Greenliant®

Product Description

The SATA 2.5" ArmourDrive™ family consists of high-reliability, industrial solid state drives (SSDs) in a wide selection of capacities and endurance specifications. To better address customer needs, the 89 Series is available with 1-bit-per-cell (SLC), 2-bit-per-cell (MLC) or 3-bit-per-cell (TLC) 3D NAND configurations. ArmourDrive SSDs designed with Greenliant's EnduroSLC™ Technology can reach ultra-high write endurance of 250K+ program/erase (P/E) cycles. Operating at extreme temperatures, SATA 2.5" ArmourDrive is ideal for applications requiring removable data storage able to withstand the most demanding environments.

The 89 Series implements advanced NAND flash management technology to preserve data integrity and extend SSD lifespan. Built in the standard 2.5" form factor and backed by Greenliant's technical support, SATA 2.5" ArmourDrive gives industrial, computing, security, video and networking customers added flexibility when selecting reliable, hot-swappable solid state storage for embedded systems.
