

## 1mm Pitch Double Rows Low Profile Wire-to-Board Connectors

**DF20 Series** 

#### ■Features

#### 1. Contact Pitch

1mm contact pitch allows reliable solder and cable termination.

### 2. Reliable electrical connection wipe

Effective electrical connection is assured with a 1mm wipe of mating contacts.

#### 3. Narrower external width and length

Redesigned metal fittings decreased the overall length of the board- mount receptacle and permit end-to-end mounting of several connectors.

#### 4. Automatic equipment board placement

Straight type pin headers are supplied with a 5.4mm × 4.6mm flat platform to allow vacuum pick-up and placement on the board.

### 5. Product variations

- (1) Available with 10, 20, 30, 40, and 50 contacts.
- (2) Pin headers are available in two types : with or without board positioning bosses.
- (3) Depending on specific application pin headers can be ordered in straight or right angle types.

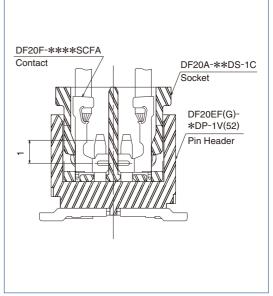

### Applications

Notebook PC, small office automation equipment, small consumer devices, portable devices.

Any application requiring low profile reliable board-to-cable connection with a 28 AWG, 30 AWG, 32 AWG conductors.

### **■**Product Specifications

Rating	Rated current 30 AW	30 AWG : 0.9A/pin	range	(Note 1)	Storage temperature range	-10°C to +60°C	
naurig		32 AWG : 0.7A/pin	Operating humidity	40% to 80%	Storage humidity	40% to 70%	
			range	(Note 2)	range	40% 10 /0%	

Item	Specifications	Conditions
1. Insulation resistance	500MΩ min.	Measured at 100V DC
2. Withstanding voltage	No flashover or insulation breakdown	Conduction of 300V AC applied for 1 minute
3. Contact resistance	30MΩ max.	Measure at 1mA.
4. Vibration	No electrical discontinuity of $1\mu$ s min.	Frequency of 10 to 55 Hz, single amplitude of 0.75mm, in 3 directions for 10 cycles
5. Humidity	Contact resistance of $30m\Omega$ max., insulation resistance of $100M\Omega$ min.	Temperature of 40±2°C, humidity of 90% to 95%, left standing for 96 hours
6. Temperature cycle	Contact resistance of $30m\Omega$ max, insulation resistance of $500M\Omega$ min.	(-55°C: 30min / 5°C to 35°C: 2 to 3min / 85°C: 30min / 5°C to 35°C: 2 to 3min ) for 5 cycles
7. Mechanical operation	Contact resistance of 30mΩ max.	50 cycles
8. Resistance to Soldering heat	No deformation of the insulator parts that will affect performance	Reflow: At the recommended temperature profile, manual solder: Soldering iron temperature of 300°C for 3 seconds

Note1: Includes temperature rise caused by current flow.

Note2: No condensing.

Note3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

### ■Materials / Finish

Item	Part	Material	Finish	Remarks	RoHS2
Socket	Insulator	Polyamide	Color : Beige	UL94V-0	
Crimping contact	Contact	Phosphor bronze	Gold plating		
	Insulator	Polyamide	Color : Beige	UL94V-0	YES
Pin header	Contact	Phosphor bronze	Gold plating		
	Metal Fitting	Brass	Tin Plating		

### ■Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

### Pin header

1Series name	: DF20, DF20E	4Connector type	DP : Double-row pin header		
2Boss Type	F : Without boss	6 Contact pitch	: 1mm		
<b>3</b> 2000 . ypc	G: With boss	Type of housing,	V : Straight SMT header		
3Number of contacts	: 10, 20, 30, 40, 50	header	H: Right angle SMT header		

### Crimping contact

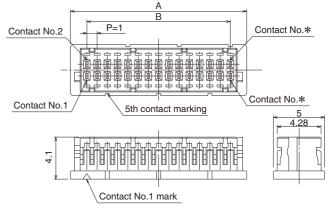

1 Applicable wire size	2830 : 28 to 30 AWG 3032 : 30 to 32 AWG	3Plating type	A : Gold plating
		4Packaging	04:1 reel = 10,000 pieces
2Contact &	SCF : Socket contact reel	Specifications	44 : 1 reel = 20,000 pieces
packaging type			

### Crimp socket

Series name : DF20A	4Contact pitch : 1mm
<b>2</b> Number of contacts : 10, 20, 30, 40, 50	<b>5</b> Type of housing, C: Crimp housing
3Connector type DS: Double-row socket	header C. Chimp housing

### ■Double Row Socket

Unit: mm

Part No.	HRS No.	No. of Contacts	Α	В

### Crimping Precautions

### Items required prior to start crimping

The work-related documents shown below are required before starting the harness connections.

(The mark shows the document required.)

When the documents shown below are not available, ask our sales personnel to provide them.

Document Title	Description	Automatic Crimping Machine	Hand Crimping Tool	Remarks
(1) Main unit of crimping machine instruction manual	Explanation of main press machine unit	•	_	When purchasing main press machine unit, it is bundled.
(2) Operating Instructions for Hand Tool	Crimp operation	•	_	When purchasing Applicator, it is bundled.
(3) Applicator Spare Parts Identification	Explanation for Applicator installation	•	_	
(4) Crimp Conditions	Standard values of : Crimp height ; Tensile strength	•	_	
(5) Crimp Quality Standards	Various standards for crimping conditions	•	_	
(6) Operating Instructions for Hand Tool	Inspection items of : Crimp height ; Crimp operation Tensile strength	_	•	When purchasing Hand Tool, it is bundled.
(7) Cable Assembly Procedure	Cable Assembly Procedure	•	•	Ask our sales personal to provide them.

#### Tools

When crimping work is applied to our contacts, the tool designated by Hirose should be used.

Crimping work by using tools other than as designated must not be done because it may result in contact failure, disconnection of cable, etc.

\*The operating instructions manual is available for the crimping machine and the applicator.

Be sure to carefully read the operating instructions manual befor implementing the work.

#### Applicable electric wires

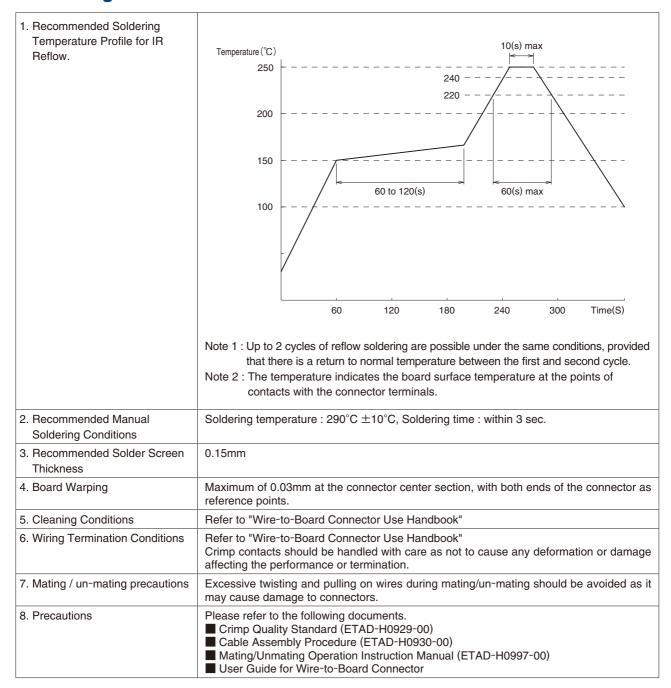

Check that the electric wire to be used is in the range of application.

If you intend to use an electric wire other than the recommended one, ask our sales personnel.

- · Electric wires that are applicable for crimping connectors shall, principally, be the tin-plated stranded softcopper wire.
- · Crimping of electric wires wherein single wires, polyester yarns, etc., exist and crimping of tin-coated wires should be avoided
- Avoid crimping two electric wires together.
- The setting values of crimp height (Note 1) may vary between tin-plated and gold-plated terminals even if the same electric wires are used.
- · The setting values of crimp height (Note 1) may vary depending on the difference in the core wire configuration even if the computed cross-sectional area is the same.

Note 1: The crimp height is an important item that determines crimping quality. We execute crimping tests for each electric wire to ensure the optimal value for the crimp height with high precision, thereby ensuring optimal setup values.
