#### **DISCLAIMER**

HARVATEK reserves the right to make changes without further notice to any products herein to improve reliability, function or design. HARVATEK does not assume any liability arising out of the application or use of any product or circuit described herein; neither does it convey any license under its patent rights, nor the rights of others.

#### LIFE SUPPORT POLICY

HARVATEK's products are not authorized for use as critical components in life support devices or systems without the express written approval of the President of HARVATEK or HARVATEK INTERNATIONAL. As used herein:

- 1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
- 2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

| Tentative Product  | *******                 |               |                | HT-U16D        |
| Specifications are subject to change without notice. Data and drawings herein are copyrighted. |                         | Sep. 18, 2008 | Version of 1.0 | Page 4 of 4    |

#### Others:

Each immediate box consists of 5 reels. The 5 reels may not necessarily have the same lot number or the same bin combinations of Iv,  $\lambda_D$  and Vf. Each reel has a label identifying its specification; the immediate box consists of a product label as well.

### ATTENTION: Electrostatic Discharge (ESD) protection

The symbol to the left denotes that ESD precaution is needed. ESD protection for GaP and AlGaAs based chips is necessary even though they are relatively safe in the presence of low static-electric discharge. Parts built with AlInGaP, GaN, or/and

InGaN based chips are **STATIC SENSITIVE devices**. ESD precaution must be taken during design and assembly.

If manual work or processing is needed, please ensure the device is adequately protected from ESD during the process.

#### **Packing**

5 boxes per carton is available depending on shipment quantity.

|              | Specification        | Material                          | Quantity         |
|--------------|----------------------|-----------------------------------|------------------|
| Carrier tape | Per EIA 481-1A specs | Conductive black tape             | 2000pcs per reel |
| Reel         | Per EIA 481-1A specs | Conductive black                  |                  |
| Label        | HT standard          | Paper                             |                  |
| Packing bag  | 220x240mm            | Aluminum laminated bag/ no-zipper | One reel per bag |
| Carton       | HT standard          | Paper                             | Non-specified    |

#### Others:

Each immediate box consists of 5 reels. The 5 reels may not necessarily have the same lot number or the same bin combinations of Iv,  $\lambda_D$  and Vf. Each reel has a label identifying its specification; the immediate box consists of a product label as well.

| Official Product   | Product: HT-U16D Series |               |                | Data Sheet No. |
|--|-------------------------|---------------|----------------|----------------|
| Tentative Product  | *******                 |               |                | HT-U16D        |
| Specifications are subject to change without notice. Data and drawings herein are copyrighted. |                         | Sep. 18, 2008 | Version of 1.0 | Page 18 of 18  |

#### **Dry Pack**

All SMD optical devices are **MOISTURE SENSITIVE**. Avoid exposure to moisture at all times during transportation or storage. Every reel is packaged in a moisture protected anti-static bag. Each bag is properly sealed prior to shipment.

Upon request, a humidity indicator will be included in the moisture protected anti-static bag prior to shipment.

The packaging sequence is as follows:

| Official Product   | Product: HT-U16D Series |               |                | Data Sheet No. |
|--|-------------------------|---------------|----------------|----------------|
| Tentative Product  | *******                 |               |                | HT-U16D        |
| Specifications are subject to change without notice. Data and drawings herein are copyrighted. |                         | Sep. 18, 2008 | Version of 1.0 | Page 19 of 19  |

#### **Reflow Soldering**

- Recommended tin glue specifications: melting temperature in the range of 178~192 °C
- The recommended reflow soldering profile is as follows (temperatures indicated are as measured on the surface of the LED resin):

#### Lead Solder Profile

#### Lead-free Solder Profile

| Official Product   | Product: HT-U16D Series |               |                | Data Sheet No. |
|--|-------------------------|---------------|----------------|----------------|
| Tentative Product  | *******                 |               |                | HT-U16D        |
| Specifications are subject to change without notice. Data and drawings herein are copyrighted. |                         | Sep. 18, 2008 | Version of 1.0 | Page 20 of 20  |

#### **Precautions**

- 1. Avoid exposure to moisture at all times during transportation or storage.
- 2. Anti-Static precaution must be taken when handling GaN, InGaN, and AllnGaP products.
- 3. It is suggested to connect the unit with a current limiting resistor of the proper size. Avoid applying a reverse voltage beyond the specified limit.
- 4. Avoid operation beyond the limits as specified by the absolute maximum ratings.
- 5. Avoid direct contact with the surface through which the LED emits light.
- 6. If possible, assemble the unit in a clean room or dust-free environment.

#### Reworking

- Rework should be completed within 5 seconds under 260 °C.
- The iron tip must not come in contact with the copper foil.
- Twin-head type is preferred.

#### Cleaning

Following are cleaning procedures after soldering:

- An alcohol-based solvent such as isopropyl alcohol (IPA) is recommended.
- Temperature x Time should be 50°C x 30sec. or <30°C x 3min
- Ultra sonic cleaning: < 15W/ bath; bath volume ≤ 1liter
- Curing: 100 °C max, <3min

#### **Cautions of Pick and Place**

- Avoid stress on the resin at elevated temperature.
- Avoid rubbing or scraping the resin by any object.
- Electro-static may cause damage to the component. Please ensure that the equipment is properly grounded. Use of an ionizer fan is recommended.
