

RK8xx Series 8A TRIACS

DESCRIPTION:

High current density due to double mesa technology, glass passivation.

RK8xx series triacs are suitable for general purpose AC switching, They can be used as an ON/OFF function in applications such as static relays, heating regulation, induction motor starting circuits...or for phase control operation, light dimmers, motor speed controllers.

RK8xx are 3 quadrants triacs, They are specially recommended for use on inductive loads.
