## BNCseries <br> RFCo-AXIAL CONNECTORS

## Overview

The BNC series are most widely used as $50 \Omega$ coaxial connectors, and compact size, light weight, and quick mounting and dismounting (bayonet lock coupling). Suitable for coaxial cables (RG-55.58/U) with a finished outside diameter of $\phi 3-\phi 8$.

## Applicable standards

Defense Agency (NDS XC 6103, DSP C 6202)
Japanese Industrial Standards (JIS C 5412)
NTT (Model 2095 3C connector)
*Meets MIL Specifications. (See Products Meeting MIL Specifications Index Table, pages 220-221.)

Electrical Specifications

| Item | Standard |
| :--- | :--- |
| Characteristic impedance | $50 \Omega(* 1)$ |
| Withstand voltage | $1,500 \mathrm{Vr}$.m.s. for 1 min. |
| Insulation resistance | $5,000 \mathrm{M} \Omega$ or more at 500 VDC |
| Contact resistance | $3 \mathrm{~m} \Omega$ or less at 1 ADC |
| Applicable frequency range | $\mathrm{DC}-4 \mathrm{GHz}$ |
| Voltage standing wave | 1.2 or less (DC-2GHz) |

(*1) Not different in electrical specifications from the $50 \Omega$ cable when connected to the $75 \Omega$ coaxial cable ( $3 \mathrm{C}-2 \mathrm{~V}$ ) for use at low fraquencies (DC-200MHz).

Main Materials/Finish

| Part | Material | Finish(*2) |
| :--- | :--- | :--- |
| Armor(shell) | Brass | Silver plated, Nickel-plated |
| Male terminal | Brass | Silver plated, Gold-plated |
| Female terminal | Beryllium copper | Silver plated, Gold-plated |
| Insulation | Tetraflouride resin | - |
| Gasket | Silicon rubber | - |

(*2) Surface treatment differs according to the product number unit. For details, see the BNC Connector List.

## Connecting methods

The ends are processed as shown in the drawing (refer to Table 1). For the end processing dimensions $L_{1}$, refer to Table 1, End processing dimensions arranged by part number.

(1) Insert clamp from tip of cable and fold outer conductor of cable back onto clamp. Using a knife, cut off excess outer conductor left at this time.
(2) Cut off center conductor of cable at $L_{2}$, from surface $A$ of cable insulation. For end processing dimensions $L_{2}$, $L_{s}$, refer to Table 1 , End processing dimensions arranged by part ( $\mathrm{L}_{3}$ is a reference dimension.) (Note: Be careful not to damage center conductor.)
(3) Solder contact and center conductor. It is a good idea at this time to solder the terminal preliminarily in advance. (Note: There must be no gap between the end and the cable insulation.)

Insert cable and parts into shell and tighten tightening nut sufficiently.

# BNCseries <br> RFCO-AXIAL CONNECTORS 

## Assembling methods

4. Cut off the insulation, leaving about 2 mm of it.
3. Wind the shielded wire onto the clamp. At this time, cut off the shielded wire at position $A$ in the drawing, leaving some

1. Cut off 13 mm of the cable's outer covering and expose the shieided wire.
2. Put the cap through the cable, insert the clamp, and unbraid the shielded wire.

## gap.

5. Fit the contactor of the outer conductor tightly onto the clamp, position a knife on the notched window, and cut off the insulation.
Take care not to damage the center conductor at this time.
6. Solder the center conduc tor with the contactor of the outer conductor fit ting tightly onto the clamp.
7. Insert the block described above so that it will fit into the groove on the clamp and the embossed mark on the armor. Tighten the cap thoroughly. The tools used are a JIS spanner (width 12) and a JIS spanner or monkey wrench (width 14).

## Non-reflective Terminations (BNC)

## BNC-TM Series

## ■Product Specifications

The test method conforms to MIL-STD-202.

## Features

## 1.High Performance

These wide bandwidth/ultra high matching nonreflective termination use Hirose Electric original high frequency matching technology.

## 2.Full Assortment of 50 ohms and 75 ohms Types

In addition to the 50 ohms impedance type, plugs and jacks are available in a 75 ohms type.

| Ratings | Frequency range (Note) <br> Characteristic impedance <br> Maximum Input Power (Note) | DC to 4.0 GHz <br> 50 ohms, 75 ohms <br> 0.5 to 1 W | Operating temperature range <br> Operating relative humidity | $-10^{\circ} \mathrm{C}$ to $+65^{\circ} \mathrm{C}$ <br> $95 \%$ Max. l |
| :---: | :--- | :---: | :--- | :---: |

Note: The frequency range and the maximum input power will differ depending on the products.

| Item | Standard | Conditions |
| :---: | :---: | :---: |
| 1.Vibration | No electrical discontinuity of $1 \mu$ s or more | Frequency of 10 to 2000 Hz , overall amplitude of 1.52 mm , acceleration of $98 \mathrm{~m} / \mathrm{s}^{2}$ for 2 hours in each of 3 directions |
| 2.Shock | n | Acceleration of $490 \mathrm{~m} / \mathrm{s}^{2}$, sine half-wave waveform, 3 cycles in each of the 3 axis |
| 3.Temperature cycle | No electrical discontinuity of $1 \mu \mathrm{~s}$ or more | Temperature: $-55^{\circ} \mathrm{C} \rightarrow+15^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C} \rightarrow+85^{\circ} \mathrm{C} \rightarrow+15^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ Time: $30 \rightarrow 15$ max. $\rightarrow 30 \rightarrow 15$ max. (Minutes) 100 cycles |

## Materials

| Part | Material | Finish |
| :---: | :---: | :---: |
| Connector Body | Brass | Nickel plating |
