## Potted High Voltage (Plate) & Filament - 40 VA to 243 VA 300P Series

Universal Primary &amp; 50/60 Hz Operation

### Features

- A perfect match to our **1650P potted output transformers**.
- Enclosed in a drawn steel case, the transformer is completely potted in epoxy.
- Mounting hardware included.
- Primary: Universal - 100, 110, 120, 200, 220, 240 VAC 50/60 Hz.
- Bias Tap: 50 VAC tap from high voltage secondary C.T.
- Highpot tested: 2,000 VAC
- Faraday Copper Primary Shield: Our electrostatic shield reduces the capacitive coupling from the primary - greatly attenuating higher frequency current coupling to the secondaries (shield is internally grounded to the end bell).
- Windings: Concentric wound for low stray field and low noise
- Finish: Black powder paint to match our **1650P** series of potted output transformers
- Units can be run full wave bridge or full wave C.T.
- c UL us recognized (E207860)

**Classic**
**cRUS**
**✓RoHS**
