SECURAL plus soft-face mallet • break-proof head and handle made from one piece of steel, rectangularand inserts, with special handle end

3380.140

Product Description

The SECURAL Plus is a further development of the SECURAL mallet: The special shape of the handle end is perfect for press fitting rubber seals. Depending on how you position the handle end, you will work with either a narrow or an extra wide surface, allowing you to press in seals of various different sizes.

Made of polyurethane, the medium hard and slightly protruding inserts are replaceable.
Perfectly balanced, the ratio of hammer head mass to shot mass in combination with the cushioning properties of the impact surfaces guarantees maximum rebound dampening. This allows the user to work with reduced strain on the joints while still applying extremely high impact forces.

Welded in longitudinal direction, the housing provides for a perfectly break-proof connection between hammer head and handle.

Product features:
• Handle end with a special shape for pressing in seals of various different sizes
• Made of polyurethane, the medium hard and slightly protruding inserts are replaceable
• Allows for noise-dampening and completely non-rebound work
• Extremely high impact force at low weight
• Perfectly break-proof connection between hammer head and handle thanks to the longitudinal welds of the housing

Application Areas

Window glazing, aluminium and plastic strip setting, press fitting rubber seals

Material

Version
• Robust sheet-metal housing with ergonomic rubber grip

Inserts
• Polyurethane, yellow, rectangular
• Medium hard
• noise-dampening
• Impact cushioning
• wear-resistant
