# METRALINE DM 61/62 <br> Analog-Digital Multimeter 

- Voltage: DC / AC $100 \mu \mathrm{~V}$... 1000 V
- Current: DC / AC: $10 \mu A$... 660.0 mA (DM 61) / 10.00A (DM 62)
- Clip function 1000:1 for current transformers (DM 61 only)
- Resistance: $100 \mathrm{~m} \Omega$... $60.00 \mathrm{M} \Omega$
- Capacitance: 1 pF ... 40.00 mF (DM 62 only)
- Frequency: 10.00 Hz ... 10.00 MHz (DM 62 only)
- Diode / Continuity
- Duty cycle (\%) measurement (DM 62 only)
- Temperature TC with K-type: $-50 \ldots 1300^{\circ} \mathrm{C}$
- TRMS bandwidth: 2 kHz (DM 62 only)
- Hold / Peak / Min-Max / Relative (Zero)
- Auto / Manual ranging
- Dual digital display with analog scale and backlight
- ABS Automatic Blocking Sockets
- UL Certification
- 3 year warranty

## Features

## Automatic Blocking Sockets (ABS) *

Automatic blocking sockets prevent incorrect connection of measurement cables and inadvertent selection of the wrong measured quantity. This significantly reduces danger to the user, the instrument and the system under test, and eliminates it entirely in many cases.

## Automatic / Manual Measuring Range Selection

Measured quantities are selected with the rotary switch. The measuring range is automatically matched to measured values. The measuring range can be selected manually as well with the help of the AUTO/MAN key.

## Display of Negative Values at the Analog Scale

Negative values are also displayed at the analog scale for zerofrequency quantities, allowing for observation of measured quantity fluctuation around the zero-point.

## Storage of Measured Values

By pressing the HOLD/MIN/MAX key, the currently displayed measurement value can be "frozen" in the display.
The minimum and maximum values which were present at the input of the measuring instrument after activation of the MIN/MAX mode can be selectively "retained" with the MIN/ MAX function. The most important application is the determination of the minimum or maximum value during long-term observation of measurement quantities. MIN/MAX has no effect on the analog display; it continues to display the current measurement value.

## Continuity Test

Allows for the detection of short-circuits and interrupted conductors. In addition to displaying test results, an acoustic signal can also be generated if desired.

## Power Saving Circuit

The device is switched off automatically if the measured value remains unchanged for a period of approximately 15 minutes, and if none of the controls are activated during this time. Automatic shutdown can be deactivated.

## Protective Cover for Harsh Conditions

The instrument is protected against damage in the event of impacts or dropping by means of a soft rubber cover with tilt stand. The rubber material also assures that the instrument does not wander if it is set up on a vibrating surface.

## Duty Cycle Measurement - Square-Wave Signals

This function makes it possible to test circuits and transmission cables by measuring the frequency and the duty cycle of pulses.

## Voluntary Manufacturer's Warranty

36 months for material and workmanship

2.8 times/s

Emission
EN 61326: 2013 Class B

Immunity
IEC 61000-4-2:
8 kV atmosphere discharge
4 kV contact discharge
IEC 61000-4-3: $3 \mathrm{~V} / \mathrm{m}$
Short-term measured value deviation may occur during electromagnetic interference thus reducing the specified operating quality.

Safety:
Measuring category
IEC 61010-1-2010
600 V CAT III, 300 V CAT IV
The maximum voltage of 1000 V may only be used with CAT II.
High Voltage Test $\quad 6.7$ kV (IEC 61010-1-2010)

## Fuses

## Fuse for up to 660 mA ranges

FF (UR) $1.6 \mathrm{~A} / 1000 \mathrm{~V}$ AC/DC; $6.3 \mathrm{~mm} \times 32 \mathrm{~mm}$; rating 10 kA with 1000 VAC/DC and ohmic load; in conjunction with power diodes, protects all current measuring ranges up to 660 mA .

## Fuse for up to 10 A ranges (METRALINE DM 62)

FF (UR) $10 \mathrm{~A} / 1000 \mathrm{~V}$ AC/DC; $10 \mathrm{~mm} \times 38 \mathrm{~mm}$; rating 30 kA with 1000 VAC/DC and ohmic load; protects the 10 A ranges up to 1000 V AC/DC.

Defective fuses are not displayed.

Response Time (after manual range selection)

| $\begin{array}{c}\text { Measured Quantity/ } \\ \text { Measuring Range }\end{array}$ | $\begin{array}{c}\text { Response Time } \\ \text { Analog } \\ \text { Display }\end{array}$ |  | Digital Display |
| :---: | :---: | :---: | :---: | \(\left.\begin{array}{c}Transient response for <br>

step function of the <br>
measured quantity\end{array}\right)\)

## Reference conditions

Ambient temperature $23^{\circ} \mathrm{C}+2 \mathrm{~K}$
Relative humidity $45 \% \ldots 55 \% \mathrm{RH}$
Frequency of
measured quantity
Waveform of the
measured quantity sinusoidal
Battery voltage $\quad 3 \mathrm{~V} \pm 0.1 \mathrm{~V}$

## Environmental conditions

Functional
temperature range $\quad 0^{\circ} \mathrm{C} \ldots+50^{\circ} \mathrm{C}$
Storage
temperature range $\quad-25^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C}$ (without batteries)
Relative humidity 45 ... 75 \%
Altitude up to 2000 m

## Mechanical configuration

Protection
for the meter IP50
Pollution degree 2
Connection sockets IP20 according to
EN 60529 / DIN VDE 0470-1
Dimensions with holster: $86 \mathrm{~mm} \times 188 \mathrm{~mm} \times 53 \mathrm{~mm}$ without holster: $79 \mathrm{~mm} \times 174 \mathrm{~mm} \times 38 \mathrm{~mm}$
Weight $\quad 480 \mathrm{~g}$ approx., including battery and holster
