Subminiature, LAN Modular Jack Connectors

TM11R-5M2 Series

Features

1. Fast Ethernet Support

Complies with TIA/EIA-568-B data wiring requirements, guaranteeing Cat.5 transmission for 1,2-3,6 conductor pairs. As such, these products fully support Fast Ethernet (100BASE-TX) transmission.

2. Subminiature Design Contributes to **Saving Space in the Equipment**

Having built-in light indicators, with height of only 11.5mm, width of 15mm and depth of 17.5mm the connectors can be used in extremely limited spaces.

3. Built-in Light Indicators

There is no need to design a separate space for the light indicators as they are built-in the connector, enabling space-saving. (Fig. 2) Compared with LED type indicators, they do not emit any electrical noise. (Fig. 3)

4. EMI Protection

Metal shield covers the outer surfaces of the connectors assuring complete protection against electromagnetic interference.

5. Environmental Considerations

Plating is lead-free in order to protect environment.

6. FCC Standards

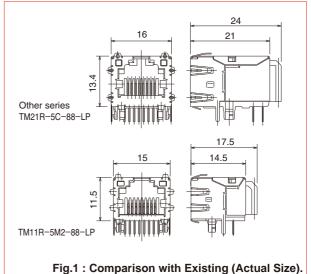

Meets requirements of FCC Title 47, Part 68, Subpart F.

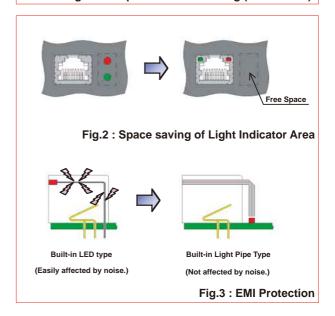

7. THR (Through-Hole Mounting) Type

THR (Through-Hole Mounting) compatible type is available.

Applications

LAN Equipment, Office Equipment and Measuring **Devices**

*Recommendations for PCB Design

- 1 Areas indicated should be free of conductive traces.
- 2 Area indicated should be free of conductive & ground traces.
- 3 Recommended board thickness: 1.6mm.
- The LED for the jack connector with built-in light pipe is mounted on the PCB. Please use an LED within the specified dimensions.
 - For LED specifications, contact the LED manufacturer.
- 5 Mount so that the center of the light emitting part of the LED is at the center of the dimensions indicated in the diagram.
- 6 Please check the latest dimension of LED pad with the corresponding LED manufacturer before designing.

 Same Recommended Cutout for Built-in Light Indicator Type, Type Without Light Indicator and Through-Hole Mounting Type

*Recommendations for Panel Design

- 1 When making the panel, make a notch according to the dimensions shown as a relief for the plug lock lever.
- 2 Set the panel mounting position so that the bottom surface of the panel is 0.3mm below the PCB mounting surface.
- The contact position of the contact spring is 3±1 (top and sides) and 2_{-0.7} (back side) from the front surface of the connector. Please be careful when setting the panel position.

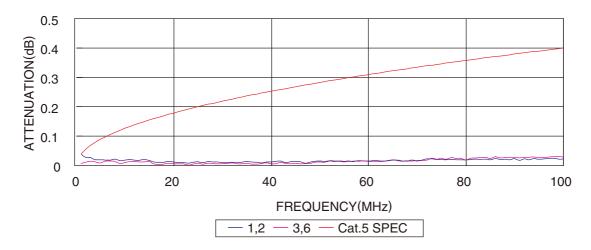

Note: IPA cleaning at room temperature is recommended for the cleaning of this product.

When an aqueous cleaning agent is to be used, there is a concern that the light pipe (made of polycarbonate resin) may change color; therefore, please make a selection based on a table showing the effects on the resin. These tables are issued by the various manufacturers of cleaning agents.
