₹ EnerBee™ igh Current, Plastic Power Supply Connectors

EM Series

Features

1. 4-positions with high current capability (three-phase power supply and ground)

Rated current of 50A per contact (50A/3contacts) with 8 AWG or corresponding wire. 70A per contact (30A/3contacts) with AWG wire and ambient temperature 25°C. •Rated current of 30A per contact (30A × 3contacts)

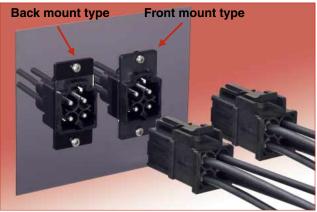

with 10 AWG or corresponding wire. (Please refer to the charts below concerning the relation between ambient temperature and working current value.)

2. Easy crimp termination

Crimp termination provides easy and stable termination process.

3. Standard tooling available

Terminals can be crimped with a standard tool in accordance with JIS C 9711.

4. Sequenced mating

Ground terminal makes contact first before power terminals touch.

5. Snap-in lock is easy to operate

Lock operation can be done by simply snapping the plug to the receptacle.

6. Attachment Styles

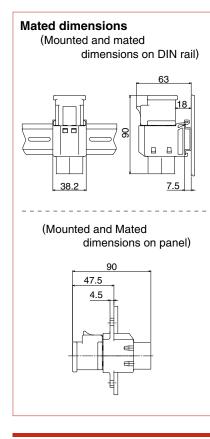

·DIN rail attachment type Snap-on attachment to 35mm width DIN rail. ·Panel attachment type Both front and back mounting applicable.

7. Ten keying combinations possible

Guide keys prevent incorrect insertions when multiple connectors are used together at the same time.

8. Meets approved safety standards

TÜV, UL certified.

Derating curve 8 AWG 10 AWG Basic Curve Derating curv Note 1 : Derating curve is a curve that is obtained by multiplying the current value of the basic

curve by derating factor of 0.8.

Note 2 : The value of rated current varies with the ambient temperature. It is recommended to use the product within the derating curve zone. When using a UL or TÜV approved product, please use the product within the specified range as well as the derating curve aera.

Note 2 : The value of rated current varies with the ambient temperature. It is recommended to use the product within the derating curve zone. When using a UL or TÜV approved product, please use the product within the specified range as well as the derating curve aera.

Item	Specification	Condition
1. Contact resistance	1mΩ max.	Measured at DC 1A
2. Insulation resistance	5000MΩ min.	Measured at DC 500V
3. Withstanding voltage	No flashover and insulation breakdown	AC 4260V for 1 minute
4. Vibration resistance	No electrical discontinuity of 10μ s or more	10→50→10Hz/cycle, single amplitude of 0.75mm, five minutes/cycle, three directions, 10 cycles for each direction
5. Shock resistance	No electrical discontinuity of 10µs or more	Acceleration of 490m/s ² , duration of 11ms, three directions, three times for each direction
6. Durability	Contact resistance : 1mΩ max.	100 cycles
7. Temperature cycle	Insulation resistance : $5000M\Omega$ min.	-55℃ for 30 minutes→room temperature for 2 to 3 minutes→+125℃ for 30 minutes→room temperature for 2 to 3 minutes, 5 cycles
8. Humidity resistance (Normal condition)	Insulation resistance : $50M\Omega$ min. (at high humidity condition) $500M\Omega$ min. (at dry condition)	Exposed for 96 hours at the temperature of 40° C and the humidity of 90 to 95%

Coding key

Part No.	HRS No.
EM-GK	138-0026-5

Note : 25 pcs/pack

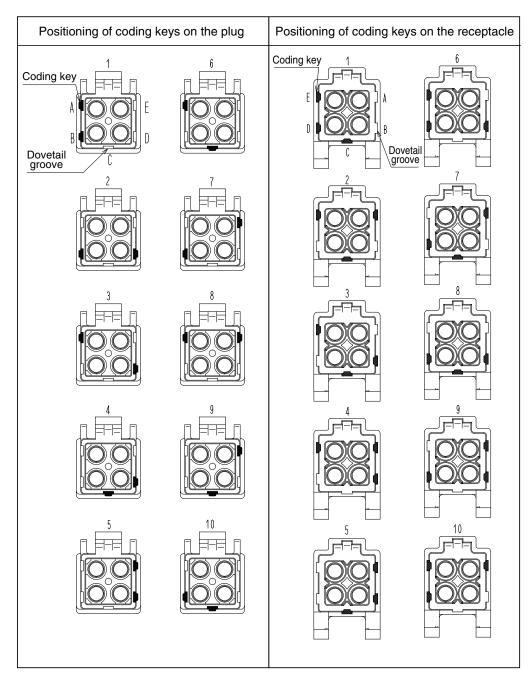

Each sprue holds 4 coding keys and yields a total of 100 coding keys.

Coding keys are used to create keying combinations to prevent incorrect insertion. This is especially useful when multiple parts are being used together. Coding keys need to be installed on both the plug and receptacle when creating specific combinations.

Please contact a Hirose representative for details and proper use of coding keys.

Coding key combination table

(Using two coding keys on the plug and three on the receptacle can make up to ten different combinations.)

Precautions when using the EM series connectors

- 1. Switch off the power before mating or un-mating the connectors.
- 2. Do not touch the terminal portion when the connector is energized. Doing so is potentially dangerous and can lead to injury.
- 3. Please contact a Hirose representative for harness work procedures and instruction manuals.
