HR Series Issue 1

Datasheet

DESCRIPTION

When the application requires a hermetically sealed switch with high temperature capability, Honeywell delivers the HR Series limit switches for the most severe of environments. The HR Series is well suited for commercial and military aircraft applications where high temperatures are encountered. The switch design incorporates a choice of an integral pin plunger or roller plunger with a 3/4 inch diameter threaded bushing for ease of installation into a panel. With stainless steel material construction for the external package and high temperature rated components, the HR Series switches are capable of withstanding continuous temperatures up to 315 °C [600 °F] and suitable where corrosive environments are present.

HR Series limit switches are designed to MIL-PRF-8805 standards with select catalog listings qualified to the MIL-PRF-8805 standards.

VALUE TO CUSTOMERS

 Honeywell HR Series hermetically sealed high-temperature switches drive solutions for precise position indication of critical applications on commercial/military aircraft and military systems

FEATURES

- Exceptional wide temperature range of -65 °C to 315 °C [-85 °F to 600 °F]
- Select HR Series catalog listings are qualified or compliant to MIL-PRF-8805
- Hermetically sealed to MIL-PRF-8805 symbol 5
- Stainless steel housing and threaded bushing
- Different styles of integral actuators: pin plungers and roller plungers
- Several different styles of electrical termination: 4-48 terminal screws, end or side exit #20 AWG wire leads

POTENTIAL APPLICATIONS

- Thrust reverser actuation system (TRAS) for jet engines
- Cowl-lock indication during thrust reverse actuation for jet engines

DIFFERENTIATION

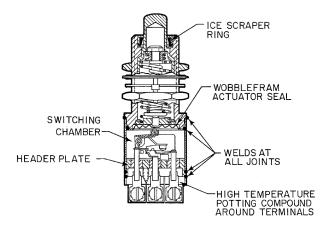

- Only manufacturer with a bushing mount high-temperature hermetically sealed limit switch
- Threaded bushing facilitates ease of installation

PORTFOLIO

In addition to the HR Series hermetically sealed switches, Honeywell offers a complete range of sealed switches for aircraft and military systems. The sealed switches include the EN Series, HM Series, HE Series, HS Series, SE Series, and XE Series.

Table 1. Specifications

Characteristic	Parameter						
Description	High temperature hermetically sealed limit switch with MIL-PRF-8805 standards						
Standards	Design conforms to MIL-PRF-8805						
Housing & bushing material	300 Series stainless steel						
Contacts	Silver alloy						
Circuitry	1PDT or 2PDT [reference circuitry illustrations below]						
Electrical rating	5 A resistive or 2 A inductive @ 28 Vdc						
Mechanical endurance	25000 cycles min.						
Electrical endurance	25000 cycles min. at full rated load						
Dielectric strength (initial)	1000 VRMS; 500 μA. Max. leakage						
Insulation resistance (initial)	500 Vdc; 1000 Megohms min.						
Environmental sealing	Symbol 5, hermetic seal per MIL-PRF-8805						
Temperature range	-65 °C to 315 °C [-85 °F to 600 °F]						
Shock	Symbol M (100 g) per MIL-PRF-8805						
Vibration	Symbol 1 (10 g peak) 10 Hz to 500 Hz sinusoidal per MIL-PRF-8805						

HR SERIES SWITCHES

The HR Series high-temperature hermetically sealed switches are designed with a threaded bushing for panel mount applications. The HR Series has a threaded bushing which is 0.75 (3/4) in diameter.

The options for the electrical termination for the HR Series switches are generally end exit wire leads or screw terminals integral to the switch; however, military style connectors integral to the HR switch are also available.

MOUNTING

Plunger actuator switches bushing mount through 0.75 inch (19,1 mm) diameter holes. Lock washer, keying washer, and wire lock hexagon mounting nuts lock the switches in their mounting.

ACTUATORS

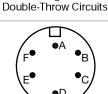

Plunger

For in-line actuation. An ice scraper ring clears the actuator with each operation. Material is stainless steel.

Roller plunger

For cam and slide actuation not to exceed 20° rise. Roller adjusts laterally in 45° increments. An ice scraper ring cleans the actuator with each operation. Material is stainless steel.

ELECTROMECHANICAL SWITCHES

Definitions below explain the meaning of operating characteristics. Characteristics shown in tables were chosen as most significant. They are taken at normal room temperature and humidity. These may vary as temperature and humidity conditions differ. Sketches show how characteristics are measured for in-line plunger actuation.

Linear dimensions for in-line actuation are from top of plunger to a reference line.

Differential Travel (D.T.) – Plunger or actuator travel from point where contacts "snap-over" to point where they "snapback."

Free Position (F.P.) – Position of switch plunger or actuator when no external force is applied (other than gravity).

Full Overtravel Force – Force required to attain full overtravel of actuator.

Operating Position (O.P.) – Position of switch plunger or actuator at which point contacts snap from normal to operated position. Note that in the case of flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings.

Operating Force (O.F.) – Amount of force applied to switch plunger or actuator to cause contact "snap-over." Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever.

Overtravel (O.T.) – Plunger or actuator travel available beyond operating position.

Pretravel (P.T.) – Distance or angle traveled in moving plunger or actuator from free position to operating position.

Release Force (R.F.) – Amount of force still applied to switch plunger or actuator at moment contacts snap from operated position to unoperated position.

Total Travel (T.T.) – Distance from actuator free position to overtravel limit position.

IN-LINE PLUNGER ACTUATION

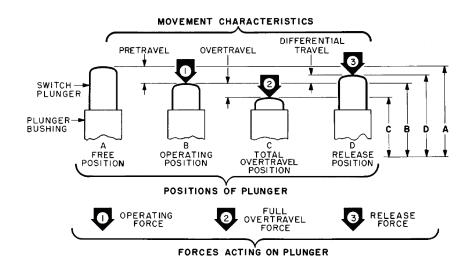

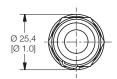

Table 2. Order Guide					Switch Characteristics						Dimensional		
Actuator	Circuitry	Catalog Listing	Military Number or Note	Electrical Termination	Operating Force N [lb]	Release Force min. N [lb]	Free Position nom. mm [in]	Pretravel max. mm [in]	Overtravel min. mm [in]	Differential Travel max. mm [in]	Bushing Thread	Housing Height max. mm [in]	Housing Diameter nom. mm [in]
Pin plunger	2PDT	12HR1-S	MS24594-1	Screws (6), #4-48	26,7 to 53,4 [6 to 12]	22,2 [5]	42,55 [1.675]	1,27 [0.050]	6,35 [0.250]	0,38 [0.015]	0.750-20 UNEF	38,1 [1.50]	25,4 [1.0]
Pin plunger	1PDT	12HR8-6	-	Leadwire #20 AWG (end exit) per MIL-C-25038	26,7 to 53,4 [6 to 12]	22,2 [5]	42,55 [1.675]	1,27 [0.050]	6,35 [0.250]	0,38 [0.015]	0.750-20 UNEF	61,0 [2.40]	26,9 [1.06]
Roller plunger	2PDT	22HR1-S	-	Screws (6), #4-48	26,7 to 53,4 [6 to 12]	22,2 [5]	54,36 [2.140]	1,27 [0.050]	6,35 [0.250]	0,38 [0.015]	0.750-20 UNEF	38,1 [1.50]	25,4 [1.0]
Roller plunger	1PDT	22HR8-6	_	Leadwire #20 AWG (end exit) per MIL-C-25038	26,7 to 53,4 [6 to 12]	22,2 [5]	54,36 [2.140]	1,27 [0.050]	6,35 [0.250]	0,38 [0.015]	0.750-20 UNEF	61,0 [2.40]	26,9 [1.06]

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office. To learn more about Honeywell's sensing and control products, call +1-815-235-6847 or 1-800-537-6945, visit sensing.honeywell.com, or e-mail inquiries to info.sc@honeywell.com

△ WARNINGPERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

⚠ WARNINGMISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.
