# TELEARM 120 and 180 <br> Telescoping Rods for Measurement of PE and RISO 

Probe extension for low-voltage and insulation measurement

TELEARM 120 and 180: 600 V CAT III; 300 V CAT IV

- TELEARM 120: maximum length 120 cm
- TELEARM 180: maximum length 180 cm

## Application

TELEARM is used as a test probe extension.
The test probe of the test and measuring instrument is plugged into the connector of the handle by means of the connector coil cable until it snaps into place. By turning the big locking wheels, TELEARM can be extended to the desired length and fixed, similar to a camera tripod.
For retracting, turn the telescopic element with the tip slightly in clockwise direction (on account of the internal spiral cable).
