0.35mm Pitch 0.8mm Height Hybrid Power/Signal Connectors for Board-to-Board and FPC-to-Board

BM24 Series

■Features

1. Rated current: 5A

The compact BM24 Series features a space-saving design with the power contacts rated at 5A, and the signal contact rated at 0.25A. (Fig.1)

2. High contact reliability

A 2-point contact structure for both power and signal contacts provides high contact reliability. (Fig.3)

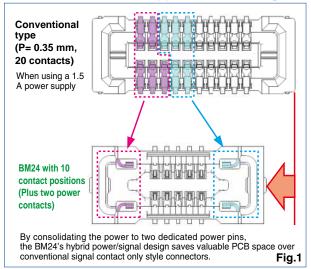

3. Enhanced mating process

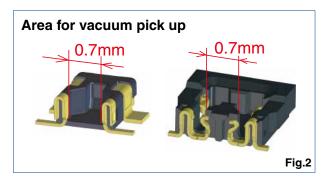

A guide rib ensures self-alignment during mating, with an alignment range of 0.3mm. In addition, a tactile click is generated upon mating completion, preventing incomplete mating and enhancing mating operability.

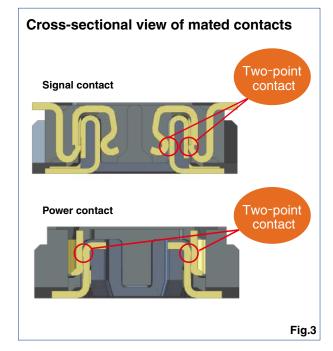

4. Supports USB3.0/3.1 transmission

The signal contact supports USB3.0/3.1 signals.

(Supports USB3.0 signal)

■Product Specifications

| Dotingo | Rated current | Power contact : 5A Signal contact : 0.25A(Note 1) | Operating temperature range | -40 to 85°C (Note 2) | Storage temperature range | -10 to 60℃ (Note 3) |
|---------|---------------|--|-----------------------------|----------------------|---------------------------|---------------------|
| Ratings | Rated voltage | 30V AC/DC | Operating humidity range | 20 to 80% | Storage humidity range | 40 to 70% (Note 3) |

| Items | Specifications | Conditions |
|---------------------------|--|--|
| 1. Insulation resistance | 100MΩ min. | Measured at 100V DC |
| 2. Withstanding voltage | No flashover or dielectric breakdown | 150V AC for one minute |
| 3. Contact resistance | Signal contact : $100m\Omega$ max. Power contact : $15m\Omega$ max. | Measured at 20mV AC, 1kHz, and 1mA |
| 4. Vibration | No electrical discontinuity for more than 1μ s. | Frequency: 10 to 55 Hz; half amplitude: 0.75mm, in 3 axis directions for 2 hours |
| 5. Humidity | Contact resistance : Signal contact : $100m\Omega$ max. Power contact : $15m\Omega$ max. Insulation resistance : $50M\Omega$ min. | 96 hours at a temperature of 40 ±2°C and a humidity range from 90 to 95% |
| 6. Temperature cycle | Contact resistance : Signal contact : $100m\Omega$ max. Power contact : $15m\Omega$ max. Insulation resistance : $100M\Omega$ min. | (-55°C for 30 minutes → 5 to 35°C for 10 minutes → 85°C for 30 minutes → 5 to 35°C for 10 minutes) in 5 cycles |
| 7. Durability | Contact resistance : Signal contact : $100m\Omega$ max. Power contact : $15m\Omega$ max. | 10 mating cycles |
| 8. Solder heat resistance | No dissolution or melting of the resin that will affect the performance. | Reflow: with recommended temperature profile; Hand soldering at soldering iron temperature of 350°C for 3 seconds max. |

Note 1: The total current capacity for connectors with 40 or more signal contacts is 10A for all contacts.

Note 2: Includes temperature rise caused by current flow.

Note 3: Storage refers to long-term-storage of unused items before they are mounted on the PCB. Operating temperature / humidity range applies to the state of temporary storage such as non-powered after mounting on the PCB, and during transportation, etc.

■Materials / Finish

| Product | Part | Materials | Finish | UL Regulation |
|----------------------|----------------|-----------------|-------------|---------------|
| | Insulator | LCP | LCP Black | |
| Receptacle Header | Signal contact | Phosphor bronze | Gold plated | |
| Header | Power contact | Copper alloy | Gold plated | |

■Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

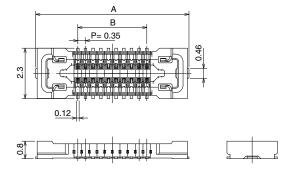

●Receptacle / Header

$$\frac{BM}{0} \frac{24}{2} - \frac{*}{6} \frac{DS}{0} / \frac{2}{6} - \frac{0.35}{6} \frac{V}{0} \frac{(51)}{6}$$

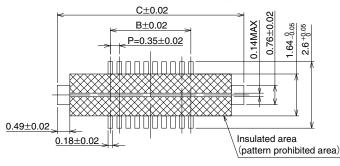

| Series Name : BM | Number of Power Contacts : 2 | | |
|---|---|--|--|
| 2 Series No. : 24 | 6 Contact Pitch : 0.35mm | | |
| 3 Number of Signal Contacts : 10, 20, 24, 30, 40, 50 | Termination typeV : Straight SMT | | |
| 4 Connector type | 8 Gold plated specification and packaging status | | |
| DS : Receptacle DP : Header | (51) : Gold plate thickness 0.05μm Embossed tape packaging (10,000 pcs/reel) | | |

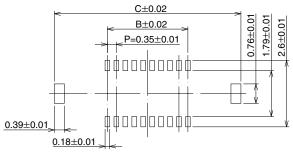

■Receptacle

Recommended metal mask dimensions (mask thickness: 100 μm)

Unit: mm

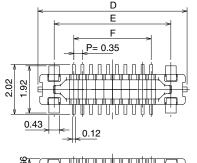

| Part No. | HRS No. | No. of Contacts | Α | В | С |

●Precautions

| Recommended solder temperature profile | MAX 250°C | | | | |
|---|---|--|--|--|--|
| tomporataro preme | 250 | | | | |
| | 220 | | | | |
| | 150 Within 60 seconds | | | | |
| | g 150 | | | | |
| | 100 - 90 to 120 sec | | | | |
| | | | | | |
| | 50 | | | | |
| | Room temperature | | | | |
| | 50 100 150 200 250 300 | | | | |
| | Heating time (sec) [Conditions] 1. Peak temperature : Maximum of 250°C | | | | |
| | 2. Heat section : 220°C min., within 60 seconds 3. Preheat section : 150 to 180°C, 90 to 120 seconds | | | | |
| | 4. Number of reflow cycles : Maximum of 2 cycles | | | | |
| | Note 1 : The temperature refers to the surface temperature of the PCB in the area of the connector lead. | | | | |
| | Note 2: When you use nitrogen reflow, please mount the product with the | | | | |
| | oxygen concentration at a minimum of 1,000 ppm. Please contact us if the concentration is below 1,000 ppm. | | | | |
| Recommended manual soldering conditions | Soldering iron temperature : 340 \pm 10°C ; Soldering time: within 3 seconds | | | | |
| Recommended stencil thickness and open area ratio to PCB pattern area | Thickness: 0.1mm Aperture ratio: 80% on the DS side; 70% on the DP side | | | | |
| 4. Board warpage | A maximum of 0.02mm at the center of the connector relative to each end of the connector. | | | | |
| 5. Cleaning conditions | Cleaning is not recommended. If you clean this product, please evaluate its performance before using it. (Cleaning may impair the mating/unmating properties and lower resistance to environmental factors) | | | | |
| 6. Precautions | Care should be taken when mating/unmating the connector when it is not mounted on the PCB. This could cause damage or deformation of the contacts. Avoid supporting the PCB only with the connectors. | | | | |
| C. 1 recautions | Support it by other means such as bolts, screws, posts, etc. Care should be taken that excessive prying mating/unmating could cause damage. | | | | |
| | •In the case of hand soldering, please do not apply any flux, which could cause flux wicking. | | | | |
| | This product may have slight color differences due to production lot variability, but this does not the performance. | | | | |
| | Please refer to the next page for precautions regarding mating/unmating. Because the product can disengage if dropped (or other impact), and by | | | | |
| | FPC routing, it is advised to secure the mated connectors to the board with housings and cushioning materials. | | | | |
| | Caution! Do not use the connector in non-recommended conditions (i.e., rated current, rated voltage, PCB design and operating environment, etc.). Such usage could lead to material outgassing, ignition, or short-circuit, etc. | | | | |
| | Refer to the specifications and the guidelines for board pattern dimensions, board cautions, and connector treatment. | | | | |
| | Pleasae contact Hirose if using the connector under conditions other than those described in the specifications and the guidelines is being considered. | | | | |

Handling Precautions when Mating Connectors

| BM24-*DS-0.35V PER UNUMBURU PO | |
|---------------------------------|---|
| | Do not apply excessive force while positioning the connector for mating. Too much force will cause damage/shaving of the housing material, and may lead to a failure in contact resistance and other issues. |
| | Once the positioning for correct mating is obtained, mating height drops down one stage. There is no movement in the horizontal direction. Mating should occur at this stage, while taking care that there is no horizontal movement. |

Handling Precautions when Un-mating Connectors
