Honeywell

Interactive Catalog Replaces Catalog Pages

Honeywell Sensing and Control has replaced the PDF product catalog with the new Interactive Catalog. The Interactive Catalog is a power search tool that makes it easier to find product information. It includes more installation, application, and technical information than ever before.

Sensing and Control Honeywell Inc. 11 West Spring Street Freeport, Illinois 61032

FEATURES

- Bidirectional sensing capability
- Actual mass air flow sensing
- Low differential pressure sensing

The AWM2000 Series microbridge mass airflow sensor is a passive device comprised of two Wheatstone bridges. The heater control circuit in Figure 1 is required for operation per specifications. The sensing bridge supply circuit in Figure 2 is also required for operation per specifications. These two circuits are **not on board** the package and must be supplied in the application. The differential amplifier in Figure 3 is a useful interface for the sensing bridge. It can be used to introduce the gain and to introduce voltage offsets to the sensor output as referenced in Equation 1.

Note: For applications sensing hydrogen or helium, see Application Note 3, page 131.

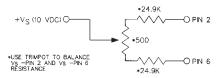

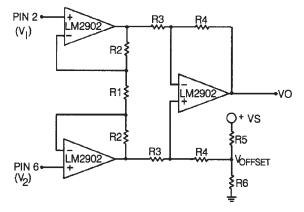

Figure 3
Differential Instrumentation Amplifier Circuit

Equation 1:

$$V_{\circ} = \left(\frac{2R_2 + R_1}{R_1} \right) \left(\frac{R_4}{R_3} \right) \left(V_2 - V_1 \right) + V \text{ offset}$$

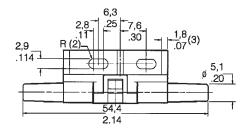

where V offset =
$$V_s \left(\begin{array}{c} R_s \\ \hline R_{e+}R_s \end{array} \right)$$

Temperature Range	Operating: -25° to +85°C (-13° to +185°F); Storage: -40° to +90°C (-40° to +194°F)								
Termination	2,54 mm (.100") centers, 0,635 mm (0.025") square								
Weight (grams)	10.8								
Shock Rating	100 g peak (5 drops, 6 axes)								

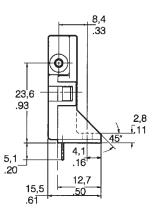

Notes:

- 1. Output Voltage is ratiometric to supply voltage.
- 2. Temperature shifts when sensing differential pressure correlates to the density change of the gas over temperature. See Application Note 1.
- 3. Maximum allowable rate of flow change to prevent damage: 5.0 SLPM/1.0 sec.

MOUNTING DIMENSIONS (for reference only)

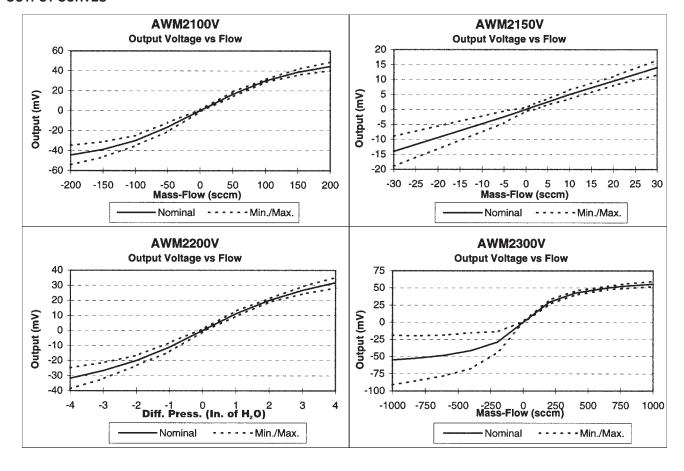

NOTE: Positive flow direction is defined as proceeding from Port 1 (P1) to Port 2 (P2) and results in positive output (Pin 6 > Pin 2). Negative flow direction is defined conversely and results in negative output (Pin 6 < Pin 2). Do not exert a force greater than 4.54 kg (10 lbs.) in any direction.

Notes:

- Numbers in BOLD type indicate calibration type, mass flow or differential pressure.
 Tolerance values apply to calibration type only.
- Differential pressure calibrated devices are not recommended for flow measurement. Use flow calibrated devices for flow measurement.
