

## RS12xxHxF Series 12A TRIACS

### DESCRIPTION:

High current density due to double mesa technology, glass passivation, guaranteed maximum junction temperature 150° C.

RS12xxH series triacs are suitable for general purpose AC switching, They can be used as an ON/OFF function in applications such as static relays, washing machine, soymlk maker, flush toilet, hair drier, induction motor staing circuits...or for phase contol operation light dimmers, motor speed controllers.

RS1210H-1220H-1235H-1250H are 3 quadrants triacs, They are specially recommended for use on inductive loads.

RS12xxHxF series are full pack plastic e, they provide a 2000V RMS isolation voltage from all three terminals to external heat sink.
