FEATURES AND BENEFITS

- Thermal Conductivity: 1.3 W/m-K (Bulk Rubber)
- PEN film reinforcement allows easy rework and resistance to puncture and tear resistance
- Highly Conformable, low hardness
- Low strain on fragile components

BERGQUIST GAP PAD TGP 1350 is a highly compliant Gap Pad material that is ideal for fragile component leads. The material includes a PEN film, which facilitates rework and improves puncture resistance and handling characteristics.

The tacky side of BERGQUIST GAP PAD TGP 1350 maintains a conformable, yet elastic nature that provides excellent interfacing and wet-out characteristics, even to surfaces with high roughness or uneven topography.

BERGQUIST GAP PAD TGP 1350 has inherent tack on one side of the material, eliminating the need for thermally impeding adhesive layers. It is highly recommended that the PEN film be left intact. However, film removal will not have a significant impact on thermal performance.
