

2.54mm Pitch Bottom Entry Type Connector

MDF7 Series

■ Features

1. Board to Board Size Freely Settable

The board to board size can be set at infinite stages, according to the header pin through type structure and the diverse header variation.

The board to board size can be set at infinite stages.

2. Integrity of Parts Mounted Surface

The parts mounted surface on two boards aren't face each other, and can be oriented in the same direction.

3. Wide Variation

Single-row product, double-row product, tin plated and gold plated products are lined up. In addition, the header to correspond to the board to board size are prepared. Concerning board to board size, other products can be provided, in addition to products in this catalog. Please contact HRS company as required.

Application Pattern and PCB mounting pattern

● When the single-row straight pin header is used

● When the header with locator is used

The locator moves as the connector is inserted.

● When the PCB distance is set to MAX

● When the right angle pin header is used

To separate clearance between the boards, the operation limit t is defined as the state where the male pin has passed through the receptacle.

Application Pattern and PCB mounting pattern

●When the double-row straight pin header is used

Precautions

1. Recommended Soldering Condition	<p>■Flow Condition by Automatic Soldering Unit Soldering temperature: 255±5°C, Soldering time: within 10 seconds</p> <p>■Manual Soldering Condition Soldering iron temperature: 340±10°C, Soldering time: within 3 seconds</p>
2. Board Masking	<p>If the automatic soldering unit is used, block the pin header through-hole on the receptacle mounted board with the masking tape, etc., and prevent the flux pervasion.</p> <p>In addition, if much flux is adhered so as to affect the contact, please be sure to clean the board.</p>
3. Cleaning Condition	Refer to Nylon Connector Use Hand book.
4. Cautions	<p>■It is impossible to fix the board to the board by the connector only. Please take actions to fix the board without using the connector.</p> <p>■If the board deformation could occur due to vibration, please use the gold plating.</p> <p>■Don't use the connector as the top entry.</p>
