known to cause corrosion to metal parts when stored in a sealed environment. This corrosion has been observed on M83513 connectors. Glenair has implemented a packaging procedure to minimize or eliminate this problem. Connectors are individually wrapped with teflon tape, and the unit pack is a perforated paper envelope. M22759/33 continues to be the preferred wire for space applications.
